Akademische Arbeit aus dem Jahr 2012 im Fachbereich Soziologie Allgemeines und Grundlagen Sprache Deutsch Abstract  
This paper examines different aspects of sociology and education conflict theory and stratification In the broadest perspective education refers to all efforts to impart knowledge and shape values hence it has essentially the same meaning as socialization However when sociologists speak of education they generally use a more specific meaning the deliberate process outside the family by which societies transmit knowledge values and norms to prepare young people for adult roles and to a lesser extent prepare adults for new roles This process acquires institutional status when these activities make instruction the central defining purpose are differentiated from other social realms and involve defined roles of teacher and learner Schools exemplify this type of institutionalization The central insight of the sociology of education is that schools are socially embedded institutions that are crucially shaped by their social environment and crucially shape it The field encompasses both micro and macro sociological concerns in diverse subfields such as stratification economic development socialization and the family organizations culture and the sociology of knowledge To understand modern society it is essential to understand the role of education Not only is education a primary agent of socialization and allocation modern societies have developed formidable ideologies that suggest that education should have this defining impact      **Sociology: Theories in Conflict** R. Serge Denisoff, 1971      **Using Conflict Theory** Otomar J. Bartos, Paul Wehr, 2002-07-15 Human conflict from family feuds to labor strikes to national warfare is an ever present and universal social problem and the methods to manage it a challenge for everyone from average citizens to policymakers and social theorists Using Conflict Theory will educate students about how under what conditions and why conflict erupts and how it can be managed It is a unique classroom book blending theory and practical application and the first to bridge for students the science of social theory and the art of practice      **Conflict Sociology** Randall Collins, Stephen K. *Handbook of Sociological Theory* Jonathan H. Turner, 2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn t usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory
