*Sleeping Beauty* Stanley B. Burns,1990      **Sleeping Beauty III** Stanley B. Burns,2011 *Sleeping Beauty III Memorial Photography The Children* includes over 125 post mortem photographs from photography s earliest era through the present The historic images are classic representations of American and European memorial cultural traditions and the modern are contemporary practices of bereavement and memorialization It is used as a reference for bereavement organizations photographers hospital staff and parents engaged in renewing the practice of memorial photography      The Revival Styles in American Memorial Art Peggy McDowell,Richard E. Meyer,1994 From the late eighteenth through the early twentieth centuries a sweeping movement in architectural and decorative taste dominated Western cultures Known collectively by the descriptive term Revival Styles this phenomenon which left a rich visual legacy upon the cultural landscapes of many nations exhibited three primary manifestations Classical chiefly Greek and Roman Gothic or Medieval and Egyptian or Near Eastern In America for a variety of reasons a significantly large amount of the creative energy inherent in the Revival movement was directed towards the conception and erection of spectacular monuments and memorials to prominent Americans Frequently designed and executed by the leading architects and sculptors of the day the great majority of these strikingly beautiful artifacts and structures were placed in the large rural cemeteries of American cities developed in the middle decades of the nineteenth century where they remain for future generations to analyze and admire In this richly illustrated volume art historian Peggy McDowell and folklorist Richard E Meyer blend their respective disciplinary perspectives along with their shared long standing fascination with cemeteries and funerary material culture to provide a thoroughgoing descriptive analysis of this dramatic chapter in the history of American memorial art BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved      *Death, Modernity, and the Body* Eva Åhrén,2009 Originally published in Swedish in 2002 *Death Modernity and the Body* explores the impact of modernization on customs and practices surrounding the dead body in Sweden in the late nineteenth and early twentieth centuries This period of intense social and cultural change transformed Sweden from an agricultural society to a modern industrial state The book focuses on five arenas medical research and education displays of the dead body for entertainment purposes funerary preparations of the body memorial photography and cremation The book takes an original approach to the history of death in modern society by focusing on the dead body in intersecting cultural domains Medical scientific and technological history are thereby connected to popular culture social and political history as well as ethnography and anthropology The scholarly literature on the history of death is disproportionately focused on the Anglophone world France and Germany This study contributes to the scholarship by examining the case of Sweden where modernization was exceptionally rapid and pervasive and full of interesting particularities Book Jacket      *Anatomy Museum* Elizabeth Hallam,2016-06-15 The wild success of the traveling *Body Worlds* exhibition is testimony to the powerful allure that human bodies can have when opened up for display in gallery

spaces But while anatomy museums have shown their visitors much about bodies they themselves are something of an obscure phenomenon with their incredible technological developments and complex uses of visual images and the flesh itself remaining largely under researched This book investigates anatomy museums in Western settings revealing how they have operated in the often passionate pursuit of knowledge that inspires both fascination and fear Elizabeth Hallam explores these museums past and present showing how they display the human body whether naked stripped of skin completely dissected or rendered in the form of drawings three dimensional models x rays or films She identifies within anatomy museums a diverse array of related issues from the representation of deceased bodies in art to the aesthetics of science from body donation to techniques for preserving corpses and ritualized practices for disposing of the dead Probing these matters through in depth study Anatomy Museum unearths a strange and compelling cultural history of the spaces human bodies are made to occupy when displayed after death

**Touching Photographs** Margaret Olin,2012-05-21 Photography does more than simply represent the world It acts in the world connecting people to form relationships and shaping relationships to create communities In this beautiful book Margaret Olin explores photography s ability to touch us through a series of essays that shed new light on photography s role in the world Olin investigates the publication of photographs in mass media and literature the hanging of exhibitions the posting of photocopied photographs of lost loved ones in public spaces and the intense photographic activity of tourists at their destinations She moves from intimate relationships between viewers and photographs to interactions around larger communities analyzing how photography affects the way people handle cataclysmic events like 9 11 Along the way she shows us James VanDerZee s Harlem funeral portraits dusts off Roland Barthes s family album takes us into Walker Evans and James Agee s photo text Let Us Now Praise Famous Men and logs onto online photo albums With over one hundred illustrations Touching Photographs is an insightful contribution to the theory of photography visual studies and art history [Bibliography of the History of Medicine](#) ,1993 [The Desperate Genealogist's Idea Book: Creative Ways to Outsmart Your Elusive Ancestors](#) ,2006 [The Sacred Remains](#) Gary

