**The Skin of Culture** Derrick De Kerckhove, 1995      *The Digital Nexus* Raphael Foshay, 2016-02-01 Over half a century ago in *The Gutenberg Galaxy* 1962 Marshall McLuhan noted that the overlap of traditional print and new electronic media like radio and television produced widespread upheaval in personal and public life Even without collision such co existence of technologies and awareness brings trauma and tension to every living person Our most ordinary and conventional attitudes seem suddenly twisted into gargoyles and grotesques Familiar institutions and associations seem at times menacing and malignant These multiple transformations which are the normal consequence of introducing new media into any society whatever need special study The trauma and tension in the daily lives of citizens as described here by McLuhan was only intensified by the arrival of digital media and the Web in the following decades The rapidly evolving digital realm held a powerful promise for creative and constructive good a promise so alluring that much of the inquiry into this new environment focused on its potential rather than its profound impact on every sphere of civic commercial and private life The totalizing scope of the combined effects of computerization and the worldwide network are the subject of the essays in *The Digital Nexus* a volume that responds to McLuhan s request for a special study of the tsunami like transformation of the communication landscape These critical excursions provide analysis of and insight into the way new media technologies change the workings of social engagement for personal expression social interaction and political engagement The contributors investigate the terms and conditions under which our digital society is unfolding and provide compelling arguments for the need to develop an accurate grasp of the architecture of the Web and the challenges that ubiquitous connectivity undoubtedly delivers to both public and private life Contributions by Ian Angus Maria Bakardjieva Daryl Campbell Sharone Daniel Andrew Feenberg Raphael Foshay Carolyn Guertin David J Gunkel Bob Hanke Leslie Lindballe Mark McCutcheon Roman Onufrijchuk Josipa G Petruni Peter J Smith Lorna Stefanick Karen Wall      Politics, Society, and the Media, Second Edition Paul Nesbitt-Larking, 2007-01-01 *Politics Society and the Media* is the first comprehensive political sociology of the media to be published in Canada Paul Nesbitt Larking draws upon a range of disciplines including cultural and media studies political economy social theory and political science to provide an analysis of the relationship between power and representation in Canada The framework for the book presents a model of the mutual interaction between politics and the media Attention is focused in the early chapters on how cultural ideological economic and governmental forces shape and condition the production of media in Canada Chapters on the work of Innis Grant McLuhan and their postmodern successors place the evolution of McLuhan s theoretical argument that the medium is the message at the heart of the book Canadian identity and how to understand Canadian media politically is the subject of a chapter on textual analysis Two extensive chapters follow on the media s influence and effects on politics In addition to standard topics on politics and the media this new edition offers much more an examination of the media on the politics of gender and aboriginal peoples the

