Critical Literacy as Resistance Laraine Wallowitz, 2008. *Critical Literacy as Resistance* is a collaborative effort among secondary and university educators from across the United States that addresses questions such as: What does a critical literacy classroom look like? What various texts are used? What strategies do teachers use to encourage students and teacher candidates to recognize how texts construct power and privilege? How do educators inspire activism in and out of the classroom? This book documents the experiences of scholars and teachers who have successfully bridged theory and practice by applying critical literacy into their respective content areas. The authors spell out the difference between critical thinking and critical literacy, then show how to write and implement curriculum that incorporates diverse texts and multiple literacies in all content areas, including world language, and includes the voices of students as they confront issues of race, class, gender, and power. The principles and practices laid out here will help teachers use literacy to liberate and empower students both in and outside the classroom by respecting and studying the literacies students bring to school while simultaneously teaching and challenging the literacies of those in power. This is a book for pre- and in-service teachers in all content areas, staff developers, secondary literacy specialists, university professors, and anyone interested in social justice.

Valuing Historic Environments Lisanne Gibson, John Pendlebury, 2016-02-17. This volume brings together an interdisciplinary team of leading scholars to discuss frameworks of value in relation to the preservation of historic environments. Starting from the premise that heritage values are culturally and historically constructed, the book examines the effects of pluralist frameworks of value on how preservation is conceived. It questions the social and economic consequences of constructions of value and how to balance a responsive democratic conception of heritage with the pressure to deliver on social and economic objectives. It also describes the practicalities of managing the uncertainty and fluidity of the widely varying conceptions of heritage.
