**The Handbook of Political Behavior** Samuel Long, 2013-11-11 In the writing of prefaces for works of this sort most editors report being faced with similar challenges and have much in common in relating how these challenges are met They acknowledge that their paramount objective is to provide more than an overview of topics but rather to offer selective critical reviews that will serve to advance theory and research in the particular area reviewed The question of the appropriate audience to be addressed is usually answered by directing material to a potential audience of social scientists graduate students and occasionally advanced undergraduate students Editors who are confronted with the problem of structuring their material often explore various means by which their social science discipline might be subdivided then generally conclude that no particular classification strategy is superior In elaborating on the process by which the enterprise was initiated editors typically resort to a panel of luminaries who provide independent support for the idea and then offer both suggestions for topics and the authors who will write them Editors usually concede that chapter topics and content do not reflect their original conception but are a compromise between their wishes and the authors expertise and capabilities Editors report that inevitable delays occur authors drop out of projects and are replaced and new topics are introduced Finally editors frequently confess that the final product is incomplete with gaps occurring because of failed commitments by authors or because authors could not be secured to write certain chapters

the selection and organization of knowledge about human behavior At least one full chapter is devoted to each of the social system levels required of professional work education Includes illustrative readings and chapter sections on women minorities and sexual orientation Annotation copyright by Book News Inc Portland OR      **Human Hierarchies** Melvyn L. Fein, 2017-09-08 Human beings are hierarchical animals Always and everywhere people have developed social ranking systems These differ dramatically in how they are organized but the underlying causal mechanisms that create and sustain them are the same Whether they are on the top or bottom of the heap people attempt to be superior to some other persons or group This is the root of Melvyn L Fein s thesis presented in *Human Hierarchies A General Theory* Fein traces the development of changes from hunter gatherer times to our own techno commercial society In moving from small to large communities humans went from face to face contests for superiority to more anonymous and symbolic ones Societies evolved from hunting bands where the parties knew each other through big men societies chieftainships agrarian empires patronage chains caste societies estate systems and market oriented democracies Where once small groupings were organized primarily by strong forces such as personal relationships the now standard large groupings are more dependent on weaker forces such as those provided by social roles Bureaucracies and professional roles have become prominent Bureaucracies allow large scale organizations to maintain control of people by limiting the potential destructiveness of unregulated tests of strength and by clarifying chains of command Their rigidity and unresponsiveness requires that they be supplemented by professional roles At the same time a proliferation of self motivated experts delegate authority downward thereby introducing a more flexible decentralization This analysis is a unique and significant advance in both the sociology and anthropology of stratification among humans      *Community-based Interventions for Smokers* ,1995 COMMIT Community Intervention Trial for Smoking Cessation
