Jian-Hong Ye, Mei Yen Chen, Yung-Wei Hao, 2023-04-14      **Statistical Methods for Meta-Analysis** Larry V. Hedges, Ingram Olkin, 2014-06-28 The main purpose of this book is to address the statistical issues for integrating independent studies There exist a number of papers and books that discuss the mechanics of collecting coding and preparing data for a meta analysis and we do not deal with these Because this book concerns methodology the content necessarily is statistical and at times mathematical In order to make the material accessible to a wider audience we have not provided proofs in the text Where proofs are given they are placed as commentary at the end of a chapter These can be omitted at the discretion of the reader

Throughout the book we describe computational procedures whenever required. Many computations can be completed on a hand calculator whereas some require the use of a standard statistical package such as SAS, SPSS or BMD. Readers with experience using a statistical package or who conduct analyses such as multiple regression or analysis of variance should be able to carry out the analyses described with the aid of a statistical package.
