

Slips of the Tongue

- A speech error, commonly referred to as a slip of the tongue, is a deviation (conscious or unconscious) from the apparently intended form of an utterance.
- Errors in speech production and perception are also called *performance errors*.
- Speech errors are made on an occasional basis by all speakers. They occur more often when speakers are nervous, tired, anxious or intoxicated.

Slips Of The Tongue:

Slips of the Tongue Nanda Poulisse, 1999-01-01 This book reports the results of an extensive study of slips of the tongue produced by foreign language L2 learners at different levels of proficiency. Thus it provides new data which can be used to test current monolingual models of speech production and to further the development of bilingual speech production models. Moreover, it offers a new approach to the study of second language acquisition. The book contains a detailed survey of the findings of L1 slip research, including studies of slips produced by child L1 learners. It systematically compares these findings to those of the current L2 study and relates them to recent monolingual and bilingual models of speech production and to several cognitive models of second language acquisition. Special features of the book are its emphasis on methodological problems and the inclusion of the complete L2 corpus of 2000 slips of the tongue. It is expected that the book will be of interest to researchers and advanced students in the areas of speech production and second language acquisition and particularly to those who would like to test their own hypotheses using the L2 data. Summary of the contents of the book: The book provides an overview of the key findings in L1 slip research. It relates L1 findings to monolingual speech production models. It gives a detailed survey of studies of slips produced by children. It presents an up-to-date review of bilingual speech production models. It discusses recent cognitive models of second language acquisition. It gives a detailed description of an extensive research project on slips of the tongue produced by Dutch learners of English. The L2 slip corpus is tape-recorded. It discusses methodological problems in L1 slip research. It systematically compares the L1 findings to those of the L2 slip project. It relates the findings to monolingual and bilingual models of speech production and to cognitive models of second language acquisition. It makes the data available in the appendix.

Slips of the Tongue - A Classification

Maria Dziekonska, 2012-01-14 Seminar paper from the year 2009 in the subject English Language and Literature Studies / Linguistics, grade 1.3 University of Heidelberg / Anglistisches Seminar course: Slips of the tongue language: English abstract: Whenever people fail to utter the message they wanted to convey correctly, they apologize and tend to explain their accidental mistake as a slip of the tongue. However, what is meant and covered by this term, which is used so often to refer to speech errors, does its universality suggest that all tongue slips are of the same kind? If not, how can they be distinguished? This term paper will try to give a more detailed categorization of speech anomalies, first providing a definition of what is generally seen as a slip of the tongue. It will be shown who were the first linguists to examine this topic and what discoveries were made. In order to give an own precise classification of speech errors, different approaches for main categorizations will be presented and taken into consideration. On the basis of these main categories, further sub-categories are elaborated and illustrated with examples given by different authors in order to explain every feature appropriately. Since many authors still do not agree upon a common sub-classification, this term paper will select the most suitable terms and definitions, try to compromise about the most common ones, and give suggestions for further distinctions. To be conforming to the majority of the literature, the most

common terminology shall be used However if provided terms are inappropriate or imprecise they will be modified The types of speech errors will be ordered via the main class they belong to They will be presented as sub classes defined explained and illustrated by examples in detail Examples are marked with ordinals The incorrect utterance is always presented with an asterisk and followed by the proper realization in brackets The pronunciation of the slips is written in graphemes i e normally w

Kids' Slips Jeri J. Jaeger, 2004-12-13 The study of speech errors or slips of the tongue is a time honored methodology which serves as a window to the representation and processing of language and has proven to be the most reliable source of data for building theories of speech production planning However until Kids Slips there has never been a corpus of such errors from children with which to work This is the first developmental linguistics research volume to document how online processing is revealed in young children ages 18 months through 5 years through their slips of the tongue Thus this text provides a new methodology and data source which will greatly expand our ability to uncover the details of early language development Professor Jaeger's groundbreaking book incorporates both details of her methodology and findings with implications for different aspects of language development including phonetics and phonology the lexicon semantics morphology and syntax While all the child data is included in the book a Web site hosted by the author provides readers with the adult data as well Kids Slips targets those who study language development in linguistics developmental psychology and speech and hearing as well as those who study language representation and processing more generally in the same disciplines

Introductory Lectures on Psychoanalysis Sigmund Freud, 1977 In reasoned progression he outlined core psychoanalytic concepts such as repression free association and libido

Of the various English translations of Freud's major works to appear in his lifetime only one was authorized by Freud himself. The Standard Edition of the Complete Psychological Works of Sigmund Freud under the general editorship of James Strachey. Freud approved the overall editorial plan, specific renderings of key words and phrases and the addition of valuable notes from bibliographical and explanatory. Many of the translations were done by Strachey himself, the rest were prepared under his supervision. The result was to place the Standard Edition in a position of unquestioned supremacy over all other existing versions. Newly designed in a uniform format, each new paperback in the Standard Edition opens with a biographical essay on Freud's life and work along with a note on the individual volume by Peter Gay, Sterling Professor of History at Yale. **A**

Cross-linguistic Comparison of Slips of the Tongue Thomas Berg, 1987. [The Constitution of Society](#) Anthony Giddens, 1986-03-25. It is likely that this book will be regarded as the most important piece of grand sociological theory in English of the past decade. Mark Poster, University of California. This book will take its place alongside such major statements of sociological theory as those of Parsons and Habermas. Anyone interested in the state of the social sciences today, the character of social theory or the relevance of philosophy to social theory will now find it essential to grapple with Giddens's bold and incisive book. Richard Bernstein, Haverford College, USA. Anthony Giddens's new book is the fullest presentation yet of his theoretical views; it has the lean, sparse, utterly serious, craftsmanlike qualities we have learned to expect from its author and which make it a real pleasure to read. Dennis Wrong, Times Higher Education Supplement. *Perspectives on Arabic Linguistics XVII-XVIII* Mohammad T. Alhawary, Elabbas Benmamoun, 2005-01-01. The papers in this volume are a selection from papers presented at the Annual Symposia on Arabic Linguistics held in 2003, Alexandria and 2004, Oklahoma. They tackle a broad range of issues in current linguistic research, particularly in the areas of phonology, morphology, lexicon, sociolinguistics and L1 and L2 acquisition. They are distinguished for the depth of coverage and the types of data considered.

[Freudian Slip](#) Sebastiano Timpanaro, 2025-01-31. Philology cross-examines Freud in this sustained critique of psychoanalysis and its foundational notion of the slip. Challenging virtually every account of linguistic error in Freud's work as arbitrary and constrained, Sebastiano Timpanaro advances an alternative picture keyed to the dynamics of banalization, disimprovement and contextual play borrowed from the field of literary criticism. Underscored with a Marxist defense of science against the professed materialism of the psychoanalytic individual drama, Timpanaro's analysis demands a strong reassessment of the Freudian legacy and a renewed debate over its value for the Left. *Clinical Psychoanalysis* Shelley Orgel, Bernard D.
