The Charter of Fundamental Rights of the European Union and the Employment Relation Filip Dorssemont, Klaus Lörcher, Stefan Clauwaert, Mélanie Schmitt, 2019-04-04 The Charter of Fundamental Rights of the European Union is the most developed and comprehensive legally binding human rights instrument in the social field of the European Union It is becoming increasingly important and is the first instrument that includes both civil and political rights on one hand and social rights on the other Despite this the Court of Justice of the European Union has only rarely dealt with fundamental social rights In this context employment rights need to be examined in this new rights framework Following on from previous volumes setting out links between European labour law and fundamental social rights as enshrined in relevant UN ILO and Council of Europe instruments in this book the ETUI Transnational Trade Union Rights TTUR Expert Network examines the justiciability of social rights and critically analyses the effectiveness of those rights embodied in the EU Charter Thus this book completes the trilogy of ETUI TTUR books on fundamental social rights at European level following the publication also by Hart Publishing of The European Convention of Human Rights and the Employment Relation 2013 and The European Social Charter and the Employment Relation 2017

**The Foundations of European Union Competition Law** Renato Nazzini, 2011-12 Article 102 TFEU prohibits the abuse of a dominant position as incompatible with the common market Here the difficulties of assessing abuse in terms of Article 82 in light of the objectives of EU competition law are addressed to establish a robust and workable analytical framework for abuse of dominance The Invisible Hand and the Common Good Bernard Hodgson, 2004-08-11 The basic moral

significance of neo classical economics and the competitive market system it represents is founded on the classical liberal tradition in which the simple system of natural liberty is claimed to give expression to the harmony of each with all Though such a common good would not be the outcome of the intentions of individual agents or state planning nevertheless the impersonal forces of a capitalist market would so allocate resources as to lead the self interested participants in such an economy as if by an invisible hand to a coherent social order of mutual advantage The papers in this volume critically examine central aspects of the preceding social ethos underlying contemporary political economy and our increasingly globalized market culture The inquiry is undertaken from a variety of disciplinary perspectives at the intersection of philosophy economics political science sociology psychology and computer science **The Discovery of Historicity in**

**German Idealism and Historism** Peter Koslowski, 2005-03-04 German Idealism develops its philosophy of history as the theory of becoming absolute and as absolute knowledge Historism also originates from Hegel's and Schelling's discovery of absolute historicity as it turns against Idealism's philosophy of history by emphasizing the singular and unique in the process of history German Idealism and Historism can be considered as the central German contribution to the history of ideas Since Idealism became most influential for modern philosophy and Historism for modern historiography they are analyzed in this volume in a collaboration of philosophers and historians German Idealism is presented in Schelling and its critics Schlegel Baader and Nietzsche Historism in Ranke Droysen Burckhardt and Treitschke The volume further presents the impact of Idealism and Historism on present German approaches to the philosophy of history and outlines the debates on the possibility of a philosophy of history and on the methodology of the historical sciences Sociobiology and Bioeconomics Peter

Koslowski, 2013-03-09 The theory of evolution and Neo Darwinian biological theory extend their analysis in sociobiology from the life sciences and the animal societies to human societies Sociobiology as a unifying theory of the social interaction within and between species has led to an integration of economic analysis into biology The economy of nature has become the subject of bioeconomics which in turn transferred biological analysis to the human economy Evolution competition selection and cooperation are phenomena common to the economy of nature and human economy The inclusion of economic and cultural theory in evolution theory raises the question whether the Neo Darwinian Synthesis with its exclusive concern with somatic heredity is able to incorporate developmental systems of the human economy and of cultural heredity A new synthesis of the natural and the social sciences is in the making **Practical and Professional Ethics: Economic and**

**business ethics** Debashis Guha, 2008 Competition Law and Economic Inequality Jan Broulík, Katalin Cseres, 2022-12-15

The gap between the rich and poor is widening across the globe This book explores whether this major societal challenge of our time can be addressed by the means of competition law The primary goal of today s competition law is to ensure that market power does not lead to an inefficient production of goods and services Nevertheless even such efficiency oriented curbing of market power may arguably contribute to the reduction of differences in how much people own and earn Furthermore many competition law regimes do take into account distributive considerations too The chapters investigate the relationship between competition law and economic in equality from philosophical historical and economic perspectives Their inquiries concern the conceptual foundations of competition law and doctrinal frameworks of individual jurisdictions as well as specific problems and markets As such the book provides a novel and comprehensive overview of whether and how competition law can contribute to more equality in both developed and developing countries The book is a must read for researchers public officials judges and practitioners within the competition law community It will also appeal to anyone more broadly interested in issues of inequality and economic policy

