Soil Remediation For The Petroleum Extraction Indu:

Soil Remediation for the Petroleum Extraction Industry L. E. Deuel, George H. Holliday, 1994 **Petroleum Contaminated Soils** Paul T. Kostecki, 1988-11-30 These three volumes provide valuable information to help bring rational and scientifically feasible solutions to petroleum contaminated soils State of the art information on both technical and regulatory issues is covered including environmental fate health effects risk assessment and remedial alternatives They show why petroleum contaminated soils are a problem and propose solutions for that problem These books are an excellent reference for regulatory personnel and environmental consultants at all levels *Petroleum Contaminated Soils, Volume I* Paul T. Kostecki, 2021-05-31 These three volumes provide valuable information to help bring rational and scientifically feasible solutions to petroleum contaminated soils State of the art information on both technical and regulatory issues is covered including environmental fate health effects risk assessment and remedial alternatives They show why petroleum contaminated soils are a problem and propose solutions for that problem These books are an excellent reference for regulatory personnel and environmental consultants at all levels **Pollution Abstracts** ,1995 Indexes material from conference proceedings and hard to find documents in addition to journal articles Over 1 000 journals are indexed and literature published from 1981 to the present is covered Topics in pollution and its management are extensively covered from the standpoints of atmosphere emissions mathematical models effects on people and animals and environmental action Major areas of coverage include air pollution marine pollution freshwater pollution sewage and wastewater treatment waste management land pollution toxicology and health noise and radiation **Basic Concepts in Environmental Biotechnology** Neetu Sharma, Abhinashi Singh Sodhi, Navneet Batra, 2021-09-08 The book includes current and emerging concepts in the areas of environmental biotechnology such as pollution sources control and measurement solid waste management bioremediation biofuels biosensors bioleaching conservation biotechnology and more The book also includes recent innovations made in this field and incorporates case studies to help in understanding the concepts This book applies principles from multidisciplinary sciences of environmental engineering metabolic engineering rDNA technology and omics to study the role of microbes and plants in tackling environmental issues It also includes content related to risk assessment and environmental management systems Each chapter provides problems and solutions of different topics with diagrammatic illustrations and tables for students researchers and other professionals in environmental biotechnology Explores cutting edge technologies including nanotechnology based bioremediation value added products from waste and emerging techniques related to environmental risk assessment and monitoring Reviews the current methods being applied in the environment field for pollution control waste management biodegradation of organic and inorganic pollutants and so on Provides in depth knowledge of the latest advancements in the field of environmental biotechnology such as bioleaching biomining and advances in biotechnology based conservation of biodiversity Introduces undergraduate and post graduate

students to basic concepts of environmental biotechnology and allied fields Discusses different products such as biofuels biopolymers and biosensors that are being produced using biotechnological methods thus contributing towards the goal of sustainable development Dr Neetu Sharma is Assistant Professor in the Department of Biotechnology GGDSD College Chandigarh India The main thrust of her research centers on biotechnology bioremediation and nanotechnology Abhinashi Singh Sodhi is Assistant Professor in the Department of Biotechnology GGDSD College Chandigarh India His current research focuses on waste reduction valorization and bioproduct formation Dr Navneet Batra is Associate Professor and Head Department of Biotechnology GGDSD College Chandigarh India He has extensive academic and research experience of over 20 years with specialization in biotechnology and biochemical engineering

Omics Insights in Environmental Bioremediation Vineet Kumar,Indu Shekhar Thakur,2022-09-26 Environmental pollution emanating from rapid industrialization population growth and urbanization has been considered a major problem in recent years that affects biodiversity ecosystems and human health by contaminating soil and water This book brings out a comprehensive collection of information on valuable insights into different cutting edge omics technologies such as metagenomics metatranscriptomics metaproteomics and metabolomics along with advanced next generation sequencing technologies as well as bioinformatic tools which led to a better understanding of microbial communities and their adaptability to a wide range of contaminants and underlying their mechanisms in bioremediation and biodegradation of environmental pollutants In addition this edited volume provides critical insight into of potent microbial communities endowed with unique functional attributes through their unique metabolism catalyzed by signature enzymes and degradation pathways Step by step descriptions are provided of various microbial metabolic pathways of degradation and biotransformation of environmental contaminants by numerous illustrations which make the information easier to understand for the readers Each chapter is devoted to selected examples of microbial bioremediation supported by tables and an extensive list of references for readers interested in learning further details about the subject matter This book is of interest to teachers researchers to professionals policymakers stockholders practitioners environmental engineers soil scientists and policymakers In addition the book serves as additional comprehensive material for undergraduate graduate and doctoral students who require a working knowledge and knowhow of Omics involved in and required for environmental remediation of legacy and emerging contaminants will also find this to be a useful read
