Humphreys,Sabino Ayestaran,Andrew McCosh,Bill Mayon-White,2013-11-11 The main purpose of this paper is to contribute to the discussion about the design of computer and communication systems that can aid the management process 1 1 Historical Overview We propose that Decision Support System can be considered as a design conception conceived within the computer industry to facilitate the use of computer technology in organisations Keen 1991 This framework built during the late 1970s offers computer and communication technology as support to the decision process which constitutes in this view the core of the management process The DSS framework offers the following capabilities Access ease of use wide variety of data analysis and modelling capacity Technological software gel eration tools Development modes interactive and evolutionary Within this perspective computer and communication technologies are seen as an amplification of the human data processing capabilities which limit the decision process Thus the human being is understood metaphorically as a data processing machine Mental processes are associated with the manipulation of symbols aOO human communication to signal transmission **Effective Software Project Management** Robert K. Wysocki,2010-09-29 Why another book on software project management For some time the fields of project management computer science and software development have been growing rapidly and concurrently Effective support for the enterprise demands the merging of these efforts into a coordinated discipline one that incorporates best practices from both systems development and project management life cycles Robert K Wysocki creates that discipline in this book a ready reference for professionals and consultants as well as a textbook for students of computer information systems and project management By their very nature software projects defy a one size fits all approach In these pages you will learn to apply best practice principles while maintaining the flexibility that s essential for successful software development Learn how to make the planning process fit the need Understand how and why software development must be planned on a certainty to uncertainty continuum Categorize your projects on a four quadrant model Learn when to use each of the five SDPM strategies Linear Incremental Iterative Adaptive and Extreme Explore the benefits of each strategic model and what types of projects it supports best Recognize the activities that go into the Scoping Planning Launching Monitoring Controlling and Closing phases of each strategy Apply this knowledge to the specific projects you manage Get a clear picture of where you are and how to get where you want to go Innovative Techniques in Instruction Technology, E-learning, E-assessment and Education Magued Iskander,2008-08-20 Innovative Techniques in Instruction Technology E Learning E Assessment and Education is a collection of world class paper articles addressing the following topics 1 E Learning including development of courses and systems for technical and liberal studies programs online laboratories intelligent testing using fuzzy logic evaluation of on line courses in comparison to traditional courses mediation in virtual environments and methods for speaker verification 2 Instruction Technology including internet textbooks pedagogy oriented markup languages graphic design possibilities open source classroom management software automatic email response systems tablet pcs personalization using web mining technology intelligent digital chalkboards virtual room
