Mind, Body, Soul and Spirit in Transactional Analysis Gordon Law, 2006. Relationships may be understood as the contact that emerges from observable social roles underpinned by inter-personal attitudes. Using transactional analysis and other approaches, this book presents a series of models based on an analysis of the relationships that are created when contact between people links images and roles to confirm existential life positions. Because the models provide a meta-level framework for understanding and influencing any sequence of interaction irrespective of setting or TA specialism, they give ample scope for practitioners to exercise widely differing preferences, techniques and strategies for interacting with clients in ways that encompass a transpersonal or a spiritual view of relationships.
