Drought and the Human Story R.L. Heathcote,2016-05-13 Drought has been a long companion in the human story Mythologised as the devastating Bull of Heaven in one of the earliest heroic legends to come out of Mesopotamia drought has continued to wreak havoc upon societies in many cases playing a significant role in their final demise For societies in the 21st Century drought hovers on all horizons the ultimate drought proofing of society long sought remains elusive This study of the human conceptualization of drought in a global setting examines the historical record from early human society through to present day concerns to explore how and why attitudes to drought have changed and why the mitigation of its impacts has become more difficult To offer a more lasting strategy for protection against drought the author argues that physical scientists need to combine their skills in understanding global ecology and their technological expertise with the social scientists awareness of the socio economic political and cultural contexts in which modern societies operate Both will have to ensure that their cooperative strategies for drought management will be understood and supported by the public If this cooperation can be achieved the future rampages of the Bull of Heaven may be contained *Hints from the Dawning; Or, The Creation Story Considered Under the Laws of Light and Motion ...* Edward Dingle,1868 *The Story of Gaia* Jude Currivan,2022-11-01 Explores how the Universe our planet ourselves and everything in existence has inherent meaning and evolutionary purpose 2023 Nautilus Gold Award Examines our emergence as self aware members of a Universe that is itself a unified and innately sentient entity that exists TO evolve Shares leading edge scientific breakthroughs and shows how they support traditional visions of Earth as a living being Gaia Rewrites evolution as not driven by random occurrences and mutations but by intelligently informed and meaningful information flows and processes Exploring our emergence as self aware members of a planetary home and entire Universe that is a unified and innately sentient entity Jude Currivan Ph D shows that mind and consciousness are not what we possess but what we and the whole world fundamentally are She reveals our Universe as a great thought of cosmic mind manifesting as a cosmic hologram of meaningful in formation that vitally exists to evolve Sharing scientific breakthroughs the author details the 13 8 billion year story of our Universe and Gaia where

everything in existence has inherent meaning and evolutionary purpose Showing how the Universe was born not in an implicitly chaotic big bang but as the first moment of a fine tuned and ongoing big breath she shares the latest evidence for the innate sentience that has guided our universal journey from simplicity to ever greater complexity diversity and self awareness from protons to planets plants and people She explains how evolution is not driven by random occurrences and mutations but by profoundly resonant and harmonic interplays of forces and influences each intelligently informed and guided In Gaia the Universe s evolutionary impulse is embodied in collaborative relationships and dynamic co evolutionary partnerships on a planetary scale and as a wholistic gaiasphere She reveals how the conscious evolution of humanity is an integral part of Gaia s own evolutionary progress and purpose By perceiving and experiencing our planet as a sentient being and ourselves as Gaians we open ourselves to a deeply ecological evolutionary and above all hopeful worldview

The Story of Heavens Ball,1886 **The Story of the Heavens** Robert Stawell Ball,1890 **Time, Space, Stars And Man: The Story Of The Big Bang (2nd Edition)** Michael Mark Woolfson,2012-11-29 The three greatest scientific mysteries which remain poorly understood are the origin of the universe the origin of life and the development of consciousness This book describes the processes preceding the Big Bang the creation of matter the concentration of that matter into stars and planets the development of simple life forms and the theory of evolution that has given higher life forms including mankind There are many popular and excellent science books that present various aspects of science However this book follows a narrow scientific pathway from the Big Bang to mankind and depicts the causal relationship between each step and the next The science covered will be enough to satisfy most readers Many important areas of science are dealt with and these include cosmology particle physics atomic physics galaxy and star formation planet formation and aspects of evolution The necessary science is described in a narrative form that general interest readers should understand without the use of equations or formulae This 2nd edition includes several updates on the subjects that form the pillars of this book They are cosmology and astronomy the features and formation of the solar system the origin of life and genetics and evolution This book will appeal to readers with an interest in biology and those curious about the origins of the universe

Young Peoples Story of the Creation Balbir Sandhu,2019-08-23 This book is an inspirational science book with biblical content for both young adults and mature readers who want an insight into the general background on the science of creation of the planets and specifically of planet Earth and the life on it Starting with a brief discussion of the visible universe the galaxies including our own Milky Way galaxy of which our Sun is one of the stars two full chapters are devoted to our solar system the Sun and the nine planets Our knowledge of each planet as obtained from American and Russian space probes is presented in detail ruling out the possibility of life anywhere in the vast expanse of the universe except on the planet Earth Then two full chapters is presented on the detailed discussion of all physical features of our own spaceship Mother Earth the home of presently over seven billion children of Adam and Eve which had been the abode of our long gone ancestors for millions of years Various

theories on the formation of Earth and the planets are presented Most importantly about half of the book is devoted to the science of life on Earth including various theories about the origin of life Finally a great deal of discussion is devoted to Darwin s theory of evolution 1859 which had been proven to be speculative and erroneous by many scientists a conclusion verified by this writer **Spacelab, an International Success Story** Douglas R. Lord,1987 This volume presents a history of the Spacelab program which was the first time that the United States space program worked with a foreign agency to design and develop a major element of a manned space vehicle **Daytime Star, the Story of Our Sun** Simon Mitton,1983