micro politics of the media workplace and an exploration of important media related considerations Throughout reference is made to relevant and compelling issues placed within the context of media theory      **User Error** Ellen Rose,2003 User Error doesn't argue that we should simply reject computers but neither does it uncritically embrace the current state of affairs but offers other options      **Ordinary Consumption** Jukka Gronow,Alan Warde,2013-01-11 The sociology of consumption has concentrated unduly on the more spectacular and visual aspects of contemporary consumer behaviour thereby constructing an unbalanced and misleading view This collection emphasises ordinary rather than extraordinary items routine and repetitive behaviour rather than conscious decision making It studies practical contexts of use rather than decisions to purchase and analyses collective identification rather than personal identity Each essay argues one or more of these points for the most part using new empirical material from several different national contexts The topics analysed include shopping in Taiwan second home ownership in France environmental considerations concerning food choice in Denmark the take up of new domestic technologies in Finland and kitchen design in England Key concepts like tradition routine and habit are clarified and new conceptual distinctions are made with the book defending theoretical approaches deriving from Simmel Weber Durkheim and Bourdieu Ordinary Consumption promotes a distinctive approach to the understanding of the central practices of consumer society it is a book with a controversial message one which will be a source of debate about the appropriate agenda for future research      *Identity and Alterity* PEACE--Phenomenology for East-Asian Circle. Conference,2010      Understanding Media, Today Matteo Ciascellardi,Emanuela Patti,2011-12-01 Understanding Media Today McLuhan in the Era of Convergence Culture      Liquid Architecture Pierangelo Marco Scravaglieri,2023-12-22 Liquid Architecture challenges the idea of architecture as a fixed inert container and reconceptualises it as a body whose boundaries are rather blurred and ever changing This book moves away from form as the primary driver of spatial protocols and explores what the built environment might look like when viewed through the lenses of a wet ontology that is attentive to fluidity flows and territorial dynamism A reconfiguration of architectural materials and authorship is thus considered leading in turn to an exploration of the ethical dimensions of co designing with natural systems of various viscosities through liquid paradigms The book examines a set of principles for practice led discoveries that incorporate hybrid mixed media with the author's intersubjective relationship with liquid matter Drawing from qualitative based analytical investigation models the text allows comprehension of the liquid phenomena via material contextualisation of an ever becoming research setting Through a practical and theoretical engagement with the ontology of liquids the reader is exposed to a range of design led experiments and creative propositions visualisation systems construction and testing of physical models that collectively translate into a series of novel insights for architectural agendas This book will be of interest to architecture and design research students and academics because it advocates the need for a more symbiotic and resilient approach to natural systems which could benefit from the integration of regenerating material flows into our

computer screens we are all cyborgs through fantasy we can understand our involvement in virtual worlds Cyberspace is first and foremost a mental space Therefore we need to take a psychological approach to understand our experiences in it In Interface Fantasy Andr Nusselder uses the core psychoanalytic notion of fantasy to examine our relationship to computers and digital technology Lacanian psychoanalysis considers fantasy to be an indispensable screen for our interaction with the outside world Nusselder argues that at the mental level computer screens and other human computer interfaces incorporate this function of fantasy they mediate the real and the virtual Interface Fantasy illuminates our attachment to new media why we love our devices why we are fascinated by the images on their screens and how it is possible that virtual images can provide physical pleasure Nusselder puts such phenomena as avatars role playing cybersex computer psychotherapy and Internet addiction in the context of established psychoanalytic theory The virtual identities we assume in virtual worlds exemplified best by avatars consisting of both realistic and symbolic self representations illustrate the three orders that Lacan uses to analyze human reality the imaginary the symbolic and the real Nusselder analyzes our most intimate involvement with information technology the almost invisible affective aspects of technology that have the greatest impact on our lives Interface Fantasy lays the foundation for a new way of thinking that acknowledges the pivotal role of the screen in the current world of information And it gives an intelligible overview of basic Lacanian principles including fantasy language the virtual the real embodiment and enjoyment that shows their enormous relevance for understanding the current state of media technology

*Dismantlings* Matt Tierney, 2019-12-15 For the master s tools the poet Audre Lorde wrote will never dismantle the master s house *Dismantlings* is a study of literary political and philosophical critiques of the utopian claims about technology in the Long Seventies the decade and a half before 1980 Following Alice Hilton s 1963 admonition that the coming years would bring humanity to a crossroads machines for HUMAN BEINGS or human beings for THE MACHINE Matt Tierney explores wide ranging ideas from science fiction avant garde literatures feminist and anti racist activism and indigenous eco philosophy that may yet challenge machines of war control and oppression *Dismantlings* opposes the language of technological idealism with radical thought of the Long Seventies from Lorde and Hilton to Samuel R Delany and Ursula K Le Guin to Huey P Newton John Mohawk and many others This counter lexicon retrieves seven terms for the contemporary critique of technology Luddism a verbal and material combat against exploitative machines communion a kind of togetherness that stands apart from communication networks cyberculture a historical conjunction of automation with racist and militarist machines distortion a transformative mode of reading and writing revolutionary suicide a willful submission to the risk of political engagement liberation technology a synthesis of appropriate technology and liberation theology and thanatopography a mapping of planetary technological ethics after Auschwitz and Hiroshima *Dismantlings* restores revolutionary language of the radical Long Seventies for reuse in the digital present against emergent technologies of exploitation subjugation and death

