Solidarity And Suffering Toward A Politics Of Relationality:

Solidarity and Suffering Douglas Sturm, 1998-08-06 Developing a concept of justice as solidarity this work addresses a range of urgent social issues from the meaning of human rights and the character of corporate governance to the resolution of social conflict and the moral status of the environment

Clashing Worldviews in the U.S. Supreme Court James Davids, Erik Gustafson, Sherena Arrington, 2021-10-19 Contrasting two Protestant justices who hold distinctively different worldviews Chief Justice William H Rehnquist and Justice Harry A Blackmun this book explores how each came to hold his worldview how each applied it in Supreme Court rulings and how it led them to differing outcomes for liberty equality and justice This clash of worldviews between Rehnquist whose religious and philosophical influences were anchored in the Reformation and Blackmun whose Reformation theology was modified by Enlightenment philosophy provide the context to examine the true nature of justice liberty and equality and to consider how such ideals can be maintained in a society with increasingly divergent worldviews

Nature and Creation Richard H. Hiers, 2023-04-18 People have lived on Earth since before recorded history depending on nature to provide for and clean up after them But Nature cannot do it all anymore Too many people too much trash and too much toxic waste People have long lived in interdependence with other living things Yet humans now degrade and destroy the global environment that nurtures all species including human beings Human activities contaminate earth air and sea causing thousands of species to go extinct Rising global heat produces vicious cycles of catastrophic drought fires horrific storms floods famines and massive migrations by desperate climate refugees We don't hear much anymore about man's conquest of nature Nature God's creation now clearly has the last word Contrast the theocentric faith and ethics embedded in the Old and New Testaments Here the good world that God created and continues to create was made to be shared with all other living things All alike are made from the earth and destined to return to it Humans were meant to till the soil appreciate enjoy and care for life around them and trust their Creator for what is yet to be

Resilience Process and Its Personal and Social Bases Chau Kiu Cheung, 2024-10-30 This book is to elucidate personal and social bases for personal resilience thus addressing the issue concerning the predominance of social factors in shaping resilience Essentially the book starts with a clarification of resilience as a phenomenon rather than a trait The clarification also identifies the personal bases in terms of the resilience process which specifies belief about resilience as a precursor to learning about resilience action for resilience and resilience successively To justify the personal and social bases the book expounds the analytical functionalist framework to specify voluntaristic and deterministic mechanisms to perform the four requisite functions of goal attainment adaptation integration and latency Equipped with the conceptual and theoretical grounds the book proceeds to scrutinize the effects of personal and social factors on resilience and its process The personal factors include personal background characteristics personality functional disability and various beliefs whereas the social factors include experiences of caring peace violence and social exclusion in society kindness sociability and aid from other

people and social capital The scrutiny engages five databases about 6 948 Chinese people in Hong Kong and neighboring Chinese cities composed of the public service users older adults students and people with visual impairment Overall the book presents ample theoretical and empirical substances to clarify the genesis of resilience Women's Rights and the Bible

Richard H. Hiers,2012-05-03 In this volume Richard Hiers challenges the popular assumption that the Bible has a low view of women and that biblical law either ignores women or requires them to be subject and subservient to men He does so by identifying and carefully examining hundreds of biblical texts and allowing them to speak for themselves Among the findings that biblical tradition generally represents women positively as strong and independent persons that no text represents wives as subject to their husbands and that no biblical law requires such subjection that biblical laws provide many protections for women s rights and interests in several instances rights equal to those enjoyed by men The book focuses particularly on the Old Testament and Old Testament law and argues that Old Testament laws and their underlying values provide important resources for Christian ethics and social policy today **Elder Abuse** Randal W. Summers,Allan Michael Hoffman,2006

Product Description Addresses key issues facing older people and our entire society Topics include care pathway model guidelines for health care professionals understanding elder abuse in minority populations moral and ethical implications of elder abuse sexual violence against elderly women helping victims and more For public health personnel *Chemicals for the Mind* Ernest Keen,2000-02-28 Silently orienting us to the world are traditions embedded in our language These traditions shape how we understand the necessities and possibilities of life and truth Dualism a metaphysical theory is such a tradition and in Keen s view the separate discourses of science and morality create double meanings in our experience Psychopharmacology is a critical intersection of these two worlds where physical compounds are used to change mental life Increasingly the language of neurochemistry formulates that treatment To control ennui with chemicals is to direct our attention away from what is wrong in our lives and to focus instead on what we can control easily by taking a pill Mental life has become marginal in biologically reductionistic discourse While the demystification of human consciousness is surely a cornerstone of modernity in excess it indulges a world design where nothing is sacred and everything becomes just another phenomenon to which we owe nothing Our practice of manipulating consciousness as an object surrenders the complex reflections of moral ambiguity and struggle Following the example of our doctors Keen asserts we the population neglect what is wrong in our lives Like the rest of nature our minds become exploitable And properties of consciousness become commodities sold by prescription in drug stores A provocative analysis of psychopharmacology this will be of interest to treatment professionals from psychologists psychiatrists and nurses to social workers as well as the interested public

