community to unify and coordinate its effort to advance the state of practice and research WICSA 1 was organized to facilitate information exchange between practising software architects and software architecture researchers The conference was held in San Antonio Texas USA from February 22nd to February 24th 1999 it was the initiating event for the new IFIP TC 2 Working Group on Software Architecture This proceedings document contains the papers accepted for the conference The papers in this volume comprise both experience reports and technical papers The proceedings reflect the structure of the conference and are divided into six sections corresponding to the working groups established for the conference

Formal Foundations for Software Engineering Methods Heinrich Hußmann,1997-09-23 In this book Hussmann builds a bridge between the pragmatic methods for the design of information systems and the formal mathematical background Firstly the principal feasibility of an integration of the different methods is demonstrated Secondly the formalism is used as a systematic semantic analysis of the concepts in SSADM a British standard structured software engineering method Thirdly a way of obtaining a hybrid formal pragmatic specification using a combination of SSADM notations and formal SPECTRUM specifications is shown This well written book encourages scientists and software engineers to apply formal methods to practical software development problems   **Foundations of Software Science and Computation Structures** M. Nivat,1998-03-11 This book constitutes the refereed proceedings of the First International Conference on the Foundations of Software Science and Computation Structures FoSSaCS 98 held as part of the Joint European Conferences on Theory and Practice of Software ETAPS 98 in Lisbon Portugal in March April 1998 The 19 revised full papers presented in the book were carefully selected from a total of 44 submissions Among the topics covered are formal specification automata theory term rewriting and rewriting systems process algebras formal language theory type theory event structures and iteration theory   *Advanced Information Systems Engineering* Matthias Jarke,Andreas Oberweis,2003-05-21 This book constitutes the refereed proceedings of the 11th International Conference on Advanced Information Systems Engineering CAiSE 99 held in Heidelberg Germany in June 1999 The 27 revised full papers presented together with 12 short research papers and two invited contributions were carefully selected from a total of 168 submissions The papers are organized in topical sections on components information systems management method engineering data warehouses process modeling CORBA and distributed information systems workflow systems heterogeneous databases and information systems dynamics

Coordination of Internet Agents Andrea Omicini,Franco Zambonelli,Matthias Klusch,Robert Tolksdorf,2013-11-27 As today s most complex computing environment the Internet confronts IT researchers system designers and application developers with completely new challenges and as a fascinating new computing paradigm agent technology has recently attracted broad interest and strong hopes for shaping the future information society Relating both the Internet and agents opens up a whole new range of advanced applications in vibrant subfields of information technology such as middleware mobile commerce e learning collaborative working and intelligent information services Many modern advanced systems are

likely to exploit Internet agents and exploiting Internet agents mostly means dealing with coordination models and technologies of various sorts This monograph like anthology is the first systematic guide to models and enabling technologies for the coordination of intelligent agents on the Internet and respective applications   Enterprise Information Systems VI Isabel Seruca,José Cordeiro,Slimane Hammoudi,Joaquim Filipe,2006-07-08 This book contains the best papers of the Sixth International Conference on Enterprise Information Systems ICEIS 2004 held in Porto Portugal and organized by INSTICC Institute for Systems and Technologies of Information Communication and Control in collaboration with PORTUCALENSE UNIVERSITY who hosted the event Following the route started in 1999 ICEIS has become a major point of contact between research scientists engineers and practitioners on the area of business applications of information systems This conference has received an increased interest every year from especially from the international academic community and it is now one of the world largest conferences in its area This year five simultaneous tracks were held covering different aspects related to enterprise computing including Databases and Information Systems Integration Artificial Intelligence and Decision Support Systems Information Systems Analysis and Specification Software Agents and Internet Computing and Human Computer Interaction The sections of this book reflect the conference tracks   Encyclopedia of Human Computer Interaction Ghaoui, Claude,2005-12-31 Esta enciclopedia presenta numerosas experiencias y discernimientos de profesionales de todo el mundo sobre discusiones y perspectivas de la la interacci n hombre computadoras   CyberSecurity in a DevOps Environment Andrey Sadovykh,Dragos Truscan,Wissam Mallouli,Ana Rosa Cavalli,Cristina Seceleanu,Alessandra Bagnato,2023-12-15 This book provides an overview of software security analysis in a DevOps cycle including requirements formalisation verification and continuous monitoring It presents an overview of the latest techniques and tools that help engineers and developers verify the security requirements of large scale industrial systems and explains novel methods that enable a faster feedback loop for verifying security related activities which rely on techniques such as automated testing model checking static analysis runtime monitoring and formal methods The book consists of three parts each covering a different aspect of security engineering in the DevOps context The first part Security Requirements explains how to specify and analyse security issues in a formal way The second part Prevention at Development Time offers a practical and industrial perspective on how to design develop and verify secure applications The third part Protection at Operations eventually introduces tools for continuous monitoring of security events and incidents Overall it covers several advanced topics related to security verification such as optimizing security verification activities automatically creating verifiable specifications from security requirements and vulnerabilities and using these security specifications to verify security properties against design specifications and generate artifacts such as tests or monitors that can be used later in the DevOps process The book aims at computer engineers in general and does not require specific knowledge In particular it is intended for software architects developers testers security professionals and tool providers who want to define build test and verify secure applications Web
