Thermal Processes

Waste-to-Energy (WtE) is a process that converts waste into energy, typically through incineration. This process can be used to generate electricity or heat, which can then be used for various purposes. WtE is a key component of the waste management hierarchy, as it allows for the recovery of energy from waste that cannot be recycled or reused. This process is often used for municipal solid waste (MSW) and industrial waste. The energy generated from WtE can be used to produce electricity or heat, which can then be used for various purposes. WtE is a key component of the waste management hierarchy, as it allows for the recovery of energy from waste that cannot be recycled or reused. This process is often used for municipal solid waste (MSW) and industrial waste.
