The Regulators Stephen King, 2016-01-01 Master storyteller Stephen King presents the classic terrifying New York Times bestseller of those caught between the surreal forces of good versus evil in a small suburban Ohio town. The red van rolls past humming and glinting. Things are happening fast now, although no one on Poplar Street realizes it yet. It's a gorgeous midsummer afternoon along Poplar Street in the peaceful suburbia of Wentworth, Ohio, where life is as pleasant as you ever dreamed it could be. But that's all about to end in a blaze of gunfire and sudden violence, forever shattering the tranquility and the good times here. For the physical makeup of Poplar Street itself is now being transformed into a surreal landscape straight out of the active imagination of the innocent and vulnerable Seth Garin, an autistic boy who's been exposed to and possessed by a horrific otherworldly force of evil, one with sadistic and murderous intent and who is willing to use whatever means necessary to grow ever stronger.

Driver Behaviour and Training: Volume 2 Dr. Lisa Dorn, 2017-07-05 Research on driver behaviour over the past two decades has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour. The importance of this work is underlined by statistics. WHO figures show that road accidents are predicted to be the number three cause of death and injury by 2020, currently more than 20 million deaths and injuries per year. The objective of this second edition and of the conference on which it is based is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between practitioners in road safety and theoreticians investigating driving behaviour from a number of different perspectives and related disciplines. A major focus is to consider how driver training needs to be adapted to take into account driver characteristics, goals and motivations in order to raise awareness of how these may contribute to unsafe driving behaviour and to go on to promote the development of driver training courses that considers all the skills that are essential for road safety. As well as setting out new approaches to driver training methodology based on many years of empirical research on driver behaviour, the contributing road safety researchers and professionals consider the impact of human factors in the design of driver training as well as the traditional skills-based approach. Readership includes road safety researchers from a variety of different academic backgrounds, senior practitioners in the field of driver training from
