Social Problems, Law, and Society Kathryn A. Stout, Richard A. Dello Buono, William J. Chambliss, 2004-07-14. This collection of articles presents a critical issue oriented approach to law and society emphasizing its important relationship to contemporary social problems. By exploring the interstitial area between the sociology of law, social problems and social movements, the initial chapters trace out a theoretical trajectory which points to the need to move beyond traditional and social constructionist approaches. A variety of empirical studies together explore the contradictory dynamics of class as they relate to race and gender in both a national and global context illustrating the dialectical interplay between the state and social movements. Employing a wide range of perspectives so as to convey the great diversity found in the contemporary sociology of law and justice studies, these authors collectively share a broad consensus concerning the need to explore how social movements and the larger political economy play a pivotal role in shaping state reactions to the challenges presented by contemporary social problems. With its integrated presentation of theoretical perspectives and empirical studies, this unique anthology will be useful in a variety of sociology, criminology and justice studies course offerings such as Law and Society, Social Problems, Crime and Social Justice, Social Movements, Law and Social Control, Social Change, Law and Public Policy, Introduction to Legal Studies and others. Undergraduate and graduate students alike will appreciate that these articles, selected for their academic rigor, are highly readable and strongly oriented towards high profile social issues including those of class, race and gender inequalities as well as social movement and legal struggles in community, national and global settings.

Illegal Drug Use Through The Lifecourse David Moxon, Jaime Waters, 2016-10-04 Hidden older illegal drug users are a seldom researched group most research on illegal drug users instead focusses on the young or the institutionalised To counter this trend this book reports on a study of current hidden users of illegal drugs aged 40 and over These are individuals who have sustained illegal drug use over the long term largely away from the gaze of the authorities whilst living otherwise conventional lives holding down jobs raising families and so on Thus they have much to tell us about

how illegal substances can be integrated into life over the long term how that integration intersects with other aspects of one's existence and how illegal drug use is ultimately shaped by changes in personal circumstances and wider social contexts Utilising insights from the life course perspective the development of the participants use over their lives is analysed and placed in social context The book also details the nature of their current drug use Thus the book illustrates the place of illegal drugs in the lives of the participants and how this came to be over the decades as they also juggled work family and the everyday minutiae of life with their use The result is a unique look at the illegal drug use of an often ignored group of older drug users which charts the changing role that illegal drugs have played and continue to play in their lives
