Social Interest And Categorical Structure:

Social Interest and Categorical Structure Jeffers Ward Chertok, 1990 This volume explores diverse sociological conceptions of history and social change The diversity of views is explained in terms of the relationship between social interest and the categorical structure of social thought and is illustrated by examples from the works of Robert A Nisbet and Harry Braverman Socially structured variations of the general relationship are identified and explored **Right, Power, and Faquanism** Zhiwei Tong, 2018-08-13 In *Right Power and Faquanism* Tong Zhiwei proposes that right and power are ultimately a unified entity which can be named faquan and that the purpose of law should be to establish a balanced faquan structure and to promote its preservation and proliferation Faquan is thus a jurisprudential category reflecting the understanding of the unity of right and power It has interest protected by the law and property with defined ownership as its content and manifests itself as the external forms of jural right freedom liberty jural power public function authority competence privilege and immunity etc Faquanism relies mainly on six basic concepts faquan right power quan residual quan and duty to analyze the content of interests and property in all legal phenomena *Theory of Social Choice on Networks* Wynn C. Stirling, 2016-09-22 Classical social choice theory relies heavily on the assumption that all individuals have fixed preference orderings This highly original book presents a new theory of social preferences that explicitly accounts for important social phenomena such as coordination compromise negotiation and altruism Drawing on cybernetics and network theory it extends classical social choice theory by constructing a framework that allows for dynamic preferences that are modulated by the situation dependent social influence that they exert on each other In this way the book shows how members of a social network may modulate their preferences to account for social context This important expansion of social choice theory will be of interest to readers in a wide variety of disciplines including economists and political scientists concerned with choice theory as well as computer scientists and engineers working on network theory **Gender and Power** Raewyn Connell, 2014-05-15 This book is an important introductory textbook on sexual politics and an original contribution to the reformulation of social and political theory In a discussion of among other issues psychoanalysis Marxism and feminist theories the structure of gender relations and working class feminism Connell has produced a major work of synthesis and scholarship which will be of unique value to students and professionals in sociology politics women s studies and to anyone interested in the field of sexual politics Visit www.raewynconnell.net **Science and the Sociology of Knowledge (RLE Social Theory)** Michael Mulkay, 2014-08-07 How far is scientific knowledge a product of social life In addressing this question the major contributors to the sociology of knowledge have agreed that the conclusions of science are dependent on social action only in a very special and limited sense In *Science and the Sociology of Knowledge* Michael Mulkay s first aim is to identify the philosophical assumptions which have led to this view of science as special and to present a systematic critique of the standard philosophical account of science showing that there are no valid epistemological grounds for

excluding scientific knowledge from the scope of sociological analysis The rest of the book is devoted to developing a preliminary interpretation of the social creation of scientific knowledge The processes of knowledge creation are delineated through a close examination of recent case studies of scientific developments Dr Mulkay argues that knowledge is produced by means of negotiation the outcome of which depends on the participants use of social as well as technical resources The analysis also shows how cultural resources are taken over from the broader social milieu and incorporated into the body of certified knowledge and how in the political context of society at large scientists technical as well as social claims are conditioned and affected by their social position *The New Institutionalism in Organizational Analysis* Walter W.

Powell, Paul J. DiMaggio, 2012-09-21 Long a fruitful area of scrutiny for students of organizations the study of institutions is undergoing a renaissance in contemporary social science This volume offers for the first time both often cited foundation works and the latest writings of scholars associated with the institutional approach to organization analysis In their introduction the editors discuss points of convergence and disagreement with institutionally oriented research in economics and political science and locate the institutional approach in relation to major developments in contemporary sociological theory Several chapters consolidate the theoretical advances of the past decade identify and clarify the paradigm s key ambiguities and push the theoretical agenda in novel ways by developing sophisticated arguments about the linkage between institutional patterns and forms of social structure The empirical studies that follow involving such diverse topics as mental health clinics art museums large corporations civil service systems and national politics illustrate the explanatory power of institutional theory in the analysis of organizational change Required reading for anyone interested in the sociology of organizations the volume should appeal to scholars concerned with culture political institutions and social change *Film Cultures* Janet Harbord, 2002-09-20 *Film Cultures* is thought provoking and challenging By opening film theory up to the many simultaneous networks of relation that is the cultures of film it asks both viewer and student to take film more seriously

Communication Research Trends *Film Cultures* weaves together insights from cultural theory and film studies to provide a complex and absorbing theoretical account of contemporary film culture Harbord writes with authority imagination and wit and her delicate deployment of modernist and postmodernist cultural accounts makes rewarding reading Christine Geraghty Professor of Film and Television University of Glasgow *Film Cultures* argues that our tastes for film connect us to social spatial and temporal networks of exchange and meaning Whether we view film in the multiplex arthouse or the gallery as cinema premiere video hire or from a cable channel whether we approach film as a singular object or a hypertext linked to ancillary products our relationship to film is inhabiting a culture Shifting the focus of film analysis from the text to paths of circulation *Film Cultures* questions how film connects us to social status and national and global affiliations **The**

Cumulative Book Index, 1990 A world list of books in the English language **The Archaeology of Contextual Meanings** Ian Hodder, 1987-08-06 This companion volume to *Archaeology as Long term History* focuses on the symbolism of

artefacts It seeks at once to refine the theory and method relating to interpretation and show with examples how to conduct this sort of archaeological work Some contributors work with the material culture of modern times or the historic period areas in which the symbolism of mute artefacts has traditionally been thought most accessible However the book also contains a good number of applications in prehistory to demonstrate the feasibility of symbolic interpretation where good contextual data survive from the distant past In relation to wider debates within the social sciences the volume is characterised by a concern to place abstract symbolic codes within their historical context and within the contexts of social actions In this respect it develops further some of the ideas presented in Dr Hodder's *Symbolic and Structural Archaeology* an earlier volume in this series

A Theory of Legal Sentences Manuel Atienza, J. Ruiz Manero, 2012-12-06 Legal statements are according to the authors the most basic elements of the law Nevertheless they must be considered not only as the pieces of a puzzle but also as the components of a dynamic and highly complex reality the law of contemporary society The book presents an analysis of the different types of legal statements mandatory rules principles power conferring rules definitions permissions values and the rule of recognition from a threefold perspective that is considering their logical structure their function in legal reasoning as reasons for action and their connections with the interests and power relationships among the individuals and the social groups The result is conceived as a first step in the building of a general theory of law designed not as an isolated discourse but as a decisive element for the dynamization of the legal culture