Method and Morals in Constitutional Economics Geoffrey Brennan,Hartmut Kliemt,Robert D. Tollison,2013-03-09 This Festschrift was presented in electronic form to Buchanan on the occasion of his eightieth birthday on October 3 1999 after dinner in Fairfax Virginia As one might have expected the response to our call for papers was vo luminous In looking over the many contributions we felt that a published Festschrift was also possible and fitting for the eightieth birthday of so prodi gious and influential a scholar as Professor Buchanan To that end we have assembled the following volume In selecting the papers to be included here we have basically tried to choose those papers which in some way bear on Buchanan s contributions Perfectly good papers about issues not related to Buchanan s research agenda or not referring directly to Buchanan s work were not included Space constraints did not allow universal coverage so choices had to be made It should be stated clearly that these were our choices based on the criterion that the contribution be relevant to Buchanan s work Buchanan had nothing whatsoever to do with the selection of papers for this volume Once choices had been made we arranged the papers by subject matter ranging from various aspects of Buchanan s work in economics political science philosophy and related areas to some more personal recollections of Jim as a professor friend and colleague Including the latter material was also our decision and this probably represents a choice with which Jim would not have agreed We think however that the reader will find these pieces interesting and informative

**Religious Communities and Civil Society in Europe** Rupert Graf Strachwitz,2019-08-19 The seemingly vitalizing impact of religiosity on civil society is a research topic that has been extensively looked into not only in the USA but increasingly also in a European context What is missing is an evaluation of the role of institutionalized religious communities and of circumstances that facilitate or impede their status as civil society organisations This anthology in two volumes aims at closing this gap by providing case studies regarding

political legal and historical aspects in various European countries Vol I provides an introduction and looks at cases in Greece Italy the Netherlands Sweden and Bosnia and Herzegovina as well as chapters on legal issues and data and comprehensive bibliography

**The Historicity of Economics** Heino H. Nau, Bertram Schefold, 2012-11-02 In this volume continuities and discontinuities between Historical School of Economics and Old Institutional Economics are examined with regard to common research objectives and methods Similarly those between these two economic movements and New Institutional Economics as well as new economic sociology are discussed The following questions functioned as a guideline for the contributing economists sociologists historians and philosophers Can we meaningfully speak of the Historical School of Economics HSE as an economic research program What are the commonalities between the HSE and American old economic institutionalism Does the HSE represent a part of the lost anteroom of New Institutional Economics and new economic sociology How and why should the HSE matter to how we do economic and social theory today

**Labour, Finance and Inequality** Suzanne J. Konzelmann, Simon Deakin, Marc Fovargue-Davies, Frank Wilkinson, 2018-03-15 Following the 2008 global financial crisis the viability of globalised financial capitalism was called into question The resulting fear and uncertainty produced a momentary return to Keynesian policies But as soon as emergency stimuli and bank bail outs appeared to stabilise the situation there was a sharp reversal and successive British governments and the financial sector have since attempted to return to business as usual Historically much smaller shocks have been able to produce dramatic change with the 1978 Winter of Discontent providing a catalyst for the election of Margaret Thatcher the ultimate abandonment of the post war Keynesian consensus and the ushering in of neoliberalism Nor is apparent success a guarantee against change with Winston Churchill being swept from office by the first majority Labour government in 1945 at a point which should have marked his greatest triumph In this book these apparently inexplicable shifts in the conventional wisdom and the accompanying policy paradigm are explored through the lens of the interest groups that have jostled for position since the second industrial revolution In this context inequality poverty free market capitalism and the social welfare state have interacted in an uneasy dynamic dance the insecurity cycle The authors explore these interactions their impact on the relationship between society and the economy and the possible implications of Brexit and a re energised political left Written in an engaging and accessible style Labour Finance and Inequality will be a key resource for academics

and students of social and political economics as well as public policy It will also offer considerable insight to policy makers and a more general non specialist audience
