Dinesh Kumar, V. Ratna Reddy, A. J. James, 2019-06-08 From Catchment Management to Managing River Basins Science Technology Choices Institutions and Policy synthesizes key scientific facts crucial for catchment assessment planning and river basin water accounting The book presents extensive reviews of international literature on catchment hydrology forest hydrology and other hydrological processes such as groundwater surface water interactions It discusses not only the science of catchment assessment and planning but also the catchment planning process It documents several of the positive international experiences with integrated catchment management and integrated basin management distilling key learnings Case studies from India and other parts of South Asia are also included along with new pilot studies Finally the book discusses the theoretical and operational aspects of integrated catchment management and integrated water management in river basins using international best practices and case studies Discusses the theoretical nuances of scale effects in hydrology and land use hydrology interactions Focuses on managing water in a situation in which water has become scarce Provides a

theoretical discussion on water accounting procedures that is followed by an application of the methodology and tools in real life case studies in two river basins of India Presents applications of the concept of integrated water resources management for developing a WRM plan for an Indian river basin *Ecology of Nusa Tenggara* Kathryn Monk,Yance De

Frete,2012-06-05 The Ecology of Nusa Tenggara and Maluku is a comprehensive ecological survey of a series ecologically diverse islands in the Pacific It contains extensive baseline data on the region s people ecosystems biodiversity and land use and discusses these in a historical as well as a developmental context It also provides guidelines for scientific researchers on worthwhile ecological and socio economic research projects This region is the most diverse in Indonesia Its myriad islands range from small atolls to active volcanic islands rising 3 500 meters above sea level Each province has extensive coastlines only 10 percent of the province of Maluku is land The seas include shallow continental shelves and some of the deepest sea basins in the world The complexity and vulnerability of these islands mean that development and environment are

inextricably linked If this is not understood and acted upon there is no possibility for the ecologically sustainable development of Nusa Tenggara and Maluku *Shifting Ground* Peter H. Lindert,2000-10-12 Peter Lindert evaluates environmental concerns about soil degradation in two very large countries China and Indonesia where anecdotal evidence has suggested serious problems In this book Peter Lindert evaluates environmental concerns about soil degradation in two very large countries China and Indonesia where anecdotal evidence has suggested serious problems Lindert does what no scholar before him has done using new archival data sets he measures changes in soil productivity over long enough periods of time to reveal the influence of human activity China and Indonesia are good test cases because of their geography and history China has been at the center of global concerns about desertification and water erosion which it may have accelerated with intense agriculture Most of Indonesia s lands were created by volcanoes and erosion and its rapid deforestation and shifting slash burn agriculture have been singled out for international censure Lindert s investigation suggests that human mismanagement is not on average worsening the soil quality in China and Indonesia Human cultivation lowers soil nitrogen and organic matter but has offsetting positive effects Economic development and rising incomes may even lead to better soil Beyond the importance of Lindert s immediate findings this book opens a new area of study quantitative soil history and raises the standard for debating soil trends Response to Land Degradation E M

Bridges,2019-04-24 This work is intended for advanced readers interested in methods of sustainable land management the prevention and control of land degradation It offers a coherent view of the situation concerning land degradation and the human response to the problem It is generally recognized that technological solutions alone cannot solve the problems of land degradation This book discusses the role of land use and land management policies programmes insitutional innovations and economic incentives for the control and prevention of land degradation Special attention is given to legal issues at the international level and in individual countries **Liberation Ecologies** Richard Peet,Michael Watts,2004-08-02 Liberation

Ecologies elaborates a political economic explanation of environmental crisis drawing from the most recent advances in social theory Forest Ecosystems David A. Perry,Ram Oren,Stephen C. Hart,2008-07-24 2009 Outstanding Academic Title Choice This acclaimed textbook is the most comprehensive available in the field of forest ecology Designed for advanced students of forest science ecology and environmental studies it is also an essential reference for forest ecologists foresters and land managers The authors provide an inclusive survey of boreal temperate and tropical forests with an emphasis on ecological concepts across scales that range from global to landscape to microscopic Situating forests in the context of larger landscapes they reveal the complex patterns and processes observed in tree dominated habitats The updated and expanded second edition covers Conservation Ecosystem services Climate change Vegetation classification Disturbance Species interactions Self thinning Genetics Soil influences Productivity Biogeochemical cycling Mineralization Effects of herbivory Ecosystem stability *From Slash-and-burn to Replanting* François Ruf,Frederic Lançon,2004 The most traditional and widely used farming systems in the humid upland tropics are based on fallowing and various forms of slash and burn agriculture Their sustainability depends on the duration of the fallow When fallow duration drops below the threshold of seven or eight years crop yield usually declines A concept described as forest rent Given the plight of millions of farmers the development of upland agriculture has become increasingly important This book reports the results of fieldwork conducted by the editors and other experts in some 40 regions of Indonesia from 1989 to 2001 It finds that some of the most successful improvements have been the result of innovations by the farmers themselves *Strategic Issues for Watershed Development in Asia* William Magrath,John B. Forests, Water and People in the Humid Tropics M. Bonell,L. A. Bruijnzeel,2009-12-17 Forests Water and People in the Humid Tropics is a comprehensive review of the hydrological and physiological functioning of tropical rain forests the environmental impacts of their disturbance and conversion to other land uses and optimum strategies for managing them The book brings together leading specialists in such diverse fields as tropical anthropology and human geography environmental economics climatology and meteorology hydrology geomorphology plant and aquatic ecology forestry and conservation agronomy The editors have supplemented the individual contributions with invaluable overviews of the main sections and provide key pointers for future research Specialists will find authenticated detail in chapters written by experts on a whole range of people water land use issues managers and practitioners will learn more about the implications of ongoing and planned forest conversion while scientists and students will appreciate a unique review of the literature Sustainable Development David Pearce,Edward Barbier,Anil Markandya,2013-11-05 Blueprint for a Green Economy put the economics of the environment onto the public agenda Its authors have now widened the issue by applying the principles of their earlier ground breaking work to the tangled issue of sustainable Third World development They offer a definition of sustainable

development in terms of not depleting natural resources and then examine its economic implications The bulk of the book contains six lively case studies of major developmental issues from the watersheds of Java to the drylands of the Sudan from Amazonia to Africa all of which show the crucial importance of incorporating the economics of sustainable development into our thinking **Learning from the Farming Systems Research Experiences in Indonesia** Junko Goto,Henny Mayrowani,2000 **Advances in Hillslope Processes** M. G. Anderson,Susan M. Brooks,1996 Journal of the Asian Farming Systems Association ,1991 **Economics, Natural-Resource Scarcity and Development (Routledge Revivals)** Edward B Barbier,2013-06-26 Global warming is an increasing problem tropical forests are being wiped out and major upper watersheds are being degraded Using insights provided by environmentalism ecology and thermo dynamics this book first published in 1989 outlines an economic approach to the use of natural resources and particularly to the problem of environmental degradation Edward Barbier reviews and critiques the long past of environmental and resource economics and then goes on to elaborate an economics which allows us to develop alternative strategies for dealing with the problems faced With examples drawn from Latin America and Indonesia he not only develops a major theoretical advance but shows how it can be applied Barbier s work is an important and relevant contribution to the discussion surrounding the economics of environmental sustainability *The Cumulative Book Index* ,1990 A world list of books in the English language
