Situated Literacies:

Situated Literacies David Barton, Mary Hamilton, Roz Ivanic, 2005-08-04 *Situated Literacies* is a rich and varied collection of key writings from leading international scholars in the field of literacy. Each contribution, written in a clear accessible style, makes the link between literacies in specific contexts and broader social practices. Detailed ethnographic studies of a wide variety of specific situations, all involving real texts and lived practices, are balanced with general claims about the nature of literacy. Contributors address a coherent set of issues: the visual and material aspects of literacy; concepts of time and space in relation to literacy; the functions of literacies in shaping and sustaining identities in communities of practice; the relationship between texts and the practices associated with their use; the role of discourse analysis in literacy studies. These studies, along with a foreword by Denny Taylor, make a timely and important contribution to literacy theory and suggest directions for the further development of the field. *Situated Literacies* is essential reading for anyone involved in literary education.

Languages and Literacies as Mobile and Placed Resources Sue Nichols, Collette Snowden, 2016-10-04 *Languages and Literacies as Mobile and Placed Resources* explores how languages and literacies are implicated in the complex relationship between place and mobility. It is a book that represents the next wave in literacy studies in which theories of mobility, networking and globalisation have emerged to account for the dynamic landscape of globally circulating communication resources. Authors in this volume take up a more complex way of thinking about resources, applying it to consider languages and literacies as assemblages or as parts of assemblages that are involved in learning, teaching and meaning making. The book addresses forms of text and mobility that arise in contexts outside of formal education, including marketing, charity, journalism, community organisation and parenting. It also addresses school contexts and higher education settings. Key topics explored include: Consequences of workplace confinement; Literacies as placed resources in the context of rural communities; Literacy sustainability and landscapes for learning; Documenting networked knowledge on tablets; Mobilising literacy policy through resources; Global Englishes as placed resources; Languages as contextualised resources; Shaping a digital academic writing resource in a transcultural space. With an international range of carefully chosen contributors, this book is a must-read text for all academics interested in semiotics and literacy studies.

Literacy Research for Political Action and Social Change Mollie V. Blackburn, Caroline T. Clark, 2007 This book and its contributors, all of whom view literacy research as explicitly political and potentially transformative, provide images and approaches that show how work with the local can and must be connected to global issues in order to effect political action. Researchers and educators are urged to take activist stances that directly affect and address the needs of all people across lines of race, class, ethnicity, sexuality and gender. The book is organized into three parts, each focusing on different aspects of literacy research for political action. These include theoretical considerations and methodological approaches that support this work; a reconsideration of the roles of participants as collaborators in this kind of literacy research; and finally, examples of projects.

specifically aimed at addressing global issues through local research for political action **Literacy in Practice** Patrick Thomas, Pamela Takayoshi, 2015-11-19 The rise of New Literacy Studies and the shift from studying reading and writing as a technical process to examining situated literacies what people do with literacy in particular social situations has focused attention toward understanding the connections between reading and writing practices and the broader social goals and cultural practices these literacy practices help to shape This collection brings together situated research studies of literacy across a range of specific contexts covering everyday educational and workplace domains Its contribution is to provide through an empirical framework a larger cumulative understanding of literacy across diverse contexts

Zhengpeng Luo, 2025-11-14 This book examines language and communication in a novel area of digital health Situating itself within the sociocultural paradigm of literacy research the book proposes a discourse oriented approach to genetic literacy and applies it to the study of public engagement with direct to consumer DTC genetic testing an emergent biotechnology operating at the intersection of personal genomics consumer culture and online health The author draws on a rich dataset
