**China** Ye Liu,2016-10-08 This book investigates the changing opportunities in higher education for different social groups

during China's transition from the socialist regime to a market economy. The first part of the book provides a historical and comparative analysis of the development of the idea of meritocracy since its early origins in China and in more recent western thought. The second part then explores higher education reforms in China, the part played by supposedly meritocratic forms of selection and the implications of these for social mobility. Based on original empirical data, Ye Liu sheds light on the socio-economic, gender and geographical inequalities behind the meritocratic façade of the Gaokao. Liu argues that the Chinese philosophical belief in education-based meritocracy had a modern makeover in the Gaokao and that this ideology induces working class and rural students to believe in upward social mobility through higher education. When the Gaokao broke the promise of status improvement for rural students, they turned to the Chinese Communist Party and sought political connections by actively applying for its membership. This book reveals a bleak picture of visible and invisible inequality in terms of access to and participation in higher education in contemporary China. Written in an accessible style, it offers a valuable resource for researchers and non-specialist readers alike. *Educational Research, Policymaking and Practice* Martyn Hammersley, 2002-03-22 Educational Research maps the demands now being made on educational research against the background complexities of the relationship between research and practice. *Routledge Handbook of Academic Knowledge Circulation* Wiebke Keim, Leandro Rodriguez Medina, Rigas Arvanitis, Natacha Bacolla, Chandni Basu, Stéphane Dufoix, Stefan Klein, Mauricio Nieto Olarte, Barbara Riedel, Clara Ruvituso, Gernot Saalman, Tobias Schlechtriemen, Hebe Vessuri, 2023-06-30 Knowledge is a result of never-ending processes of circulation. This accessible volume is the first comprehensive multidisciplinary work to explore these processes through the perspective of scholars working outside of Anglo-American paradigms. Through a variety of literature reviews, examples of recent research and in-depth case studies, the chapters demonstrate that the analysis of knowledge circulation requires a series of ontological and epistemic commitments that impact its conceptualisation and methodologies. Bringing diverse viewpoints from across the globe and from a range of disciplines including anthropology, economics, history, political science, sociology and Science, it explores: ii spaces and actors of circulation; iii academic media and knowledge circulation; iv the political economy of academic knowledge circulation; v the geographies, geopolitics and historical legacies of the global circulation of academic knowledge; vi the relationships between academic and extra-academic knowledges; and vii methodological approaches to studying the circulation of academic knowledge. This handbook will be essential reading for academics, researchers and postgraduate researchers in the humanities and social sciences interested in the circulation of knowledge. **Creating the Ethical Academy** Tricia Bertram Gallant, 2011-09-22 In this edited volume, higher education experts and scholars tackle the challenge of understanding why ethical misconduct occurs in the academy and how we can address it. Stanford's Organization Theory Renaissance, 1970-2000 Frank Dobbin, Claudia Bird Schoonhoven, 2010-04-09 Between 1970 and 2000, Stanford University enabled and supported an interdisciplinary community of organizations training research and theory building. Hermanowicz, 2010-04-15 What can we learn when we follow people over the years and across the course of their professional lives Joseph C Hermanowicz asks this question specifically about scientists and answers it here by tracking fifty five physicists through different stages of their careers at a variety of universities across the country He explores these scientists shifting perceptions of their jobs to uncover the meanings they invest in their work when and where they find satisfaction how they succeed and fail and how the rhythms of their work change as they age His candid interviews with his subjects meanwhile shed light on the ways career goals are and are not met on the frustrations of the academic profession and on how one deals with the boredom and stagnation that can set in once one is established An in depth study of American higher education professionals eloquently told through their own words Hermanowicz s keen analysis of how institutions shape careers will appeal to anyone interested in life in academia Foundation of Education Course Code: 01 B.Ed. **Academic Life in the Measured University** Tai Peseta, Simon Barrie, Jan McLean, 2020-05-18 While a life in academia is still one bestowed with enormous privilege and opportunity on the inside its cracks and fragility have been on display for some time We see evidence of this in researchers bemoaning time spent applying for grants rather than doing research teachers frustrated at the ways student feedback data are deployed to feed judgements about them and doctoral students realising that they have little chance of securing full time academic work Yet in the public policy domain the opposite appears true academics left to their own devices in their elite ivory towers rarely ever do enough This collection addresses the fact

that academic life deserves to be rigorously researched Its emphasis on the measured university traces how academic life had ceded itself to the logics of perverse measures and raises questions about whether the contemporary university may well have become too measured to adequately counter the political times now upon us The contributors explore the ways in which measurement inhabits paradoxical positions in these spaces It sketches the contours and consequences of mismeasurement including the personal costs to academic staff It examines our desires and fumbled efforts at institutional transformation and it puts on display our own ethical conduct The collection concludes with a call to chart a course for a revitalized moral economy of academic labour This book was originally published as a special issue of Higher Education Research

Banning, 2016-11-25 Interdisciplinarity has become a buzzword in academia as research universities funnel their financial resources toward collaborations between faculty in different disciplines In theory interdisciplinary collaboration breaks down artificial divisions between different departments allowing more innovative and sophisticated research to flourish But does it actually work this way in practice Investigating Interdisciplinary Collaboration puts the common beliefs about such research to the test using empirical data gathered by scholars from the United States Canada and Great Britain The book s contributors critically interrogate the assumptions underlying the fervor for interdisciplinarity Their attentive scholarship reveals how for all its potential benefits interdisciplinary collaboration is neither immune to academia s status hierarchies

nor a simple antidote to the alleged shortcomings of disciplinary study Chapter 10 is available Open Access here <https://www.ncbi.nlm.nih.gov/books/NBK395883>

**New Frontiers in Socialization** Richard A. Settersten Jr., Timothy J Owens, 2002-06-21 *New Frontiers in Socialization*

*Academic Pathfinders* Patricia J. Gumpert, 2002-03-30 From the 1960s to the 1980s a range of academic possibilities for women developed as their career histories and intellectual biographies reveal Some women sought to generate a new knowledge specialty in their disciplines often explicitly defying admonishments that the subject matter was an oxymoron Others pursued academic paths that disregarded these new opportunities and developments Together their accounts portray how feminist scholarship emerged and was facilitated by historically specific conditions a critical mass of like minded women a national political movement an abundance of financial support for doctoral candidates a tolerance from established faculty for students to pursue the margins of disciplinary scholarship and an organizational capacity to add new academic categories for courses programs academic positions and extra departmental groups That historical era has since been supplanted by feminist infighting and backlash as well as more cost conscious academic management practices which have altered the academic landscape for knowledge creation Analyzing the accounts of academic women during this era yields a conceptual framework for understanding how new knowledge is created on multiple levels through personal reflection on life experiences disciplinary legacies local organizational contexts and wider societal expectations

functions of university and designing the future of the post massified university
