Solo The Story Of An African Wild Dog:

Solo Hugo van Lawick,1973 **Solo: the Story of an African Wild Dog** Hugo van Lawick,1974 Jane Goodall Dale Peterson,2008 Peterson shows clearly and convincingly how truly remarkable Goodall s accomplishments were and how unlikely it is that anyone else could have duplicated them This biography details how Goodall helped set radically new standards and a new intellectual style in the study of animal behavior **Solo** Hugo van Lawick,1973 **The African Wild Dog** Joshua Ross Ginsberg,David Whyte Macdonald,IUCN/SSC Candid Specialist Group,1997 Over the last 30 years the African wild dog population has declined dramatically Dogs have disappeared from 25 of the 39 countries where they were previously found and only 6 populations are believed to number more than 100 Today it is believed that only between 3 000 5 500 dogs remain in 600 1 000 packs with most to be found in eastern and southern Africa The dramatic reduction in their population is attributed to a number of factors including human population growth and activities deterioration of habitat and contact with domestic dogs and their diseases This Action Plan explores some of the reasons behind their disappearance and provides a number of proposed solutions split into 3 priority areas ranging from habitat management and conservation to monitoring domestic dogs The Black-Tailed Prairie Dog John L. Hoogland,1995-04 In The Black Tailed Prairie Dog John L. Hoogland draws on sixteen years of research at Wind Cave National Park South Dakota in the United States to provide this account of prairie dog social behavior Through comparisons with more than 300 other animal species he offers new insights into basic theory in behavioral ecology and sociobiology Hoogland documents interactions within and among families of prairie dogs to examine the advantages and disadvantages of coloniality By addressing such topics as male and female reproductive success inbreeding kin recognition and infanticide Hoogland offers a broad view of conflict and cooperation Among his surprising findings is that prairie dog females sometimes suckle and at other times kill the offspring of close kin Enhanced by more than 100 photographs this book illuminates the social organization of a burrowing mammal and raises fundamental questions about current theory As the most detailed long term study of any social rodent The Black Tailed Prairie Dog will interest not only mammalogists and other vertebrate biologists but also students of behavioral and evolutionary ecology **The Woman That Never Evolved** Sarah Blaffer Hrdy,1999-12-20 What does it mean to be female Sarah Blaffer Hrdy a sociobiologist and a feminist believes that evolutionary biology can provide some surprising answers Surprising to those feminists who mistakenly think that biology can only work against women And surprising to those biologists who incorrectly believe that natural selection operates only on males In The Woman That Never Evolved we are introduced to our nearest female relatives competitive independent sexually assertive primates who have every bit as much at stake in the evolutionary game as their male counterparts do These females compete among themselves for rank and resources but will bond together for mutual defense They risk their lives to protect their young yet consort with the very male who murdered their offspring when successful reproduction depends upon it They tolerate other breeding females if

food is plentiful but chase them away when monogamy is the optimal strategy When promiscuity is an advantage female primates like their human cousins exhibit a sexual appetite that ensures a range of breeding partners From case after case we are led to the conclusion that the sexually passive noncompetitive all nurturing woman of prevailing myth never could have evolved within the primate order Yet males are almost universally dominant over females in primate species and Homo sapiens is no exception As we see from this book women are in some ways the most oppressed of all female primates Sarah Blaffer Hrdy is convinced that to redress sexual inequality in human societies we must first understand its evolutionary origins We cannot travel back in time to meet our own remote ancestors but we can study those surrogates we have the other living primates If women and not biology are to control their own destiny they must understand the past and as this book shows us the biological legacy they have inherited

The Biology of African Savannahs Bryan Shorrocks, 2007-08-30 Savannah habitats comprise an ecologically important but ultimately fragile ecosystem They constitute one of the largest biomes on Earth covering about twenty percent of the land surface and can be simply described as tropical and subtropical grasslands with scattered bushes and trees Most savannahs occur in Africa with a smaller amount in South America India and Australia which is the region that this book concentrates on Savannahs form a rich mosaic of diverse ecosystems and The Biology of African Savannahs offers a concise but comprehensive introduction to their ecology It describes the major plants grasses and trees such as Acacia and animals mainly large mammals that live in this habitat and examines the biological and ecological factors that influence their population size interactions such as predation and community composition Conservation issues such as climate change hunting and conflict between wildlife and domestic animals are also discussed This accessible text is suitable for both senior undergraduate and graduate students taking courses in savannah and tropical ecology as part of a wider ecology and or conservation biology degree programme It will also be of relevance and use to the many professional ecologists and conservation practitioners requiring a concise but authoritative overview of the topic

Beyond Innocence Jane Goodall, 2002 The second volume of Goodall's autobiography in letters this book covers her life after the publication of In the Shadow of the Man the book that made her famous photos *Infanticide by Males and Its Implications* Carel van Schaik, Charles H. Janson, 2000-11-02 Analysis of impact of infanticide on social organization and reproductive behavior in primates including humans