*Listening Publics* Kate Lacey, 2013-05-03 In focusing on the practices politics and

ethics of listening this wide ranging book offers an important new perspective on questions of media audiences publics and citizenship Listening is central to modern communication politics and experience but is commonly overlooked and underestimated in a culture fascinated by the spectacle and the politics of voice Listening Publics restores listening to media history and to theories of the public sphere In so doing it opens up profound questions for our understanding of mediated experience public participation and civic engagement Taking a cross national and interdisciplinary approach the book explores how listening publics have been constituted in relation to successive media technologies from the invention of writing to the digital age It asks how new practices of listening associated with sound and audiovisual media transform a public world forged in the age of print Through detailed histories and sophisticated theoretical analysis Listening Publics demonstrates the embodied and critical activity of listening to be a rich concept with which to rethink the practices politics and ethics of media communication

**Mobile and Sensor-Based Technologies in Higher Education** Sözüdoğru, Oytun, Akkaya, Bülent, 2022-09-23 At all educational levels innovation is progressively becoming an intrinsic aspect of learning The proliferation of mobile devices and sensor based technologies increased the possibilities for learning and pushed it into institutions One major challenge accompanying the growth in online education is that many teacher educators find themselves under pressure and underprepared to teach online courses As online education continues to grow curriculum and training that prepares teachers for online course design and delivery are critical Mobile and Sensor Based Technologies in Higher Education explores how mobile and sensor based technologies are shaping higher education and creating a roadmap for harnessing artificial intelligence online learning distance learning and other modern technologies to aid education Covering key topics such as assessment inclusive education and social distancing this reference work is ideal for policymakers researchers scholars academicians practitioners instructors and students

**Spoken and Written Discourse in Online Interactions** Maria Grazia Sindoni, 2014-04-24 Winner of the AIA Book Prize for a research monograph in the field of English Language and Linguistics 2016 Common patterns of interactions are altered in the digital world and new patterns of communication have emerged challenging previous notions of what communication actually is in the contemporary age Online configurations of interaction such as video chats blogging and social networking practices demand profound rethinking of the categories of linguistic analysis given the blurring of traditional distinctions between oral and written discourse in digital texts This volume reconsiders underlying linguistic and semiotic frameworks of analysis of spoken and written discourse in the light of the new paradigms of online communication in keeping with a multimodal corpus linguistics theoretical framework Typical modes of online interaction encompass speech writing gesture movement gaze and social distance This is nothing new but here Sindoni asserts that all these modes are integrated in unprecedented ways enacting new interactional patterns and new systems of interpretation among web users These non verbal modes have been sidelined by mainstream linguistics whereas accounting for the complexity of new genres and making sense of their

educational impact is high on this volume's agenda Sindoni analyzes other new phenomena ranging from the intimate sphere i.e. video chats personal blogs or journals on social networking websites to the public arena i.e. global scale transmission of information and knowledge in public blogs or media sharing communities shedding light on the rapidly changing global web scenario

Image Evolution Lars C. Grabbe, Patrick Rupert-Kruse, Norbert M. Schmitz, 2019-01-23 The history of images can be described as a history of technology and mediality The development of images is deeply rooted in the potentials of media technologies and the numerous human inventions in the range of traditional craftsmanship engineering science computer science and art and design The factual embedding of images in the historical technological processes constitutes a complex structure of an autonomous image evolution that must be highlighted characterized and analyzed by the interdisciplinary academic discourses that are related to the functions and structures of visibility pictoriality and forms of multi-sensoric representations The chosen term evolution is deliberately indicating structural laws that underlie historical events These laws are intentional and logical processes of a historical and technological interdependency In this interdependency technology is evolving out of its inherent structures and additionally embedded in anthropological conditions and sociocultural dynamics In this context we should work with the concept of an image evolution
