the structure and development of the engineering profession in France German Sweden and England Central issues include
the number of engineers in a particular society their education and fields of work after education the social background of
the engineer their social standing the role of the state in technical education and the development and role of the
engineering organisations in various respects The study shows that in three of the four countries engineers achieved
professional status rapidly and became members of their country s establishment In the fourth England not only did properly
qualified engineers enjoy a considerably lower social status but in numbers they were far fewer than in other parts of Europe
The author discusses this inadequacy in terms of industrial output and development *Using the Engineering Literature*
