**The Soils of Nepal** Roshan Babu Ojha, Dinesh Panday, 2021-10-14. This book publishes consolidated information on the soils of Nepal from all possible sources. The Survey Department Government of Nepal conducted two national scale soil survey projects to classify soils of Nepal. Land Resource Mapping Project ended in 1985 and National Land Use Planning Project ended in 2021. Both projects adopted the United States Department of Agriculture system of soil classification. Besides National Soil Science Research Center previously known as Soil Science Division of Nepal Agricultural Research Council and Soil Management Directorate Department of Agriculture also worked on soils of Nepal. To date the information on the soils of Nepal is not published in well documented form but has been reported widely as gray literature project report or government report or peer review articles. The Soils of Nepal is a part of World Soils Book Series which constitutes twelve chapters covering broad aspects such as soil research history climate geology soil classification and mapping and soil fertility. Furthermore information about soil properties and relation between soil constituents of the dominant soil types of Nepal and their scope of use in the context of land use are described. This book also tries to simplify the intricate relationship among soil culture and people. Each chapter contains a comprehensive richly illustrated and up to date overview of the soils of Nepal. We believe it fulfils a quest for a global audience including students educators extension workers and soil scientists who are interested to know the young soils of Nepal.
