Slave Path II Francine Whittaker, 2004-07-01 **The Slave Path II** Francine Whittaker, 2010 **Numerical Methods in Contact Mechanics** Vladislav A. Yastrebov, 2013-02-13 Computational contact mechanics is a broad topic which brings together algorithmic geometrical optimization and numerical aspects for a robust fast and accurate treatment of contact problems This book covers all the basic ingredients of contact and computational contact mechanics from efficient contact detection algorithms and classical optimization methods to new developments in contact kinematics and resolution schemes for both sequential and parallel computer architectures The book is self contained and intended for people working on the implementation and improvement of contact algorithms in a finite element software Using a new tensor algebra the authors introduce some original notions in contact kinematics and extend the classical formulation of contact elements Some classical and new resolution methods for contact problems and associated ready to implement expressions are provided The Guiana Travels of Robert Schomburgk Volume II The Boundary Survey, 1840-1844 Peter Rivière, 2021-12-17 This is the second of a pair of volumes publishing the unedited full reports of Schomburgk s travels in Guiana between 1835 and 1844 previously available only in greatly abridged and heavily edited versions After his explorations in Guiana between 1835 and 1839 on behalf of the Royal Geographical Society which are the subject of Volume I of The Guiana Travels of Robert Schomburgk 1835 1844 Robert Schomburgk travelled to London He was appointed Her Majesty s Commissioner for Boundaries with the duty to survey the boundaries of British Guiana hitherto undefined His surveys between 1841 and 1843 consisted of three journeys The first took him to the mouth of the Orinoco River from where he traced the boundary south westward to the Cuyuni River before returning to Georgetown The second journey involved the survey of the boundary with Brazil first south to the sources of the Takutu River and then north to Mount Roraima In the third he covered the boundary with Dutch Guiana modern Surinam which involved an arduous trip down the length of the Corentyne River Schomburgk returned to London in 1844 and was knighted for his services Volume II of The Guiana Travels contains his reports of these journeys In abbreviated form they appeared in the Journal of the Royal Geographical Society Here they are published in full including the material censored by the Colonial Office which mainly details abuses of the native population committed by Venezuelans and Brazilians In an Epilogue an account is provided of his later career The volume also includes two appendices a summary of the boundary disputes which arose as a result of Schomburgk s survey and a vocabulary of vernacular plant names **Plant Intelligent Automation and Digital Transformation Volume II** Swapan Basu, 2024-08-11 Plant Intelligent Automation and Digital Transformation Volume II Control and Monitoring Hardware and Software is an expansive four volume collection that reviews every major aspect of the intelligent automation and digital transformation of power process and manufacturing plants including specific control and automation systems pertinent to various power process plants using manufacturing and factory automation systems The book reviews the key role of

management Information systems MIS HMI and alarm systems in plant automation in systemic digitalization covering hardware and software implementations for embedded microcontrollers FPGA and operator and engineering stations Chapters address plant lifecycle considerations inclusive of plant hazards and risk analysis Finally the book discusses industry 4 0 factory automation as a component of digitalization strategies as well as digital transformation of power plants process plants and manufacturing industries Reviews supervisory control and data acquisitions SCADA systems for real time plant data analysis Provides practitioner perspectives on operational implementation including human machine interface operator workstation and engineering workstations Covers alarm and alarm management systems including lifecycle considerations Fully covers risk analysis and assessment including safety lifecycle and relevant safety instrumentation

DCIS2002 Salvador Bracho del Pino,Mar Martínez,Teresa Riesgo,Miguel Ángel Allende Recio,2002 Este libro contiene las presentaciones de la XVII Conferencia de Diseño de Circuitos y Sistemas Integrados celebrado en el Palacio de la Magdalena Santander en noviembre de 2002 Esta Conferencia ha alcanzado un alto nivel de calidad como consecuencia de su tradición y madurez que lo convierte en uno de los acontecimientos más importantes para los circuitos de microelectrónica y la comunidad de diseño de sistemas en el sur de Europa Desde su origen tiene una gran contribución de Universidades españolas aunque hoy los autores participan desde catorce países

High-Performance Backbone Network Technology Naoaki Yamanaka,2020-04-01 Compiling the most influential papers from the IEICE Transactions in Communications High Performance Backbone Network Technology examines critical breakthroughs in the design and provision of effective public service networks in areas including traffic control telephone service real time video transfer voice and image transmission for a content delivery network CDN and Internet access The contributors explore system structures experimental prototypes and field trials that herald the development of new IP networks that offer quality of service QoS as well as enhanced security reliability and function Offers many hints and guidelines for future research in IP and photonic backbone network technologies

