Software Specification Techniques:

Software Specification Methods Henri Habrias, Marc Frappier, 2013-03-01 This title provides a clear overview of the main methods and has a practical focus that allows the reader to apply their knowledge to real life situations The following are just some of the techniques covered UML Z TLA SAZ B OMT VHDL Estelle SDL and LOTOS *Software Specification Techniques* Narain Gehani, Andrew D. McGettrick, 1986

Integration of Software Specification Techniques for Applications in Engineering Hartmut Ehrig, Werner Damm, Jörg Desel, Martin Große-Rhode, Wolfgang Reif, Eckehard Schnieder, Engelbert Westkämper, 2011-04-05 This book constitutes the documentation of the scientific outcome of the priority program Integration of Software Specification Techniques for Applications in Engineering sponsored by the German Research Foundation DFG It includes main contributions of the projects of the priority program and of additional international experts in the field Some of the papers included were presented at the related Third International Workshop on the topic INT 2004 held in Barcelona Spain in March 2004 The 25 revised full papers presented together with 6 section introductions by the volume editors were carefully reviewed and selected for inclusion in the book The papers are organized in topical sections on reference case study production automation reference case study traffic control systems petri nets and related approaches in engineering charts verification and integration modeling *Algebraic Specification Techniques and Tools for Software Development* Ingo Classen, Hartmut Ehrig, Dietmar Wolz, 1993 The intention of this book is to show how algebraic specification methods can be used for software development to support reliability modifiability and reusability These methods are introduced by parameterized and module specifications through practical examples and case studies using algebraic specification languages and tools developed at TU Berlin

New Trends in Software Methodologies, Tools, and Techniques Hamido Fujita, Volker Gruhn, 2004 Software is the essential enabler for the new economy and science It creates new markets and new directions for a more reliable flexible and robust society It empowers the exploration of our world in ever more depth However software often falls short behind our expectations Current software methodologies tools and techniques remain expensive and not yet reliable for a highly changeable and evolutionary market Many approaches have been proven only as case by case oriented methods This book presents a number of new trends and theories in the direction in which we believe software science and engineering may develop to transform the role of software and science in tomorrow's information society This book is an attempt to capture the essence of a new state of art in software science and its supporting technology The book also aims at identifying the challenges such a technology has to master and Conceptual Software Models Declarative Representation for Software Development Requirement Representation and Formalization Formal Specification and Language Interpretation Legacy Systems and Language Conversions Software Quality and Development Measurement and Software Development Practices Models examples Each of these chapters contains well reviewed and selected papers so the reader can enjoy the state of the art on the need on such new emerged technology

Semantic Integration of Heterogeneous Software Specifications Martin Große-Rhode, 2013-03-09 In a model based development of software systems different views on a system are elaborated using appropriate modeling languages and techniques Because of the unavoidable heterogeneity of the viewpoint models a semantic integration is required to establish the correspondences of the models and allow checking of their relative consistency The integration approach introduced in this book is based on a common semantic domain of abstract systems their composition and development Its applicability is shown through semantic interpretations and compositional comparisons of different specification approaches These range from formal specification techniques like process calculi Petri nets and rule based formalisms to semiformal software modeling languages like those in the UML family

New Trends in Software Methodologies, Tools and Techniques H. Fujita, M. Mejri, 2006-10-03 Software is the essential enabler for the new economy and science This book presents a number of trends and theories in the direction in which we believe software science and engineering may develop to transform the role of software and science in tomorrow's information society
