Solar Selective Surfaces:

Solar Selective Surfaces O. P. Agnihotri, B. K. Gupta, 1981-04-13 Covers the design production evaluation and application of surfaces having high absorptance in the solar spectrum and low emittance at the operating temperature of the solar collection system Presents current significant data on the enhancement of solar collector efficiency by the use of selective surfaces

Characterization of Solar Selective Surfaces at High Temperatures Jürgen Eitle, 1992

Thermal Radiation Heat Transfer, Fourth Edition Robert Siegel, 2001-12-07 This extensively revised 4th edition provides an up to date comprehensive single source of information on the important subjects in engineering radiative heat transfer It presents the subject in a progressive manner that is excellent for classroom use or self study and also provides an annotated reference to literature and research in the field The foundations and methods for treating radiative heat transfer are developed in detail and the methods are demonstrated and clarified by solving example problems The examples are especially helpful for self study The treatment of spectral band properties of gases has been made current and the methods are described in detail and illustrated with examples The combination of radiation with conduction and or convection has been given more emphasis nad has been merged with results for radiation alone that serve as a limiting case this increases practicality for energy transfer in translucent solids and fluids A comprehensive catalog of configuration factors on the CD that is included with each book provides over 290 factors in algebraic or graphical form Homework problems with answers are given in each chapter and a detailed and carefully worked solution manual is available for instructors
