

# INDUSTRIAL SOCIETIES

- ⊗ The invention of the steam engine
- ⊗ Industrial Revolution started around 1750, first in Britain
- ⊗ Machinery with advanced sources of energy (water, steam, internal combustion engine, electricity, nuclear power, telecommunication)
- ⊗ The pace of social change became much faster with industrialism. Societies transformed more in a century than in several thousand years before.
- ⊗ Division of labor in society became very complex
- ⊗ Initially, social inequalities became greater, first within the industrial countries of the West, then, between Western and non-western societies.
- ⊗ But in the 20th century, inequality within Western societies diminished, as workers and women got rights
- ⊗ Global inequalities between Western and non-Western societies have diminished in some ways, but have not been removed.

*The Sociology of Invention* S. Colum Gilfillan, 1970      *The Sociology of Invention* S. Colum Gilfillan, 1970-01 The social factors that spur inventiveness and the social effects of inventions were treated at book length for the first time in this work originally published in 1935 The author develops his presentation on the basis of 38 explicitly stated propositions The author writes That invention is an important subject for modern mankind to understand and perhaps later improve all will agree That invention is partly caused hampered promoted steered by social factors and institutions such as wealth or the patent system and not simply by developments in the physical sciences and industrial practice will also be allowed How great is the social causation we shall discuss Likewise that inventions have wide social and not simply industrial effects has been common knowledge for nigh a century There would seem then every call for a treatise on the Sociology of Invention Yet not one book with this definitive field has been published in any language Our problem is to combine those two worlds of that which have so rarely been conjoined social science and engineering in order to produce a rather new and fertile hybrid a Sociology of Invention It is a difficult problem this getting people to study and think in an unfamiliar world and we have tried to solve it for some readers and dodge it for most      The Sociology of Invention S. Colum Gilfillan, 1935      **The Sociology of Invention** S. Colum Gilfillan, 1970 Subtitle varies slightly Includes bibliographies      **The Sociology of Invention; an Essay in the Social Causes, Ways, and Effects of Technic Invention, Especially as Demonstrated Historically [sic] in the Author's Inventing the Ship [by] S.C. Gilfillan. Supplement** S. Colum Gilfillan, 1971      **The Sociology of Invention, an Essay in the Social Causes of Technic Invention and Some of Its Social Results ; Especially as Demonstrated in the History of the Ship... [a Dissertation] by S. C. Gilfillan,...** S. Colum Gilfillan, 1935      Supplement to the Sociology of Invention S. Colum Gilfillan, 1971      **Supplement to The Sociology of Invention** S. Colum Gilfillan, 1971      New Trends in the Sociology of Invention Jacques Bergier, 1953      **The Invention of Society** Serge Moscovici, 1991-01-15 This brilliant and original book sets out to dismantle the idea that movements crises and other phenomena produced in society must be explained by exclusively social causes without recourse to psychological explanations The author argues that we should reassess the significance of psychological causes in human affairs Whilst psychological causes are undoubtedly distinct from social causes all social phenomena are events or facts brought about by human beings it is their passions which stimulate their great political religious and cultural creations He discusses the work of Durkheim Mauss Weber and Simmel and argues that only a productive interplay between psychology and sociology will do justice to the interdisciplinary character of their thought Winner of the European Amalfi Prize for Sociology The Invention of Sociology will be welcomed by students and researchers in sociology social psychology and the social sciences generally

*Conceptualizing Technological Change* Govindan Parayil, 2002 Technological change has been rightfully identified as the single most important factor for improving material well being Yet despite its centrality in our lives we seem to know very

little about technology and how it develops and changes both spatially and temporally In this original and thoughtful book Govindan Parayil draws together current scholarship from disciplines ranging from history to economics to sociology as he develops a cohesive theory of technological change Drawing on a detailed case study of the Green Revolution in Indian agriculture Parayil convincingly argues that technological change is contingent upon the social historical process of knowledge change Thus he explores the policy implications of analyzing technological change as a problem solving activity An innovative contribution to the literature on technological change this ambitious book will also be valuable for those interested in such practical applications as understanding the process of technology transfer

The Invention of Modern Science Isabelle Stengers,2000 The Invention of Modern Science proposes a fruitful way of going beyond the apparently irreconcilable positions that science is either objective or socially constructed Instead suggests Isabelle Stengers one of the most important and influential philosophers of science in Europe we might understand the tension between scientific objectivity and belief as a necessary part of science central to the practices invented and reinvented by scientists pub desc **The Nature of Technological Knowledge. Are Models of Scientific Change Relevant?** L. Laudan,1984-04-30 One of the ironies of our time is the sparsity of useful analytic tools for understanding change and development within technology itself For all the diatribes about the disastrous effects of technology on modern life for all the equally uncritical paeans to technology as the panacea for human ills the vociferous pro and anti technology movements have failed to illuminate the nature of technology On a more scholarly level in the midst of claims by Marxists and non Marxists alike about the technological underpinnings of the major social and economic changes of the last couple of centuries and despite advice given to government and industry about managing science and technology by a small army of consultants and policy analysts technology itself remains locked inside an impenetrable black box a deus ex machina to be invoked when all other explanations of puzzling social and economic pheoomena fail The discipline that has probably done most to penetrate that black box in recent years by studying the 1 internal development of technology is history Historians of technology and certain economic historians have carried out careful and detailed studies on the genesis and impact of technological innovations and the structu re of the social systems associated with those innovations Within the past few decades tentative consensus about the periodization and the major traditions within the history of technology has begun to emerge at least as far as Britain and America in the eighteenth and nineteenth century are concerned *Routledge Handbook of the Economics of Knowledge* Cristiano Antonelli,Albert Link,2014-12-05 The Routledge Handbook of the Economics of Knowledge provides a comprehensive framework to integrate the advancements over the last 20 years in the

analysis of technological knowledge as an economic good and in the static and dynamic characteristics of its generation process There is a growing consensus in the field of economics that knowledge technological knowledge in particular is one of the most relevant resources of wealth yet it is one of the most difficult and complex activities to understand or even to conceptualize The economics of knowledge is an emerging field that explores the generation exploitation and dissemination of technological knowledge Technological knowledge cannot any longer be regarded as a homogenous good that stems from standardized generation processes Quite the opposite technological knowledge appears more and more to be a basket of heterogeneous items resources and even experiences All of these sources which are both internal and external to the firm are complementary as is the interplay between a bottom up and top down generation processes In this context the interactions between the public research system private research laboratories and various networks of learning processes within and among firms play a major role in the creation of technological knowledge In this Handbook special attention is given to the relationship among technological knowledge and both upstream scientific knowledge and related downstream resources By addressing the antecedents and consequences of technological knowledge from both an upstream and downstream perspective this Handbook will become an indispensable tool for scholars and practitioners aiming to master the generation and the use of technological knowledge