Academic Life John B. Bennett,2008-04-01 In this profound look at the academy John Bennett reminds us that our leadership decisions always presuppose our philosophies of life and that understanding precedes practice How we understand the communities we lead informs the many practical judgments we make about directions to take structures to

create processes to initiate and values to uphold Bennett argues that faculty may understand their departments or institutions in one of two ways as simply aggregations of individuals or as communities of intertwined persons From these views two different leadership values and positions emerge The first disposes us toward seeing academic conflict as inevitable and elevates heroic leadership styles where power is understood in terms of advancing one agenda over competitors The second underwrites leadership as supposing openness to others and emphasizes the vital contributions that can follow By providing specific illustrations of the two modes of leadership and the nature of hospitality and openness Academic Life presents a strong platform from which to build a rich and rewarding academic community Contents include The nature of insistent individualism Why the prevalence of insistent individualism Hospitality as an essential virtue Self others institutions and the common good Conversation as an essential metaphor The uses of conversation Community and covenant Engaged but not heroic leadership *Pragmatic Historicism* Sheila Greeve Davaney, 2000-09-22 Presents a new option in theology pragmatic historicism which emerges out of the historicist assumptions of recent Western thought and resists both confessionalism and universalism *The Entangled God* Kirk Wegter-McNelly, 2012-03-12 In *The Entangled God* Kirk Wegter McNelly addresses the age old theological question of how God is present to the world by constructing a novel scientifically informed account of the God world relation Drawing on recent scientific and philosophical work in quantum entanglement Wegter McNelly develops the metaphor of divine entanglement to ground the relationality and freedom of physical process in the power of God s relational being *The Entangled God* makes a three fold contribution to contemporary theological and religious discourse First it calls attention to the convergence of recent theology around the idea of relationality Second it introduces theological and religious readers to the fascinating story of quantum entanglement Third it offers a robust plerotic alternative to kenotic accounts of God s suffering presence in the world Above all this book takes us beyond the view of theology and science as adversaries and demonstrates the value of constructively relating these two important areas of intellectual investigation **Process Theology: A Guide for the Perplexed** Bruce G. Epperly, 2011-03-24 This is an introductory guide to Process Theology for undergraduates As part of Continuum s Guide for the Perplexed series this text provides an accessible introduction to process theology aimed at nurturing the theological imagination of undergraduates pastors and interested laypersons It describes the major themes of process theology and relates them to the everyday lives and spiritual commitments of people today In addition to addressing traditional theological issues Epperly addresses cutting edge issues in theology and ethics such as pluralism and postmodernism matters of life and death science technology and genetics and emerging forms of Christianity This text is designed for seminary and university classes as well as congregational study It will help readers to overcome the obstacles created by the technical language often employed by process theologians Continuum s Guides for the Perplexed are clear concise and accessible introductions to thinkers writers and subjects that students and readers can find especially challenging or indeed downright bewildering

The Politics of Attention and the Promise of Mindfulness Lawrence Berger, 2023-09-27 It is evident from recent political campaigns such as that of Donald Trump that the deployment of attention is crucial for political outcomes Indeed Trump s presidency came about in part due to realities that were produced by the media themselves which required in turn the engagement of public attention The implication is that the instability and capriciousness that is often associated with attention can be an important influence on the outcomes that are so produced Drawing on the thought of Martin Heidegger Lawrence Berger puts forward a new conception of attention as human presence showing how its state determines the efficacy of public spaces in articulating and achieving visions of the common good As politicians seek to amass power by capturing attention citizens can engage in disciplines of attention such as mindfulness in producing a public power that is more appropriately oriented to the welfare of all Berger argues that the practice of mindfulness can enable enhanced ontological bonds to form between individuals which can be the basis for more stable and effective political realities Such bonds are not given structures but are rather contingent upon the state of attention which comes about holistically by way of a hermeneutical circle of attention language and bodily understanding This book is a valuable resource for scholars and students of philosophy of mind political philosophy phenomenology and cognitive science

