Scientific American, 1919 *Target Leipzig* Alan Cooper, 2009-11-19 A gripping account of the RAF's attempt to destroy a Messerschmitt factory in 1944 and the carnage and confusion that unfolded on a dark winter night Seventy nine heavy bombers failed to return from the catastrophic raid on the industrial city of Leipzig on the night of February 19 20 1944 Some 420 aircrew were killed and a further 131 became prisoners of war It was at that time the RAF's most costly raid of World War II by far The town was attacked in an attempt to destroy the Messerschmitt factory that was building the famous and deadly Bf 109 fighter The bomber stream flew into what appeared to be a trap It seemed that the Luftwaffe and anti aircraft guns were aware of the intended target and waiting to pounce as soon as the bombers crossed the coast They were subjected to constant attack by night fighters and intense flak until those aircraft that remained clawed their way home and secured relative safety over the North Sea This book analyzes what went wrong Espionage played a part and two bombers collided shortly after takeoff as did others as they wove their way through enemy searchlights and maneuvered violently to escape Luftwaffe night fighters At the outset poor navigational and meteorological briefings had hindered the bombers attempts to locate the target and confusion reigned The author explains the concept of this third raid on Leipzig and describes the two previous ones in October and December 1943 both of which had been deemed successes He looks at the third raid from every angle including the defending force's and describes the daylight raid that followed on the 20th by the USAAF The book also includes appendices listing all RAF aircraft and crew on the raid route maps and many photographs

Invisible Residents Ivan T. Sanderson, 2005 This book is a groundbreaking contribution to the study of the UFO enigma originally published over 30 years ago In this book Sanderson a renowned zoologist with a keen interest in the paranormal puts forward the curious theory that a oeOINTS Other Intelligences live under the Earth's oceans This underwater parallel civilization may be twice as old as Homo sapiens he proposes and may have a oedeveloped what we call space flight

Sanderson postulates that the OINTS are behind many UFO sightings as well as the mysterious disappearances of aircraft and ships in the Bermuda Triangle. What better place to have an impenetrable base than deep within the oceans of the planet. Yet if UFOs or at least some of them are coming from beneath our oceans or lakes, does it necessarily mean that there is another civilization besides our own that is responsible. In fact, could it be that since WWII a number of underwater UFO bases have been constructed by the very human governments of our planet. Whatever their source, Sanderson offers here an exhaustive study of USOs (Unidentified Submarine Objects) observed in nearly every part of the world. He presents many well documented and exciting case studies of these unusual sightings more **Hitler the Scientist** Andrew Pike, 2024-11-30

Hitler's flawed education and anti-Semitism distorted Germany's scientific advancements, leading to the rise of pseudo science and the decline of true scientific inquiry during the Third Reich. When Hitler came to power in 1933, he promised the German people a technocratic state where science, technology, and education would grow and flourish. Unfortunately, any attempts to achieve such a goal were dependent on his educational background, which was fundamentally flawed and severely distorted. Hitler's schooling was a troubled time where he struggled with many subjects. In particular, he found conflicting views between science and religion so difficult to understand it caused him to run his head against the wall. He was also heavily educated in subjects like myths, magic, pseudo sciences, and the occult, which would become his versions of alternative science and alternative facts. These alternatives remained with him into adulthood, where as Führer, his mentality and mindset towards science was highlighted when he announced, "A new age of magic interpretation of the world is coming of interpretation in terms of the will and not the intelligence." Hitler's ideology and rise to power also came at an interesting time for physics, which was hinting at that will not intelligence interpretation. The early decades of the twentieth century had seen a revolution in two apparently connected key areas of the subject known as quantum mechanics and relativity; these would have a dramatic influence on Hitler and the physics of the Third Reich. During the 1920s, quantum mechanics was suggesting that just by observing an experiment, a scientist could alter the outcome and reality. However, at the same time, Albert Einstein's theory of relativity was also developing, and whereas the two areas were believed to be linked to the Nazis, there was a serious problem. Whereas German physicist Max Planck's quantum physics was a non-Jewish science hinting at that promised magical underlying foundation to physics and reality, Einstein was Jewish, and so was his theory. Moreover, relativity was difficult to understand and accept, especially amongst certain right-wing experimental physicists. Therefore, relativity was easy to reject, with the magical quantum world eagerly accepted by the Nazis. However, with Hitler's ability to understand science clearly strained and steadfast from childhood, together with his seething anti-Semitism, this decision set the Nazis on a research road very different from the Allies. As the decade progressed, so did the ridicules towards Jewish science through Einstein and his theory. This set in motion extreme anti-Semitic attacks on him by those extreme right-wing experimental physicists, many of whom would later find key roles in Hitler's government. As such, the theoretical physics

dominated by Jewish scientists was rejected en masse with key Jewish scientists dismissed from their academic posts. Instead the Third Reich favoured experimental or applied physics which shaped much of Hitler's war machine with the so-called magical interpretation of quantum mechanics and its apparent will over intelligence providing the basis for unconventional pseudo-scientific research like free energy, anti-gravity and hidden occultist physics through ancient texts. Through Hitler's key reforms in science and education and Heinrich Himmler's SS science became politicised with an added danger that certain areas were replaced with Nazi alternatives like pseudo-science, magic and the occult. The result was certain areas of true sciences became pseudo-sciences while the Third Reich's pseudo-sciences became the true sciences. Disciplines then became Aryan physics, Aryan chemistry, Aryan biology, Aryan mathematics and so on with all expected to prove their place within National Socialism or perish. From there science experienced an era of division and decline with loss of freedom and diversity, misapplication of innovation and the inevitable decline in some areas of the natural sciences especially physics and mathematics. By the war's end Himmler's SS had taken control of much of Nazi Germany's scientific research and with the unthinkable dawning on the Nazis that they might lose the war, Hitler placed SS General Hans Kammler in charge of producing new and unconventional wonder weapons even super weapons through his own think tank along the lines as Himmler's *Ahnenerbe*. Hitler's faith in Kammler meant he was promoted to only one rank below Himmler working with him in an intense effort to turn the war around especially following the D-Day landings. To the very end Hitler continued to declare these super weapons would save Nazi Germany but this led to intolerable strain on his generals when Hitler ordered troops to make last ditch attempts to protect certain locations. His generals did not fully understand and made no tactical sense as the Allies advanced on Berlin. Once again Hitler had failed to understand the true situation while Kammler and Himmler had their own plans in place. It is clear the foundations of Hitler's education and its support by like-minded Nazis set in place a destiny that helped the downfall of the Third Reich. Consequently over time the promised veneer of scientific and educational modernisation under his technocratic state suffered seriously and although this did not initially cause his government to collapse it neither allowed it to thrive anywhere close to the many promises he made to the German people. All this was a far cry from Germany's scientific research of the nineteenth century which saw staggering achievements up to Hitler's rise to power. These golden years built an unrivalled global reputation from the foundations of chemistry expanding into other scientific disciplines like physics and astronomy. In doing so Germany's economy flourished and by the early twentieth century over half of the Nobel Prizes were won by German scientists or German-speaking scientists many of whom were Jews. Although Hitler spoke of the golden years and promised to build upon them it was yet another broken promise based on his lack of scientific understanding and how science needed to do its job. With fleeing Jewish scientists and failures under a dictator focused on pseudo-science and seething anti-Semitism the Allies took full advantage of the destiny Hitler had created for himself.
