Contemporary Trauma Narratives Jean-Michel Ganteau, Susana Onega, 2014-06-27 This book provides a comprehensive compilation of essays on the relationship between formal experimentation and ethics in a number of generically hybrid or liminal narratives dealing with individual and collective traumas running the spectrum from the testimonial novel and the fictional autobiography to the fake memoir written by a variety of famous more neglected contemporary British Irish US Canadian and German writers Building on the psychological insights and theorizing of the

fathers of trauma studies Janet Freud Ferenczi and of contemporary trauma critics and theorists the articles examine the narrative strategies structural experimentations and hybridizations of forms paying special attention to the way in which the texts fight the unrepresentability of trauma by performing rather than representing it The ethicality or unethicity involved in this endeavor is assessed from the combined perspectives of the non foundational non cognitive discursive ethics of alterity inspired by Emmanuel Levinas and the ethics of vulnerability This approach makes Contemporary Trauma Narratives an excellent resource for scholars of contemporary literature trauma studies and literary theory

Diseases and Disorders in Contemporary Fiction James Peacock, Tim Lustig, 2013-04-17 The essays in this collection address the current preoccupation with neurological conditions and disorders in contemporary literature by British and American writers The book places these fictional treatments within a broader cultural and historical context exploring such topics as the two cultures debate the neurological turn postmodernism and the post postmodern and responses to September 11th Considering a variety of materials including mainstream literary fiction the graphic novel popular fiction autobiographical writing film and television contributors consider the contemporary dimensions of the interface between the sciences and humanities developing the debate about the post postmodern as a new humanism or a return to realism and investigating questions of form and genre and of literary continuities and discontinuities Further the essays discuss contemporary writers attempts to engage the relation between the individual and the social looking at the relation between the syndrome syndrome referring to the prevalence in contemporary literature of neurological phenomena evident at the biological level and existing work in the field of trauma studies where explanations tend to have taken a psychoanalytical form allowing for perspectives that question some of the assumptions that have marked both these fields The current literary preoccupation with neurological conditions presents us with a new and distinctive form of trauma literature one concerned less with psychoanalysis than with the physical and evolutionary status of human beings

Narrative Identity and Personal Responsibility Linda Ethell, 2010-06-28 Narrative Identity and Personal Responsibility is about why and how identifying ourselves by means of narrative makes it possible for us to be responsible morally and otherwise The book begins as an investigation into how it is that we can hold people responsible for who they are despite the fact that we have almost no control over our lives in our formative years It explains the relation between representation personal identity and self knowledge demonstrating how awareness of the vulnerability of our identity as persons is the origin of our capacity for the cathartic revision of a self identifying narrative which is the condition of moral awareness Innovative in its interdisciplinary juxtaposition of ethics moral psychology literary theory and literature Narrative Identity and Personal Responsibility develops a sophisticated and comprehensive account of human nature This book offers an intuitively satisfying and humane yet rigorous account of why and how we think of ourselves as simultaneously free and constrained by nature Its fundamental thesis the mediation of narrative representation between agent and the world suggests new answers to old problems in moral psychology such as
