Soil Conservation Royston Philip Charles Morgan,1981 **Soil Conservation Problems and Prospects** Royston P. Morgan,1992-01-01 *Soil Conservation* Royston Philip Charles Morgan,1981 **New Concepts and Approaches to Land Management in the Tropics with Emphasis on Steeplands** T. F. Shaxson,1999-01-01 In the tropics most of the steepland areas are settled by small scale farming families where livelihoods may be endangered by land degradation and associated loss of productivity This bulletin brings concepts and principles of good land husbandry into focus Routledge Library Editions: Development Mini-Set E: Development and the Environment Various,2022-07-30 Routledge Library Editions Development will re issue works which address economic political and social aspects of development Published over more than four decades these books trace the emergence of development as one of the most important contemporary issues and one of the key areas of study for modern social science The books cover the most important themes within development and include studies of Latin America Africa and Asia Authors include Sir Alexander Cairncross W Arthur Lewis Lord Peter Bauer and Cristobal Kay An extensive collection of previously hard to access or out of print books this set presents an unrivalled opportunity to build up a wealth of material in the field of development studies with a particular focus upon economic and political concerns The volumes in the collection offer both a global overview of the history of development in the twentieth century and a huge variety of case studies on the development of individual nations **Challenging Environmental Issues** ,2021-11-22 This volume is the result of the co author s keen interest in better understanding the environmental problems faced by all countries in the Middle East It is also the result of the co authors deep commitment to urge Middle Eastern citizens and their leaders to work together for better protection of their precious and fragile environment so that it may be saved for the enjoyment and safety of future generations In the Middle East geography and arid and semi arid climatic conditions have led to a concentration of people in coastal zones and river valleys with acute water shortages water and air pollution increasing soil erosion and intensifying desertification all creating serious environmental challenges All these issues are addressed by eight leading scholars in eight chapters which include Jordan Oman Lebanon Israel Sudan the Arabian Gulf Iran Syria Contributors are Badria A Al Awadhi Joseph G Jabra Nancy W Jabra Jamil E Jreisat Joseph A Keckichian Alon Tal Rania Masri Damazo Dut Majak Gloria Ibrahim Saliba and Seid M Zekavat **Land Degradation and Society** Piers Blaikie,Harold Brookfield,2015-07-30 Why does land management so often fail to prevent soil erosion deforestation salination and flooding How serious are these problems and for whom This book first published in 1987 sets out to answer these questions which are still some of the most crucial issues in development today using an approach called regional political ecology This approach acknowledges that the reason why land management can fail are extremely varied and must include a thorough understanding of the changing natural resource base itself the human response to this and broader changes in society of which land managers are a part Land Degradation and Society is essential reading for all students of geography

agriculture social sciences development studies and related subjects Learning From China? Bernhard Glaeser, 2013-09-05
First published in 1987 this volume was written to shed some light upon the nature and environmental consequences and wider relevance of development strategies in the Peoples Republic of China It covers industrialisation food production energy use and landscape and settlement planning The Chinese autocentred strategy is assessed from both the developmental and the environmental viewpoints Decision making processes and the opportunities to implement environmental policy in other parts of the developing world are analysed and the volume concludes with the view that benefits to other countries are likely to arise out of increased co operation and exchange with China although the Chinese model is by no means a panacea All students and researchers interested in either environmental or developmental issues will find this book to be a substantial and enlightening contribution to literature *The Earthscan Reader in Environmental Economics* Anil

Markandya, 2017-10-03 Environmental economics may hold the key to the successful management of the world s accelerating environmental problems from transport and pollution to the wholesale degradation of much of the Third World climate change and loss of the ozone layer Increasingly a range of professionals and policy makers as well as environmentalists and the economists themselves are turning to it to show how to arrive at decisions on these complicated and vital issues This reader brings together the most important contributions to the subject Sections of it cover the theoretical issues the different ways of valuing the environment economic instruments of environmental policy environment and development and global environmental problems An extensive introduction by the editors maps out the area and the development of the arguments within it As a whole the volume makes an indispensable sourcebook for those in any way involved with these questions Anil markandya is one of the authors of *Blueprint for a Green Economy* and *Blueprint 2 Greening the Global Economy*