Laderman,1996-01-01 A primary goal of this study is to shed some light on how changing attitudes toward death and the dead in the previous century have led to present day perspectives and practices Page 1 **The Photographic Uncanny**

Claire Raymond,2019-11-23 This book argues for a renewed understanding of the fundamentally uncanny quality of the medium of photography It especially makes the case for the capacity of certain photographs precisely through their uncanniness to contest structures of political and social dominance The uncanny as a quality that unsettles the perception of home emerges as a symptom of modern and contemporary society and also as an aesthetic apparatus by which some key photographs critique the hegemony of capitalist and industrialist domains The book s historical scope is large beginning with William Henry Fox Talbot and closing with contemporary indigenous photographer Bear Allison and contemporary African American photographer Devin Allen Through close readings exegesis of individual photographs and careful deployment of

contemporary political and aesthetic theory The Photographic Uncanny argues for a re envisioning of the political capacity of photography to expose the haunted homeless condition of modernity      **Wasted: Performing Addiction in America** Heath A. Diehl, 2016-02-17 Departing from the scholarly treatment of addiction as a form of rhetoric or discursive formation Wasted Performing Addiction in America focuses on the material lived experience of addiction and the ways in which it is shaped by a metaphor of waste from the manner in which people describe the addict the experience of inebriation or his or her systematic exclusion from various aspects of American culture With analyses of scientific and popular cultural texts such as novels and films scholarly or medical models of addiction reality television TV drama public health and anti addiction campaigns and the lives of celebrities who struggled with addiction this book recovers the sense of materiality in which the experience of substance abuse is anchored revealing addiction to be a set of socio cultural practices historically contingent events and behaviours Exploring the ways in which addiction as an identity construct as a social problem and as a lived experience is always and already circumscribed by the metaphor of waste Wasted Performing Addiction in America advances the idea that addiction constitutes a site of social control beyond the individual through which American citizenship is regulated and the nation itself is imagined demarcated and contained As such it will appeal to scholars of popular culture cultural and media studies performance studies sociology and American culture      **Encyclopedia of Death and Dying** Glennys

Howarth, Oliver Leaman, 2003-12-16 In recent years there has been a massive upsurge in academic professional and lay interest in mortality This is reflected in academic and professional literature in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field This Encyclopedia answers that need The Encyclopedia of Death and Dying consolidates and contextualizes the disparate research that has been carried out to date The phenomena of death and dying and its related concepts are explored and explained in depth from the approaches of varied disciplines and related professions in the arts social sciences humanities medicine and the sciences In addition to scholars and students in the field from anthropologists and sociologists to art and social historians the Encyclopedia will be of interest to other professionals and practitioners whose work brings them into contact with dying dead and bereaved people It will be welcomed as the definitive death and dying reference source and an essential tool for teaching research and independent study      Death and Dying in New Mexico Martina Will, 2022-06-30 In this exploration of how people lived and died in eighteenth and nineteenth century New Mexico Martina Will weaves together the stories of individuals and communities in this cultural crossroads of the American Southwest The wills and burial registers at the heart of this study provide insights into the variety of ways in which death was understood by New Mexicans living in a period of profound social and political transitions This volume

addresses the model of the good death that settlers and friars brought with them to New Mexico challenges to the model's application and the eventual erosion of the ideal The text also considers the effects of public health legislation that sought to protect the public welfare as well as responses to these controversial and unpopular reforms Will discusses both cultural continuity and regional adaptation examining Spanish American deathways in New Mexico during the colonial approximately 1700 1821 Mexican 1821 1848 and early Territorial 1848 1880 periods Humane Insight Courtney R. Baker, 2015-08-30 In the history of black America the image of the mortal wounded and dead black body has long been looked at by others from a safe distance Courtney Baker questions the relationship between the spectator and victim and urges viewers to move beyond the safety of the gaze to cultivate a capacity for humane insight toward representations of human suffering Utilizing the visual studies concept termed the look Baker interrogates how the notion of humanity was articulated and recognized in oft referenced moments within the African American experience the graphic brutality of the 1834 Lalande affair the photographic exhibition of lynching Without Sanctuary Emmett Till's murder and funeral and the devastation caused by Hurricane Katrina Contemplating these and other episodes Baker traces how proponents of black freedom and dignity used the visual display of violence against the black body to galvanize action against racial injustice An innovative cultural study that connects visual theory to African American history Humane Insight asserts the importance of ethics in our analysis of race and visual culture and reveals how representations of pain can become the currency of black liberation from injustice