Long-Range Dependent Processes: Theory and Applications Ming Li,Carlo Cattani,2022-12-05

Microelectronics, Electromagnetics and Telecommunications Ganapati Panda,Suresh Chandra Satapathy,Birendra Biswal,Ramesh Bansal,2018-11-02 The book discusses the latest developments and outlines future trends in the fields of microelectronics electromagnetics and telecommunication It contains original research works presented at the International Conference on Microelectronics Electromagnetics and Telecommunication ICMEET 2018 organised by GVP College of Engineering A Andhra Pradesh India The respective papers were written by scientists research scholars and practitioners from leading universities engineering colleges and R D institutes from all over the world and share the latest breakthroughs in and promising solutions to the most important issues facing today's society

Practical Industrial Data Networks Steve Mackay,2004-04-19 There are many data communications titles covering design installation etc but almost none that specifically focus on industrial networks which are an essential part of the day to day work of industrial control systems

engineers and the main focus of an increasingly large group of network specialists The focus of this book makes it uniquely relevant to control engineers and network designers working in this area The industrial application of networking is explored in terms of design installation and troubleshooting building the skills required to identify prevent and fix common industrial data communications problems both at the design stage and in the maintenance phase The focus of this book is outside the box The emphasis goes beyond typical communications issues and theory to provide the necessary toolkit of knowledge to solve industrial communications problems covering RS 232 RS 485 Modbus Fieldbus DeviceNet Ethernet and TCP IP The idea of the book is that in reading it you should be able to walk onto your plant or facility and troubleshoot and fix communications problems as quickly as possible This book is the only title that addresses the nuts and bolts issues involved in design installation and troubleshooting that are the day to day concern of engineers and network specialists working in industry Provides a unique focus on the industrial application of data networks Emphasis goes beyond typical communications issues and theory to provide the necessary toolkit of knowledge to solve industrial communications problems Provides the tools to allow engineers in various plants or facilities to troubleshoot and fix communications problems as quickly as possible

Sparks,2021-03-03 An international comparative study of a mode of emancipation that worked to reinforce the institution of slavery Manumission the act of freeing a slave while the institution of slavery continues has received relatively little scholarly attention as compared to other aspects of slavery and emancipation To address this gap editors Rosemary Brana Shute and Randy J Sparks present a volume of essays that comprise the first ever comparative study of manumission as it affected slave systems on both sides of the Atlantic In this landmark volume an international group of scholars consider the history and implications of manumission from the medieval period to the late nineteenth century as the phenomenon manifested itself in the Old World and the New The contributors demonstrate that although the means of manumission varied greatly across the Atlantic world in every instance the act served to reinforce the sovereign power structures inherent in the institution of slavery In some societies only a master had the authority to manumit slaves while in others the state might grant freedom or it might be purchased Regardless of the source of manumission the result was viewed by its society as a benevolent act intended to bind the freed slave to his or her former master through gratitude if no longer through direct ownership The possibility of manumission worked to inspire faithful servitude among slaves while simultaneously solidifying the legitimacy of their ownership The essayists compare the legacy of manumission in medieval Europe the Jewish communities of Levant Europe and the New World the Dutch French and British colonies and the antebellum United States while exploring wider patterns that extended beyond a single location or era They also document the fates of manumitted slaves some of whom were accepted into freed segments of their societies while others were expected to vacate their former communities entirely The contributors investigate the cultural consequences of manumission as well as the changing economic conditions that limited the practice by the eighteenth century to understand better the social implications of this multifaceted aspect of the system of slavery **NBS Special Publication** ,1972 *Current Perspectives in the Archaeology of Ghana* Anquandah, James,Kankpeyeng, Benjamin,2015-04-26 This collection of essays on archaeology and heritage studies is authored by local and expatriate scholars who are either past or current practitioners in archaeological work in Ghana They are from Ghana UK US and Canada The subject matter covered includes the history and evolution of the discipline in Ghana the method and theory or how to do it in archaeology field research reports and syntheses on findings from past and recent investigations The eclectic or multidisciplinary strategy has been the research vogue in Ghanaian archaeology recently and this is reflected in the various chapters The essays engage with current theoretical trends in global archaeology and also focus on the role and

status of archaeology as a discipline in Ghanaian society today Archaeology is a relatively novel subject to many in Ghana This Reader will therefore be a huge asset to local students and experts alike Foreign scholars will also find it very useful