Rethinking Research on Land Degradation in Developing Countries Yvan Biot, 1995-01-01 World Bank Technical Paper No 280 Addresses the need to improve the administration of justice in Latin America and the Caribbean and provides effective strategies for reform Judicial reform is a new area of interest for the World Bank This book addresses the need to improve the administration of justice in Latin America and the Caribbean and provides effective strategies for reform The report combines the experiences of more than 20 countries in their effort to enhance the quality and efficiency of their judicial systems The authors highlight the importance of the judiciary in economic development with a particular focus on court administration the judicial institutional framework alternative dispute resolution mechanisms procedural reforms access to justice and the role of the legal profession Field Experiments and Measurement Programs in Geomorphology

Olav Slaymaker, 2011-11-01 This book advances a typology of experimentation in the field science of geomorphology the study of the form of the earth s surface and the evolution of its relief This typology is then applied to problems of total drainage basin change and subsets of processes of change associated with slopes and channels Geomorphology has traditionally been a descriptive discipline concerned with the evolution of landscapes over very long time periods However

since the 1950s there has been a strong trend towards the study of contemporary processes of change and the influence of society as well as of natural biophysical factors. Consequently an experimental approach is becoming more appropriate. Commissioned by the International Geographical Union, this work is the first to document different field methodologies in geomorphology. The contributors are internationally known geomorphologists from Canada, the United States, the United Kingdom and Japan. They review methods, global coverage and advances in understanding while at the same time promoting a more dynamic, more relevant and more applied science of earth surface change, the geomorphological aspects of global change.

River Basin Management Daniel Bucur, 2016-08-10. Many of the challenges facing farmers and human communities from hydrographical basins are not new. But due to the fact that the nature and extents of the problems vary from one region to another and from one basin to another, the responses are highly diversified. There is no generally valid solution for all the problems. However, in addressing issues on ensuring the prevention or mitigation of the destructive consequences of flood damage or prolonged drought, as for the optimal use of water by consumers, sustainable basin land use, biodiversity conservation and environment protection, as well, fourteen specialists and their colleagues present the state of the art in these important matters and new possible solutions to solve identified from the scientific investigations undertaken.

Advances in Remote Sensing Technology and the Three Poles Manish Pandey, Prem C. Pandey, Yogesh Ray, Aman Arora, Shridhar D. Jawak, Uma K. Shukla, 2022-12-12. ADVANCES IN REMOTE SENSING TECHNOLOGY AND THE THREE POLES. Covers recent advances in remote sensing technology applied to the Three Poles, a concept encompassing the Arctic, Antarctica and the Himalayas. Advances in Remote Sensing Technology and the Three Poles is a multidisciplinary approach studying the lithosphere, hydrosphere, encompassing both limnosphere and oceanosphere, atmosphere, biosphere and anthroposphere of the Arctic, the Antarctic and the Himalayas. The drastic effects of climate change on polar environments bring to the fore the often subtle links between climate change and processes in the hydrosphere, biosphere and lithosphere, while unanswered questions of the polar regions will help plan and formulate future research projects. Sample topics covered in the work include: Terrestrial net primary production of the Arctic and modeling of Arctic landform evolution; Glaciers and glacial environments including a geological, geophysical and geospatial survey of Himalayan glaciers; Sea ice dynamics in the Antarctic region under a changing climate; the Quaternary geology and geomorphology of Antarctica; Continuous satellite missions, data availability and the nature of future satellite missions including scientific data sharing policies in different countries; Software tools, models and remote sensing technology for investigating polar and other environments. For postgraduates and researchers working in remote sensing, photogrammetry and landscape evolution modeling, *Advances in Remote Sensing Technology and the Three Poles* is a crucial resource for understanding current technological capabilities in the field along with the latest scientific research that has been conducted in polar areas.

Slope Stabilization and Erosion Control: A Bioengineering Approach Roy P.C. Morgan, R.J. Rickson, 2003-09-02. This book is an up to date review of research

