Embodied Collective Memory Rafael F. Narváez, 2013 The human body is not a given fact it is not as Descartes believed a machine made up of flesh and bones The body is acquired achieved and learned It is thus full of mimetic and mnemonic implications The body remembers and it does so in collectively relevant ways Gestures corporeal and phonetic rhythms affective idioms and emotional styles perceptual sensorial motoric and affective schemata are all largely learned in shared social contexts These aspects of the embodied experience are often consigned to habit to bodily automatisms and to corporeal memories that reflect aspects of culture But if the body reflects certain aspects of culture that press to become

naturalized and organically attached to social actors it also resists these kinds of cultural pressures These adaptive and resistive dynamics as this book shows are not without consequences for individuals and groups These processes can result in both advantages and disadvantages for social actors They can take us toward certain futures while foreclosing others It is therefore necessary to understand how why and to what extent corporeal memories are constructed but also resisted modified or created anew