Representing Death in the News F. Hanusch, 2010-08-11 This new study maps and synthesizes existing research on the ways in which journalism deals with death Folker Hanusch provides a historical overview of death in the news looks at the conditions of production content and reception and also analyzes emerging trends in the representation of death online

*Technologies of the Human Corpse* John Troyer, 2021-08-03 One of our greatest thinkers on death presents a radical new approach to thinking about dying and the human corpse Caitlin Doughty mortician and bestselling author of *Smoke Gets in Your Eyes* A fascinating exploration of the relationship between technology and the human corpse throughout history from 19th century embalming machines to 21st century death prevention technologies Death and the dead body have never been more alive in the public imagination not least because of current debates over modern medical technology that is deployed it seems expressly to keep human bodies from dying blurring the boundary between alive and dead In this book John Troyer examines the relationship of the dead body with technology both material and conceptual the physical machines political concepts and sovereign institutions that humans use to classify organize repurpose and transform the human corpse Doing so he asks readers to think about death dying and dead bodies in radically different ways Troyer explains for example how technologies of the nineteenth century including embalming and photography created our image of a dead body as quasi atemporal existing outside biological limits formerly enforced by decomposition He describes the Happy Death Movement of the 1970s the politics of HIV AIDS corpse and the productive potential of the dead body the provocations of the Body Worlds

exhibits and their use of preserved dead bodies the black market in human body parts and the transformation of historic technologies of the human corpse into death prevention technologies The consequences of total control over death and the dead body Troyer argues are not liberation but the abandonment of Homo sapiens as a concept and a species In this unique work Troyer forces us to consider the increasing overlap between politics dying and the dead body in both general and specifically personal terms

**Bodies of Stone in the Media, Visual Culture and the Arts** Alessandra Violi, Barbara Grespi, Andrea Pinotti, Pietro Conte, 2025-10-01 If mediatization has surprisingly revealed the secret life of inert matter and the face of things the flipside of this has been the petrification of living organisms an invasion of stone bodies in a state of suspended animation Within a contemporary imaginary pervaded by new forms of animism the paradigm of death looms large in many areas of artistic experimentation pushing the modern body towards mineral modes of being which revive ancient myths of flesh made stone and the issue of the monument Scholars in media visual culture and the arts propose studies of bodies of stone from actors simulating statues to the transmutation of the filmic body into a fossil from the real treatment of the cadaver as a mineral living object to the rediscovery of materials such as wax from the quest for a thermal equivalence between stone and flesh to the transformation of the biomedical body into a living monument

**Battle Lines** Eliza Richards, 2018-10-02 During the U S Civil War a combination of innovative technologies and catastrophic events stimulated the development of news media into a central cultural force Reacting to the dramatic increases in news reportage and circulation poets responded to an urgent need to make their work immediately relevant to current events As poetry's compressed forms traveled more quickly and easily than stories novels or essays through ephemeral print media it moved alongside and engaged with news reports often taking on the task of imagining the mental states of readers on receiving accounts from the war front Newspaper and magazine poetry had long editorialized on political happenings Indian wars slavery and abolition prison reform women's rights but the unprecedented scope of what has been called the first modern war and the centrality of the issues involved for national futures generated a powerful sense of single mindedness among readers and writers that altered the terms of poetic expression In *Battle Lines* Eliza Richards charts the transformation of Civil War poetry arguing that it was fueled by a symbiotic relationship between the development of mass media networks and modern warfare Focusing primarily on the North Richards explores how poets working in this new environment mediated events via received literary traditions Collectively and with a remarkable consistency poems pulled out key features of events and drew on common tropes and practices to mythologize commemorate and ponder the consequences of distant battles The lines of communication reached outward through newspapers and magazines to writers such as Dickinson Whitman and Melville who drew their inspiration from their peers poetic practices and reconfigured them in ways that bear the traces of their engagements
