Foreman, 2011-02-01 Are we environmentally victimizing perhaps even poisoning our minority and low income citizens Proponents of environmental justice assert that environmental decisionmaking pays insufficient heed to the interests of those citizens disproportionately burdens their neighborhoods with hazardous toxins and perpetuates an insidious environmental racism In the first book length critique of environmental justice advocacy Christopher Foreman argues that it has cleared

significant political hurdles but displays substantial limitations and drawbacks Activism has yielded a presidential executive order management reforms at the Environmental Protection Agency and numerous local political victories Yet the environmental justice movement is structurally and ideologically unable to generate a focused policy agenda The movement refuses to confront the need for environmental priorities and trade offs politically inconvenient facts about environmental health risks and the limits of an environmental approach to social justice Ironically environmental justice advocacy may also threaten the very constituencies it aspires to serve distracting attention from the many significant health hazards challenging minority and disadvantaged populations Foreman recommends specific institutional reforms intended to recast the national dialogue about the stakes of these populations in environmental protection

*Getting to Green: Saving Nature: A Bipartisan Solution* Frederic C. Rich, 2016-04-18 Regardless of your place on the political spectrum there is much to admire in this book which reminds us that the stewardship of nature is an obligation shared by all Americans U S Senator Angus S King Jr The Green movement in America has lost its way Pew polling reveals that the environment is one of the two things about which Republicans and Democrats disagree most Congress has not passed a landmark piece of environmental legislation for a quarter century As atmospheric CO2 continues its relentless climb even environmental insiders have pronounced the death of environmentalism In Getting to Green Frederic C Rich argues that meaningful progress on urgent environmental issues can be made only on a bipartisan basis Rich reminds us of American conservation's conservative roots and of the bipartisan political consensus that had Republican congressmen voting for and

Richard Nixon signing the most important environmental legislation of the 1970s He argues that faithfulness to conservative principles requires the GOP to support environmental protection while at the same time he criticizes the Green movement for having drifted too far to the left and too often appearing hostile to business and economic growth With a clear eyed understanding of past failures and a realistic view of the future Getting to Green argues that progress on environmental issues is within reach The key is encouraging Greens and conservatives to work together in the space where their values overlap what the book calls Center Green Center Green takes as its model the hugely successful national land trust movement which has retained vigorous bipartisan support Rich s program is pragmatic and non ideological It is rooted in the way America is not in a utopian vision of what it could become It measures policy not by whether it is the optimum solution but by the two part test of whether it would make a meaningful contribution to an environmental problem and whether it is achievable politically Application of the Center Green approach moves us away from some of the harmful orthodoxies of mainstream environmentalism and results in practical and actionable positions on climate change energy policy and other crucial issues This is how we get to Green      **Pensions in Peril** United States.
