EXAMPLES

Sociology From Concepts To Practice:

Sociology, from Concepts to Practice Bernard S. Phillips, 1979-01-01 **Artistic Practices** Tasos Zembylas, 2014-04-03

Art matters. It affects us in our daily lives and is full of meanings that are valuable to all of us. As a catalyst for social interactions, art may either cause public conflict and create dissensions or facilitate mutual understanding and strengthen collective bonds. All of this is grounded in practices that develop and change along social interaction, cultural dynamics, as well as technological and economic lines. So how is art formed and produced? What are the relevant constraints and challenges that artists experience in the creative process? And what constitutes artistic agency? This collection of contributions from international interdisciplinary experts explores particular case studies to deeply analyse artistic practices. Comprising eleven chapters relating to different art forms, each chapter offers an original perspective conveying a comprehensive understanding of artistic practices as arrays of specific activities in contemporary art worlds. This book will be important for both researchers and practitioners in the field. It will help artists to deepen their analytical abilities, enabling them to further their own creative practice. It will allow students and researchers to gain insights into processes of artistic creation and thus into the reproduction of art as well as innovation in the arts.

Threshold Concepts on the Edge Julie A. Timmermans, Ray Land, 2019-12-30

Since the first literature about the Threshold Concepts Framework was published in 2003, a considerable body of educational research into this topic has grown internationally across a wide range of disciplines and professional fields. Successful negotiation of a threshold concept can be seen as crossing boundaries into new conceptual space or as a portal opening up new and previously inaccessible ways of thinking about something. In this unfamiliar conceptual terrain, fresh insights and perceptions come into view and access is gained to new discourses. This frequently entails encounters with troublesome knowledge, knowledge which provokes a liminal phase of transition in which new understandings must be integrated and, importantly, prior conceptions relinquished. There is often double trouble in that letting go of a prevailing familiar view frequently involves a discomfiting change in the subjectivity of the learner. We become what we know. It is a space in which the learner might become stuck. *Threshold Concepts on the Edge*, the fifth volume in a series on this subject, discusses the new directions of this research. Its six sections address issues that arise in relation to theoretical development, liminal space, ontological transformations, curriculum, interdisciplinarity, and aspects of writing across learning thresholds.

Sociological Jurisprudence Roger Cotterrell, 2017-12-06

This book presents a unified set of arguments about the nature of jurisprudence and its relation to the jurist's role. It explores contemporary challenges that create a need for social scientific perspectives in jurisprudence and shows how sociological resources can and should be used in considering juristic issues. Its overall aim is to redefine the concept of sociological jurisprudence and outline a new agenda for this. Supporting this agenda, the book elaborates a distinctive juristic perspective that recognises law's diversity of cultural meanings, its extending transnational reach, its responsibilities to reflect popular aspirations for justice and security, and its

integrative tasks as a general resource of regulation for society as a whole and for the individuals who interact under law's protection. Drawing on and extending the author's previous work, the book will be essential reading for students, researchers, and academics working in jurisprudence, law and society, socio-legal studies, sociology of law, and comparative legal studies.

Consumption Challenged Bente Halkier, 2016-05-23 In public debates, communication campaigns, and public policies, it is increasingly common to attribute to consumers and their agency an ability to help solve a broad array of societal problems. This tendency is particularly clear in the field of food consumption, owing to the fact that food is both materially and symbolically central for consumers in everyday life, as well as for large-scale institutionalized dynamics. In order to shed light on the challenges facing food consumption, this volume takes an innovative theoretical approach, presenting four empirical Danish case studies which are compared with other analyses drawn from the wider international context. *Consumption Challenged* will appeal not only to sociologists of consumption, risk, and the environment, but also to policy makers and researchers in the fields of geography, communication, media governance, and social psychology.

Socio-Informatics Volker Wulf, Volkmar Pipek, David Randall, Markus Rohde, Kjeld Schmidt, Gunnar Stevens, 2018-02-23 The book is an exploration of the theoretical, conceptual, and methodological foundations of human-centred design. Specifically, it critically examines the notion of practice and argues for an understanding of the concept which emanates from engagement with design problems rather than simply from social scientific theory. The contributors to the book, in their various ways, all subscribe to a systematic account of how practice-oriented studies can inform design. Using the perspective of grounded design, it pursues a long-term view of the design process, arguing for user engagement from the very earliest stages of design policy, including methods for understanding user practices to inform initial design policies, up to and including processes of appropriation as technologies are embedded in contexts of use. Grounded design is a perspective which also deals with the vexed problem of appropriate generalization in design studies and the kinds of cross-comparison

that can usefully be done The book contains a number of case studies which exemplify these themes some of which are rooted in the use of technology in organizational contexts others of which deal with design in contexts such as care of the elderly firefighting and multicultural education
