Solidarity The Analysis Of A Social Movement Poland 1980 1981:

Solidarity Alain Touraine, François Dubet, Michel Wieviorka, Jan Strzelecki, 1983-06-16 This 1983 book records a fascinating analysis of the Solidarity movement in Poland Alain Touraine here proposes an understanding of the place of social movements in contemporary society and a fresh means of analysing them through sociological intervention In 1981 he and a team of researchers applied these research methods to the Solidarity movements Groups of Solidarity activists were involved in a discourse over the nature and aims of their political and economic struggle What emerges is a record of exceptional value in understanding the movement which transformed Polish society placed firmly in the terms of the Solidarity activists own understanding of their role but equally relating this role to a broad analysis of the social structures of eastern Europe This reflection on forty years of Communist regimes in Europe will appeal to a wide readership interested in Solidarity and Poland **Solidarity**, 1983 *Casebook on Insurgency and Revolutionary Warfare*, 2012 **The**

democracies is the subject of intense debate and public concern Despite predictions that working hours would fall and leisure time would rise as society progressed the opposite has in fact occurred This new book contains a twofold investigation into the end of work with theoretical and policy angles contributing to the growing research field on the boundaries of economics and sociology **For Durkheim** Edward A. Tiryakian, 2016-12-05 For Durkheim is a timely and original contribution to the debate about Durkheim at a time when his concerns on ethics morality and civil religion have much relevance for our own troubled and divided society It includes two new essays from Edward A Tiryakian s collection on the Danish Muhammad cartoons and September 11th providing contemporary relevance to the debate and an analytical and interpretive introduction indicating the ongoing importance of Durkheim within sociology This indispensable volume for all serious Durkheim scholars includes English translations of papers previously published in French for the first time and will be of interest to sociologists anthropologists social historians and those interested in critical questions of modernity **Centre-Right Parties in**

Post-Communist East-Central Europe Seán Hanley, Aleks Szczerbiak, 2020-09-10 This is the first book to cover the centre right in post communist Eastern Europe It makes a vital contribution to the broader research agenda on the Central and East European centre right by focusing on one specific question why strong and cohesive centre right formations have developed in some post communist states but not others It also delves into the attempts to develop centre right parties after 1989 in four nations the Czech Republic Hungary Poland and Slovakia The authors of these fresh case studies use a common analytical framework to analyse and provide fascinating insights into the varying levels of cohesion in centre right parties

The Academic System in American Society Alain Touraine, 2017-11-30 Although the period of student protests of the 1960s and 1970s has long passed Alain Touraine argues in this wide ranging and vigorous essay that the period's problems remain with us Higher degrees have become less and less valuable on the labor market and the demand for academic reform has become more intense Community colleges still try to provide equal educational opportunities for the poor and the minorities without much success And the university has not yet resolved the conflict between being the home of impartial inquiry and research and serving constituent interests Touraine views American higher education as a system within a definite though changing social context He compares U S student movements with those of other countries He is skeptical about the way Americans view the relationships between the university and what he regards as the ruling forces of the society between knowledge and power between production and education He offers no facile solutions but he presents an exciting nontraditional analysis of the social and political forces that have shaped the modern history of higher education In the new introduction Clark Kerr contrasts his own views as an American observer to those of Touraine as a French intellectual He asserts that the family not higher education is the most important school in the process of reproducing society Kerr places more emphasis than does Touraine on the labor market on the production functions training of skills and advancing technology of the vast nonelite segments of American higher education on the long term impacts of science in changing society and on scholarly criticism in affecting transformations and places less emphasis on sporadic political protests by faculty and students He agrees with Touraine however in his two great themes 1 that you cannot understand the academic system unless you first understand society and 2 that the rise of the university must be understood to understand modern society where knowledge is power This volume will be important to all those interested in higher education whether as participants or observers

the need to introduce an alternative ethical model that aims to reconstruct ethnic states in universal civic terms