and practice on the use of vegetation for slope stabilization and control of surface erosion caused by water and wind From a basic understanding of the principles and practices of vegetation growth and establishment it describes how vegetation can be treated as an engineering material and used to solve erosion and slope stability problems Desertification Monique Mainguet,2012-12-06 After UNCED United Conference on Environment and Development Rio de Janeiro July 1992 a second edition of Desertification was necessary About 150 corrections amendments and additions take scientific progress into account The author also presents an updated chapter in which the results of UNCED are analyzed This book aims at an understanding of what is commonly called desertification a term which is proposed to be replaced by land degradation Each level of technology excessive or insufficient creates its own mismanagement This is reflected in an increase in land degradation and eventually a decrease in soil productivity The benefit to the reader is an awareness of the ecozones and a global overview of the phenomena mechanisms and existing solutions Land Degradation A.J. Conacher,2013-12-11 This book contains selected contributions from the Sixth Meeting of the International Geographical Union s Commission on Land Degradation and Desertification held in Perth Australia in September 1999 Collectively these contributions explicitly seek to understand not only the mechanisms responsible for the problem of land degradation but their social and economic implications the means of overcoming the problems and the policy instruments whereby remedial measures may be implemented This breadth of approach is both distinctive and essential if the problems are to be tackled effectively The authorship comprises of specialists mostly geographers from universities research organizations and government agencies who provide a truly international perspective with contributions from Iceland to Australia and from the USA to Japan Audience The book presents current research findings which will be of particular benefit to professionals and practitioners as well as researchers and tertiary level educationalists who are involved with land degradation Integrated Resource Management Charles V. Kidd,David Pimental,2012-12-02 Written to help bring agriculture s Green Revolution to the third world Integrated Resource Management includes overviews of current agricultural production systems and their alternatives demographics on mortality and population growth soils erosion water availability sustainable integrated agroforestry systems and behavioral adaptations Explains why a quality environment is essential for future agricultural and economic developmentDemonstrates that integrated resource management leads to sustainable and productive agriculture for development Shows that certain agroforestry techniques conserve soil water energy and biological resources and at the same time increase food and fuel supplies Addresses the need for interdisciplinary and multidisciplinary research and training to implement sound resource management policies and programs Innovations as Key to the Green Revolution in Africa Andre Bationo,Boaz Waswa,Jeremiah M. Okeyo,Fredah Maina,Job Maguta Kihara,2011-08-30 Africa can achieve self sufficiency in food production through adoption of innovations in the agriculture sector Numerous soil fertility and crop production technologies have been generated through research however wide adoption has been low African farmers need

better technologies more sustainable practices and fertilizers to improve and sustain their crop productivity and to prevent further degradation of agricultural lands The agricultural sector also needs to be supported by functional institutions and policies that will be able to respond to emerging challenges of globalization and climate change Managing Weather and Climate Risks in Agriculture Mannava VK Sivakumar,Raymond P. Motha,2008-01-10 In many parts of the world weather and climate are one of the biggest production risks and uncertainty factors impacting on agricultural systems performance and management Both structural and non structural measures can be used to reduce the impacts of the variability including extremes of climate resources on crop production While the structural measures include strategies such as irrigation water harvesting windbreaks etc the non structural measures include use of seasonal to interannual climate forecasts improved application of medium range weather forecasts and crop insurance This book based on an International Workshop held in New Delhi India should be of interest to all organizations and agencies interested in improved risk management in agriculture

Weathering and Erosion Processes in the Natural Environment Virendra Bahadur Singh,Sughosh Madhav,Naresh Chandra Pant,Ravi Shekhar,2023-12-26 Weathering and Erosion Processes in the Natural Environment An indispensable introduction to the key environmental processes of weathering and erosion Natural and human induced weathering processes can have a great impact on soil and groundwater quality With climate change and other environmental challenges placing increased emphasis on these resources it has never been more important for researchers and environmental professionals to attain detailed knowledge of weathering and erosion processes Weathering and Erosion Processes in the Natural Environment meets this need with a rigorous systematic overview Beginning with a description of different forces and processes that contribute to weathering it then discusses the different kinds of landforms that can be produced by weathering and erosion processes as well as the potential impacts of hydrogeological processes on both surface water and groundwater The result is a volume that balances qualitative and quantitative understanding of this crucial subject Weathering and Erosion Processes in the Natural Environment readers will also find Documented examples in which weathering and erosion processes have led to heavy metals and other trace elements in groundwater Detailed discussion of climate change impacts including extreme weather events and rising carbon dioxide levels Modeling approaches throughout to enable quantitative assessment and predictions of future impact Weathering and Erosion Processes in the Natural Environment is ideal for researchers and advanced students in geology geochemistry hydrogeochemistry and environmental science as well as professionals dealing with water and soil management