Facing Distress Els van Dongen, Ruth Kutalek, 2007 Distance and proximity are concepts par excellence to describe what may happen in times of illness and suffering When one faces distress and suffering the need of proximity of the sick or suffering person may manifest itself or the opposite a need of distance exists A doctor or

an anthropologist may believe proximity is necessary but the other can disagree Illness raises questions for all individuals The sick individual will question his her relationship with others and being in the world The authors of this volume take up issues of distance and proximity in illness and suffering in various situations The papers were first discussed in a workshop at the 8th Biennial EASA European Association of Social Anthropologists conference in Vienna in September 2004

Applied Process Thought Mark Dibben, Thomas Kelly, 2013-05-02 Concentrating mainly on the process philosophy developed by Alfred North Whitehead this series of essays brings together some of the newest developments in the application of process thinking to the physical and social sciences These essays by established scholars in the field demonstrate how a wider and deeper understanding of the world can be obtained using process philosophical concepts how the distortions and blockages inevitably inherent in substantivist talk can be set aside and how new and fertile lines of research in the sciences can be opened as a result

The Principle of Solidarity Eva Kassoti, Narin Idriz, 2023-02-13 This edited volume explores the principle of solidarity in international and EU law Although the concept is regularly invoked in international and EU legal and policy debates alike its meaning nature and functions as well as normative contours still remain nebulous The contributions in this volume reflect on the legal trajectory of solidarity in international and EU law and offer unique insights into the evolution and status of the principle in different fields of international and EU law By doing so the book also serves as a springboard for answering broader questions pertaining to what the stage of development of this principle may imply for the two legal orders and their interaction As the chapters of this book show the debate on solidarity is premised on conflicting visions regarding the values underpinning the international legal order as well as the self interest or community oriented driving forces behind States action at the international level The regional EU law perspective offers a new lens through which to revisit classic questions pertaining to the nature of modern international law and to assess its continuing relevance in a world of regional organizations presenting different visions and levels of co operation This book the second volume to appear in the Global Europe Series will appeal to international and EU law researchers and policy makers alike with an interest in the nature and function of the principle of solidarity in international and EU law Eva Kassoti is Senior researcher in EU and International Law at the T M C Asser Institute in The Hague The Netherlands and the Academic Co ordinator of CLEER Narin Idriz is Researcher in EU Law at the T M C Asser Institute in The Hague The Netherlands

The Intersection of Sacredness and Archaeology Donna L. Gillette, Thomas L.

Sanders,2024-10-01 At the point of the often contentious intersection of sacred site preservation and resource development archaeology has a unique and valuable role Archaeology has been criticized as a destroyer of sacred sites through the unbridled pursuit of knowledge through excavation or aiding unbridled development by failing to identify sacred sites However archaeology can act as a mitigator between the conflicting goals of preservation and development while giving the indigenous a voice At the heart of this mitigation is understanding the sacred how it might be physically manifested how those of diverse cultures understand it and how it is effected by the laws and norms of diverse cultures The purpose of this book is to enhance the discussion surrounding contemporary human interaction with our natural and cultural landscape Its first goal is make this discussion more productive and less contentious by presenting and thus recognizing the cultural ways of knowing and perspectives of indigenous people Its second goal is to foster the preservation of our scared landscape As more and more of our physical landscape is being altered worldwide through rapid growth and development the cultural landscape is also being changed and challenged These changes often reflect the interests of some members of society while the interests of others including those of Native and Indigenous communities and many archaeologists environmentalists and others who understand the importance of knowing the past are disregarded The latter group is dedicated toward preserving special places and continuing to provide for Native people the ability to celebrate their traditions and focusing on defining the sacred landscape

The Unknown God Thomas G. Grenham,2005 This book explores the idea of religious and theological interculturalization from a Christian perspective as an approach to evangelisation It explores aspects of culture and pluralism as these have been interpreted in post Vatican II approaches to mission and evaluates interculturalization from a number of perspectives including language symbol and metaphor It draws insight from two New Testament encounters of Jesus with women in Samaria John and in Tyre Matthew and Mark and goes on to explore some historical sources of interculturalization in the missionary endeavours of the Jesuit Matteo Ricci A particular case study is made of the contemporary experience of an African people the Turkana of Kenya
