Zuckerman, 1981-07-01 **Developing a Social Psychology of Monkeys and Apes** John Chadwick-Jones, 2000-03-02 The aim of this text is to draw attention to the exciting progress of contemporary studies of the social psychology of monkeys and apes It is written with a clear style which should invite interest from a wide range of social scientists The relatedness of humans and non human primates that is usually considered in its genetic forms is followed through into the complex social tactics of monkeys and apes The focus of the book is on the latest research as it has developed out of earlier classic studies The current wave of researchers working on social topics is especially emphasised This book will be of particular interest to primatologists ethologists anthropologists zoologists social psychologists and students of social cognition and social interaction For students the appendices provide useful information on the variety of social structures of Old World and New World monkeys and apes **The Social Life of Monkeys and Apes (International Library of Psychology, Philosophy and Scientific Method)**. Solly Zuckerman, *The Social life monkeys and apes* Steven H. Zuckerman, 1981 **Sexual Selection and the Descent of Man** Bernard Campbell, 2017-07-12 Just over one hundred and thirty years ago Charles Darwin in *The Descent of Man and Selection in Relation to Sex* 1871 developed remarkably accurate conclusions about man's ancestry based on a review of general comparative anatomy and psychology in which he regarded sexual selection as a necessary part of the evolutionary process But the attention of biologists turned to the more general concept of natural selection in which sexual selection plays a complex role that has been little understood This volume significantly broadens the scope of modern evolutionary biology by looking at this important and long neglected concept of great importance In this book which is the first full discussion of sexual selection since 1871 leading biologists bring modern genetic theory and behavior observation to bear on the subject The distinguished authors consider many aspects of sexual selection in many species including man within the context of contemporary evolutionary theory and research The result is a remarkably original and well rounded view of the whole concept that will be invaluable especially to students of evolution and human sexual behavior The lucid authority of the contributors and the importance of the topic will interest all who share in man's

perennial fascination with his own history The book will be of central importance to a wide variety of professionals including biologists anthropologists and geneticists It will be an invaluable supplementary text for courses in vertebrate biology theory of evolution genetics and physical anthropology It is especially important with the emergence of alternative explanations of human development under the rubric of creationism and doctrines of intelligent design **The Evolution of Culture** Leslie A White, 2016-06-16

One of the major works of twentieth century anthropological theory written by one of the discipline's most important complex and controversial figures has not been in print for several years Now Evolution of Culture is again available in paperback allowing today's generation of anthropologists new access to Leslie White's crucial contribution to the theory of cultural evolution A new substantial introduction by Robert Carneiro and Burton J Brown assess White's historical importance and continuing influence in the discipline White is credited with reintroducing evolution in a way that had a profound impact on our understanding of the relationship between technology ecology and culture in the development of civilizations A materialist he was particularly concerned with societies' ability to harness energy as an indicator of progress and his empirical analysis of this equation covers a vast historical span Fearlessly tackling the most fundamental questions of culture and society during the cold war White was frequently a lightning rod both inside and outside the academy His book will provoke equally potent debates today and is a key component of any course or reading list in anthropological or archaeological theory and cultural ecology Primitive Man, 1928 Anthropological Quarterly, 1928 Within Reason

Donald Calne, 2010-02-10 It has long been a central conviction of western humanistic thought that reason is the most godlike of human traits and that it makes us unique among animals Yet if reason directs what we do why is human behavior so often violent irrational and disastrous In Within Reason leading neurologist Donald B Calne investigates the phenomenon of rationality from an astonishingly wide array of scientific sociological and philosophical perspectives and shows that although reason evolved as a crucial tool for human survival it is an aspect of mind and brain which has no inherent moral or spiritual qualities and one whose relationship to our thoughts and actions may not be as central as we want to believe Learned lucid and always illuminating Within Reason brings together the latest developments in the science of mind with some of the most enduring questions of Western thought **Social Life of Early Man** S.L. Washburn, 2013-10-11 Attempting to reconstruct the life of early societies particular emphasis is laid upon social behaviour among primates as well as approaches from ethnology prehistoric archaeology geography genetics human stress biology and psychology First published in 1962

Missing the Revolution Jerome H. Barkow, 2005-12-01 In The Adapted Mind Jerome Barkow along with Leda Cosmides and John Tooby set out to redefine evolutionary psychology for the social sciences and to create a new agenda for the next generation of social scientists While biologically oriented psychologists quickly accepted the work social scientists in psychology and researchers in anthropology and sociology who deal with the same questions of human behavior were more resistant Missing the Revolution is an invitation to researchers from these disciplines who in Barkow's view have been

missing the great evolution revolution of our time to engage with Darwinian thought which is now so large a part of the non sociological study of human nature and society Barkow asks the reader to put aside the preconceptions and stereotypes social scientists often have of the biological and to take into account a powerful paradigm that is far away from those past generations who would invoke a vocabulary of genes and Darwin as justification for genocide The evolutionary perspective Barkow maintains provides no particular support for the status quo no rationalizations for racism or any other form of social inequality Cultural cannot possibly be opposed to biological because culture and society are the only means we have of expressing our evolved psychology social cultural constructionism is not only compatible with an evolutionary approach but demanded by it To marshal evidence for his argument Barkow has gathered together eminent scholars from a variety of disciplines to present applications of evolutionary psychology in a manner intended to illustrate their relevance to current concerns for social scientists The contributors include among others evolutionary psychologist Anne Campbell a Darwinian feminist who reaches out to feminist social constructionists sociologist Ulica Segarstr le who analyzes the opposition of the cultural left to Darwinism sociologist Bernd Baldus who criticizes evolutionists for ignoring agency criminologist Anthony Walsh who presents a biosocial criminology and primatologists Lars Rodseth and Shannon A Novak who reveal an unexpected uniqueness to human social organization Missing the Revolution is a challenge to scholars to think critically about a powerful social and intellectual movement which insists that the theoretical perspective that has been so successful when applied to the behavior of other animal species can be applied to our own

The Predatory Behavior of Wild Chimpanzees Geza Teleki, 1973 Geza Teleki has spent two years observing wild chimpanzees at very close quarters in the Gombe National Park of Tanzania He has compiled this report on predatory behavior based in part upon a decade of observations by a research team living in the park but primarily upon numerous episodes he observed since early 1968

Illustrated Theology and Evolutionary Anthropology Celia Deane-Drummond, Agustín Fuentes, 2020-01-29 This book sets out some of the latest scientific findings around the evolutionary development of religion and faith and then explores their theological implications This unique combination of perspectives raises fascinating questions about the characteristics that are considered integral for a flourishing social and religious life and allows us to start to ask where in the evolutionary record they first show up in a distinctly human manner The book builds a case for connecting theology and evolutionary anthropology using both historical and contemporary sources of knowledge to try and understand the origins of wisdom humility and grace in deep time In the section on wisdom the book examines the origins of complex decision making in humans through the archaeological record recent discoveries in evolutionary anthropology and the philosophical richness of semiotics The book then moves to an exploration of the origin of characteristics integral to the social life of small scale communities which then points in an indirect way to the disposition of humility Finally it investigates the theological dimensions of grace and considers how artefacts left behind in the material record by our human ancestors and the

perspective they reflect might inform contemporary concepts of grace This is a cutting edge volume that refuses to commit the errors of either too easy a synthesis or too facile a separation between science and religion As such it will be of interest to scholars of religious studies and theology especially those who interact with scientific fields as well as academics working in anthropology of religion
