Social Influences and Socialization in Infancy S. Feinman, Michael Lewis, 2013-06-29 How are we to understand the complex forces that shape human behavior A variety of diverse perspectives drawing on studies of human behavioral ontogeny as well as humanity's evolutionary heritage seem to provide the best likelihood of success It is in an attempt to synthesize such potentially disparate approaches to human development into an integrated whole that we undertake this series on the genesis of behavior In many respects the incredible burgeoning of research in child development over the last two decades or so seems like a thousand lines of inquiry spreading outward in an incoherent starburst of effort The need exists to provide on an ongoing basis an arena of discourse within which the threads of continuity among those diverse lines of research on human development can be woven into a fabric of meaning and understanding Scientists scholars and those who attempt to translate their efforts into the practical realities of the care and guidance of infants and children are the audience that we seek to reach Each requires the opportunity to see to the degree that our knowledge in given areas permits various aspects of development in a coherent integrated fashion It is hoped that this series which brings together research on infant biology developing infant capacities animal models and impact of social cultural and familial forces on

development and the distorted products of such forces under certain circumstances serves these important social and scientific needs

The Social Influence Processes James T. Tedeschi, 2017-07-12 Social psychologists have always been concerned with two person interactions and the factors enabling one person to gain dominance Although social psychology has devised a revolutionary set of techniques to investigate the phenomenon of power hypotheses are too often ambiguously stated research programs end in cul de sacs and experiments take on the character of one shot studies In an attempt to stimulate new directions in research and to provide cumulative emphasis on the development of scientific theory in the area of power relations Tedeschi has assembled original and path breaking essays from a dozen outstanding scholars and researchers in the behavioral sciences More tightly integrated than leading books in the field of power relations The Social Influence Processes focuses on two person interactions A full explanation of the terms power and influence is followed by an analysis of the major variables in connections between two persons that must be taken into account in a scientific theory of social influence The subsequent chapters respond to the categories established attempting a comprehensive construction of social reality and offering suggestions and techniques for measuring and ordering its complexity Particular areas of research and theory are isolated for consideration in depth such topics as personality as a power construct Power and Personality by Henry L Minton influence in exchange theory The Tactical Use of Social Power by Andrew Michener and Robert W Suchner and leadership through charisma Interpersonal Attraction and Social Influence by Elaine Walster and Darcy Abrahams In the final chapter Tedeschi Thomas Bonoma and Barry R Schlenker attempt to provide a general theory of social influence processes as they affect the target individual by reviewing the research literature in their own theoretical terms This remarkable volume will be of interest to students as well
