Sustainability Challenges and Solutions at the Base of the Pyramid

Prabhu Kandachar, Minna Halme, 2017-09-08 Around the turn of the millennium it had become painfully evident that development aid charity or global business as usual were not going to be the mechanisms to alleviate global poverty Today there is little dispute that poverty remains the most pressing global problem calling for innovative solutions One recent strategy is the Base of the Pyramid BoP concept developed by Prahalad and Hart which relies on entrepreneurial activity tapping into the previously ignored markets of the economically most disadvantaged It is a process requiring innovations in several disciplines technological social and business This book covers a number of areas First much of the current BoP discussion emphasises targeting products to the needs of the poor But do we actually know what the real needs of the poor are This book takes a bottom up human centred approach and examines examples that truly engage the poor in BoP product and service development What types of needs assessment methodologies are indicated considering the cultural differences in BoP countries Are the existing methodologies adequate Do they need to be redefined and redeveloped Second the book considers how we can balance poverty alleviation and stimulate economic growth without stressing the ecosystem Tragically the poor are hardest hit by the adverse effects of environmental deterioration such as water shortages climate change or the destruction of habitats While the economic welfare of the poor is critical the BoP approach must balance its inherent paradox of encouraging greater consumption while avoiding further pressures on environmental sustainability The link between the BoP approach and sustainable development is a key feature of this book Third it looks at innovation and asks what kinds of bottom up innovation open source technological social and business support BoP initiatives and sustainable development Fourth the book deals with the relationship between development assistance and BoP Is a BoP strategy the antithesis to development aid or can these two co exist or even complement each other Finally the book raises questions about the relationship between corporate responsibility and BoP Is BoP a new form of corporate neo colonialism or a new form of corporate responsibility Although the BoP concept has unleashed an extensive and generally enthusiastic response from academics businesses NGOs and governments the knowledge domain around this concept is still in the early stages of development This book addresses that need with a focus on the needs of the end users the poor as a starting point for BoP products and innovations With contributions from both supporters and critics it provides a treasure trove of global knowledge on how the concept has developed what its successes and failures have been and what promise it holds as a long term strategy for alleviating poverty and tackling global sustainability

TECHNOLOGIES Dr. Basavaraj R. Bagade & Dr. Mohd Akhter Ali,2020-06-18 The administrators of city or a town adopt two approaches to evaluate the urban places and the impact of urbanization The first approach undertakes the Study of size function growth rate and tributary area of cities in the general fabric of settlements The second approach deals with the internal structure of cities and the related factors which control the layout and buildings the character and intensity of land use the movement of persons and goods between various functional areas The land use planning is a part of larger process of

city planning It is basically concerned with location intensity and amount of land development required from various space using functions of city life such as industry wholesaling business housing recreation education and religious and cultural activities of the people The study of urban land use and its planning is of considerable significance in the overall planning of urban places like Gadag Betageri city Decline and decay of our cities calls for all policy makers administrators and Politicians to stop destructive forces of the urban development and to forge alliances among all local and national forces which are concerned with the social political economic ecological physical and cultural development of our cities and towns Despite the claims that developments in communications imply that the cities are Remote Sensing and GIS going to lose their function and will change dramatically it cannot be predicted that the new paradigm of the information city will only represent another device of those who do not have access to information technology

Technical Landfills and Waste Management

Abdelkader Anouzla, Salah Souabi, 2024-03-16 A zero waste society and the circular economy trend are urgently needed Even if achieving 100% trash recycling and a fully circular economy may not always be attainable aiming toward this goal might result in a sustainable future Municipal solid wastes pose a hazard to the environment because of open burning landfills reckless disposal and many other factors Waste is being thrown away in more significant quantities and is made up of several different materials Municipal solid waste MSW characteristics must be carefully considered when developing implementing or modifying solid waste management systems Local waste variables that vary with cultural climatic socioeconomic and institutional capacities are crucial for developing efficient waste management techniques This book provides a comprehensive overview of landfills situation their categories and the types of garbage they receive The final section of the study provides an overview of prospective waste management techniques their restrictions and the potential areas for further research on landfill sites This book has the advantage that world class experts in their respective fields have written each chapter As a result this book presents a balanced picture across the whole spectrum of chapters on municipal solid wastes
