Soldiers and Students Rob Kroes,2023-08-18 Soldiers and Students 1975 adopts an original approach to the confrontation of deprived and possessing parties under conditions of scarcity With reference to the course of conflict the actions of the competing parties are shown to be interlinked yet the difference between their strategies are clearly defined Right wing radicalism is treated through a study of military intervention in domestic politics left wing radicalism through analysis of student radicalism The case studies are centred on recent Dutch history but the theoretical perspective underlying the argument is essentially comparative Thus Dutch military responses to the decolonisation of Indonesia serve to illustrate the strategies of a military apparatus on the brink of politicisation radicalism among Dutch students in the sixties offers the empirical reference for the analysis of left wing radicalism

European Military Culture and Security Governance

Tamir Libel,2016-03-17 This book offers the first systematic comparative analysis of military education and training in Europe within the context of the post Cold War security environment Based on an analysis of military education institutions in the UK Germany Finland Romania and the Baltic States this book demonstrates that the convergence of European military cultures since the end of the Cold War is linked to changes in military education The process of convergence originates at least in part from the full or partial adoption of a new concept by post commissioning professional military education institutions the National Defence University Officers are now educated alongside civilians and public servants wherein they enjoy a socialization experience that is markedly different from that of previous generations of European officers and is increasingly similar across national borders In addition this book argues that with the control over the curricula and graduation criteria increasingly set by civilian higher education authorities the European armed forces while continuing to exist and hold significant although declining capabilities stand to lose their status as a profession in the traditional sense This book will be of much interest to students of military European security policy European politics and IR in general

Democratic Civil-military Relations Sabine Mannitz,2012 This book examines the ways in which European democracies including former communist states are dealing with the new demands placed on their security policies since the cold war by transforming their military structures and the effects this is having on the conceptualisation of soldiering In the new security environment democratic states have called upon their armed forces increasingly to fulfil unconventional tasks partly civilian partly humanitarian and partly military in most complex multi national missions Not only have military structures been transformed to make them fit for these new types of deployments but the new mission types highlight the necessity for democracies to come to terms with a new image and ethos of soldiering in defence of a transnational value community Combining a qualitative comparison of twelve countries with an interdisciplinary methodology this edited volume argues that the ongoing transformations of international politics make it necessary for democracies to address both internal and external factors as they shape their own civil military relations The issues discussed in this work are informed by Democratic Peace theory which makes it possible to investigate relations within the state at the same time as analysing the international dimension This approach gives the book a systematic theoretical framework which distinguishes it from the majority of existing literature on this subject This book will be of much interest to students of civil military relations European politics democratisation and post communist transitions and IR in general

Individual and Organizational Vulnerability and Resilience Factors in the COVID-19 Pandemic Barbara Hildegard Juen,Eva-Maria Kern,Sigridur Thormar,2023-10-23 Vulnerability and resilience are concepts that have long been treated as individual and contradicting topics In recent times we have seen that vulnerabilities and resilience can go hand in hand and that vulnerabilities cannot be conceptualized only in simple terms because intersectionality must be considered as well as social organizational and systemic aspects and processes One example is that women are more vulnerable higher values in nearly all stress related

measures in the COVID 19 pandemic This finding has to be analyzed from an intersectional perspective because socio economic factors cultural factors exposure to COVID 19 and the type of occupation e g healthcare sector frontline workers play an important role in how vulnerable or resilient women can be in a given society The large number of studies on COVID 19 vulnerabilities makes it necessary to take a closer look at the resilience factors that often go hand in hand with potential vulnerabilities As we see in the literature about pandemics in general and COVID 19 there are some individual organizational and systemic vulnerabilities that can be found in all pandemics From that we can assume that there will be resilience factors within the same concepts that may buffer vulnerabilities

School Life ,1919 The Body and Military Masculinity in Late Qing and Early Republican China Nicolas Schillinger,2016-12-12 In 1894 1895 after suffering defeat against Japan in a war primarily fought over the control of Korea the Qing government initiated fundamental military reforms and established New Armies modeled after the German and Japanese military Besides reorganizing the structure of the army and improving military training the goal was to overcome the alleged physical weakness and lack of martial spirit attributed to Chinese soldiers in particular and to Chinese men in general Intellectuals government officials and military circles criticized the pacifist and civil orientation of Chinese culture which had resulted in a negative attitude towards its armed forces and martial values throughout society and a lack of interest in martial deeds glory on the battlefield and military achievements among men The book examines the cultivation of new soldiers officers and civilians through new techniques intended to discipline their bodies and reconfigure their identities as military men and citizens The book shows how the establishment of German style New Armies in China between 1895 and 1916 led to the re creation of a militarized version of masculinity that stressed physical strength discipline professionalism martial spirit and Western military appearance and conduct Although the military reforms did not prevent the downfall of the Qing Dynasty or provide stable military clout to subsequent regimes they left a lasting legacy by reconfiguring Chinese military culture and re creating military masculinity and the image of men in China

Beyond Nationalism Istvan Deak,1990-05-24 In the last seventy years of its long and distinguished existence the Habsburg monarchy was plagued by the forces of rising nationalism Still it preserved domestic peace and provided the conditions for social economic and cultural progress in a vast area inhabited by eleven major nationalities and almost as many confessional groups This study investigates the social origin education training code of honor lifestyle and political role of the Habsburg officers Simultaneously conservative and liberal the officer corps originally composed mainly of noblemen willingly coopted thousands of commoners among them an extraordinary number of Jews Even during World War I the army and its officers endured surviving the dissolution of the state in October 1918 if only by a few days The end of the multinational Habsburg army also marked the end of confessional and ethnic tolerance in Central and East Central Europe
