Women and the Conquest of California, 1542-1840 Virginia M. Bouvier, 2004-08 Studies of the Spanish conquest in the Americas traditionally have explained European Indian encounters in terms of such factors as geography timing and the charisma of individual conquistadores Yet by reconsidering this history from the perspective of gender roles and relations we see that gender ideology was a key ingredient in the glue that held the conquest together and in turn shaped indigenous behavior toward the conquerors This book tells the hidden story of women during the missionization of California It shows what it was like for women to live and work on that frontier and how race religion age and ethnicity shaped female experiences It explores the suppression of women's experiences and cultural resistance to domination and reveals the many codes of silence regarding the use of force at the missions the treatment of women indigenous ceremonies sexuality and dreams Virginia Bouvier has combed a vast array of sources including mission records journals of explorers and missionaries novels of chivalry and oral histories and has

discovered that female participation in the colonization of California was greater and earlier than most historians have recognized Viewing the conquest through the prism of gender Bouvier gives new meaning to the settling of new lands and attempts to convert indigenous peoples By analyzing the participation of women both Hispanic and Indian in the maintenance of or resistance to the mission system Bouvier restores them to the narrative of the conquest colonization and evangelization of California And by bringing these voices into the chorus of history she creates new harmonies and dissonances that alter and enhance our understanding of both the experience and meaning of conquest *California and Its Missions: Upper California* Bryan James Clinch,1904

Colonial Rosary Alison Lake,2006-06-12 California would be a different place today without the imprint of Spanish culture and the legacy of Indian civilization The colonial Spanish missions that dot the coast and foothills between Sonoma and San Diego are relics of a past that transformed California s landscape and its people In a spare and accessible style Colonial Rosary looks at the complexity of California s Indian civilization and the social effects of missionary control While oppressive institutions lasted in California for almost eighty years under the tight reins of royal Spain the Catholic Church and the government of Mexico letters and government documents reveal the missionaries genuine concern for the Indian communities they oversaw for their health spiritual upbringing and material needs With its balanced attention to the variety of sources on the mission period Colonial Rosary illuminates ongoing debates over the role of the Franciscan missions in the settlement of California By sharing the missions stories of tragedy and triumph author Alison Lake underlines the importance of preserving these vestiges of California s prestatehood period An illustrated tour of the missions as well as a sensitive record of their impact on California history and culture Colonial Rosary brings the story of the Spanish missions of California alive

Saints and Citizens Lisbeth Haas,2014 Saints and Citizens is a bold new excavation of the history of Indigenous people in California in the late eighteenth and nineteenth centuries showing how the missions became sites of their authority memory and identity Shining a forensic eye on colonial encounters in Chumash Luise o and Yokuts territories Lisbeth Haas depicts how native painters incorporated their cultural iconography in mission painting and how leaders harnessed new knowledge for control in other ways Through her portrayal of highly varied societies she explores the politics of Indigenous citizenship in the independent Mexican nation through events such as the Chumash War of 1824 native emancipation after 1826 and the political pursuit of Indigenous rights and land through 1848

Private Women, Public Lives Bárbara O. Reyes,2010-01-01 Through the lives and works of three women in colonial California B rbara O Reyes examines frontier mission social spaces and their relationship to the creation of gendered colonial relations in the Californias She explores the function of missions and missionaries in establishing hierarchies of power and in defining gendered spaces and roles and looks at the ways that women challenged and attempted to modify the construction of those hierarchies roles and spaces Reyes studies the criminal inquiry and depositions of Barbara Gandiaga an Indian woman charged with conspiracy to murder two priests at her mission the divorce petition of Eulalia Callis the first lady of colonial California who

petitioned for divorce from her adulterous governor husband and the testimonio of Eulalia Perez the head housekeeper at Mission San Gabriel who acquired a position of significant authority and responsibility but whose work has not been properly recognized These three women's voices seem to reach across time and place calling for additional more complex analysis and questions Could women have agency in the colonial Californias Did the social structures or colonial processes in place in the frontier setting of New Spain confine or limit them in particular gendered ways And were gender dynamics in colonial California explicitly rigid as a result of the imperatives of the goals of colonization

Jaffary, 2016-12-05 When Europe introduced mechanisms to control New World territories resources and populations women whether African indigenous mixed race or European responded and participated in multiple ways By adopting a comprehensive view of female agency the essays in this collection reveal the varied implications of women's experiences in colonialism in North and South America Although the Spanish American context receives particular attention here the volume contrasts the context of both colonial Mexico and Peru to every other major geographic region that became a focus of European imperialism in the early modern period the Caribbean Brazil English America and New France The chapters provide a coherent perspective on the comparative history of European colonialism in the Americas through their united treatment of four central themes the gendered implications of life on colonial frontiers non-European women's relationships to Christian institutions the implications of race mixing and social networks established by women of various ethnicities in the colonial context This volume adds a new dimension to current
