The eye is a complex organ that allows us to see. It consists of several parts, including the cornea, iris, lens, and retina. The cornea is the clear, outer layer of the eye. The iris is the colored part of the eye. The lens is a transparent, biconvex structure that focuses light on the retina. The retina is the light-sensitive layer at the back of the eye.

The eye is also equipped with muscles that allow it to move and focus. The ciliary muscles are responsible for changing the shape of the lens to focus on objects at different distances. The extraocular muscles are responsible for moving the eye in different directions.
