A Systems-Based Approach to Policymaking Kenyon B. de Greene, 2012-12-06 This book is based on a number of systems concepts of which the following are emphasized here oThe interacting systems of society and the environment are dynamic and evolution ary oEvolution of these systems carries them through stages of differential stability and instability continuity and discontinuity oAssociated with evolution and instability is structural change that is essentially irre versible oThe present is a stage of world transformation that may not have been equaled for decades or even centuries oPolicies and decisions must match the times in the present case the stage of world transformation The time 11 59 59 PM approximately on December 31 2000 has an impor tant symbolic meaning It marks the end of a minute the end of an hour the end of a day the end of a year the end of a decade the end of a century and the end of a millennium The time and date provide a convenient yardstick against which we can evaluate the evolution of our thinking and the adequacy of our assumptions mental models paradigms and policies Will the beginning tum out to be appropriately dif ferent from the end We hope that this book is helpful in such evaluation This is a new paradigm book which both presents and advances the new way of thinking about the systems of science technology society economics politics and the environment and actively calls for the replacement of the worn out cognitive sociotechnical paradigm **The Wiley-Blackwell Handbook of the Psychology of Leadership, Change, and**

Continuities in Sociological Human Ecology Michael Micklin, Dudley L. Poston, 2013-11-11 The completion of this volume would not have been possible without the generous and dedicated help of numerous people The book had its genesis in a conference held at Cornell University in the fall of 1990 that was organized by Dudley Poston Paul Eberts and Michael Hannan all professors at the time at Cornell With the very generous financial assistance of David Call then the dean of Cornell s College of Agriculture and Life Sciences Poston Eberts and Hannan put together a two day conference of lectures and papers by human ecologists from Cornell University and elsewhere The conference focused on sociological human

ecology and celebrated the fortieth anniversary of the publication of Amos Hawley's Human Ecology (Ronald Press 1950). Professor Hawley was the keynote speaker at the conference. Many of the authors of the chapters in this volume presented earlier versions at the Cornell conference in 1990. Cornell's Departments of Rural Sociology and Sociology also contributed financial assistance; however, without Dean Call's very generous support, the conference would not have been possible. A few months after the conference, Poston and Michael Micklin discussed the possibility of asking the various authors of the Cornell conference papers to revise them for publication in a volume on sociological human ecology. Many opted to do so, but others did not because of time and other kinds of commitments and constraints.

Analytical Planning Thomas L. Saaty, Kevin P. Kearns, 2014-05-17. *Analytical Planning: The Organization of Systems* deals with systems and planning and suggests a methodological tool for integrating the two. This book presents the basic ideas behind complexity, systems hierarchies, and prioritization and describes planning as a unique form of decision making with illustrations of some prominent philosophical and methodological approaches. It highlights some shortcomings of traditional approaches to planning and shows how these can be addressed by the systems approach. This monograph consists of seven chapters and opens with a discussion on the nature of complexity and describes an approach that facilitates the use of creativity and experience to structure complex problems. The next chapter explains the rationale for systems thinking and how reductionism works. The Analytic Hierarchy Process is then considered along with its relationship to some of the properties of systems. The remaining chapters focus on ways of thinking about planning and philosophies of planning, strategic planning, and the applicability of the Analytic Hierarchy Process to benefit cost analysis and resource allocation. This book is intended for managers, decision makers, and planners as well as researchers and practitioners in applied mathematics and computer science.

Safety Causation Analysis in Sociotechnical Systems: Advanced Models and Techniques Esmaeil Zarei, 2024-07-22. This book provides a comprehensive view on theories, models, and techniques used to investigate and analyze incidents and safety causalities occurring in sociotechnical systems. Consisted of intricately interconnected components, sociotechnical systems are always prone to incidents. These incidents can ensue with adverse effects on employees and the public, the environment, and company's properties and reputation. Sometimes a single incident has the potential to terminate the operation of a business forever. As incidents are multi-factorial and not easy to comprehend, they should be investigated systematically in a structured way so as to find their root causes and prevent them from recurring. Consequently, there have been developed many theories, models, and techniques aimed at accomplishing this goal.

However each approach has its own upsides and downsides and there is no universal one applicable to all cases Therefore researchers and practitioners may sometimes find it difficult to select the most appropriate approach for the given case After introducing theories models and techniques pertaining to incident investigation and safety causalities modeling this book explains each one in details and discusses their pros and cons The book aims to provide the audience with a step by step guidance for performing incident investigation and analysis At the end of each chapter an example is analyzed by the introduced tool Finally the book offers criteria based on which an incident analysis technique can be selected
