Slipping Away Mark Moberg, 2008 During the 1990s the Eastern Caribbean was caught in a bitter trade dispute between the US and EU over the European banana market When the World Trade Organization rejected preferential access for Caribbean growers in 1998 the effect on the region s rural communities was devastating This volume examines the banana wars from the vantage point of St Lucia s Mabouya Valley whose recent turbulent history reveals the impact of global forces The author investigates how the contemporary structure of the island s banana industry originated in colonial policies to create a politically stable peasantry followed by politicians efforts to mobilize rural voters These political strategies left farmers dependent on institutional and market protection leaving them vulnerable to any alteration in trade policy This history gave way to a new harsh reality in which neoliberal policies privilege price and quantity over human rights and the environment However against these challenges the author shows how the rural poor have responded in creative ways including new social movements and Fair Trade farming in order to negotiate a stronger position for themselves in a shifting global economy **BOOK JACKET**

**Implosive Therapy** Patrick A. Boudewyns,2012-12-06 Behavior therapists often desensitize clients by exposing them to an anxiety eliciting stimulus such as a phobic object The premise is that repeated exposures will eventually reduce or extinguish the fear This process is called therapeutic exposure Many therapists would agree that therapeutic exposure is an effective treatment for several anxiety disorders However the directness with which therapeutic exposure should be encouraged for a client is much debated Many feel that direct therapeutic exposure more commonly known as flooding or implosive therapy causes clients an excessive amount of anxiety and may therefore produce long lasting and harmful side effects In response to these concerns one well known behavior therapy technique systematic desensitization was designed to expose clients to imagined fear stimuli slowly and under relaxing conditions so as not to elicit anxiety In the first chapter of this book we show

that these concerns are based on false assumptions When used properly direct therapeutic exposure is not harmful In Chapters 2 and 3 we review the literature on the process and outcome of flooding and implosive therapy from a practical clinical perspective This literature shows that these treatments are effective and efficient for certain psychiatric disorders In Chapter 4 we describe the treatments we offer our clients and show how learning theory can be used to help develop the procedure and content of therapy Chapter 5 provides case examples with transcripts of typical therapy sessions This book can be used as a handbook for therapists or students
