Infanticide in the natural world might be a relatively rare event but as Amanda Rees shows it has enormously significant consequences Identified in the 1960s as a phenomenon worthy of investigation infanticide had by the 1970s become the focus of serious controversy The suggestion by Sarah Hrdy that it might be the outcome of an evolved strategy intended to maximize an individual's reproductive success sparked furious disputes between scientists disagreements that have continued down to the present day Meticulously tracing the history of the infanticide debates and drawing on extensive interviews with field scientists Rees investigates key theoretical and methodological themes that have characterized field studies of apes and monkeys in the twentieth century As a detailed study of the scientific method and its application to field research The Infanticide Controversy sheds new light on our understanding of scientific practice focusing in particular on the challenges of working in natural environments the relationship between objectivity and interpretation in an observational science and the impact of the public profile of primatology on the development of primatological research Most importantly it also considers the wider significance that the study of field science has in a period when the ecological results of uncontrolled human interventions in natural systems are becoming ever more evident The Tragedy of American School Reform Ronald W. Evans,2011-05-09 Two persistent dilemmas haunt school reform curriculum politics and classroom constancy Both undermined the 1960s new social studies a dynamic reform movement centered on inquiry issues and social activism Dramatic academic freedom controversies ended reform and led to a conservative restoration On one side were teachers and curriculum developers on the other conservative activists determined to undo the revolutions of the 1960s The episode brought a return to traditional history a turn away from questioning and the re imposition of authority Engagingly written and thoroughly researched The Tragedy of American School Reform offers a provocative perspective on current trends **Teaching and Learning the Difficult Past** Magdalena H. and professional differences among the contending scholars The infighting between the groups was bitter Yet in contrast to recent studies of other Soviet professions in the 1920s the author finds that in rural studies Marxists and non Marxists had much in common Her findings suggest that the coexistence of the old and the new in Soviet rural studies might have lasted for some time had not external political forces intervened in late 1928 acting as a pressure on the field and eventually causing its demise

The 2nd Dubai International Conference in Higher Education Lulett Escarpe-Ibarra, **No Reluctant Citizens** Jeremiah Clabough, Timothy Lintner, 2018-06-01 American democracy is at a critical crossroads Rancor division and suspicion are the unfortunate byproducts of the contentious 2016 presidential election The election also bred a measure of civic uncertainty where citizens of all ages struggle to find and define their roles within a functioning democracy *No Reluctant Citizens Teaching Civics in K 12 Classrooms* is designed to help social studies teachers reinforce the centrality of civic education through a series of hands on participatory and empowering activities From civic literacy to human rights from service learning to controversial issues *No Reluctant Citizens Teaching Civics in K 12 Classrooms*

It is not difficult to argue that the social sciences are in a period of transition Our day to day lives have been marked by uncertainty as our social lives have vacillated wildly between highs and lows tensions between fellow citizens have heightened along ideological fault lines and educators have been placed squarely at the center of public discourses about what and how we should be teaching By any measure we are living in a time where every moment seems to be rife with high stakes realities that must be navigated Ladson Billings 2020 called on educators to reimagine education and contest the notion of a return to normal In the current highly polarized context where we see multiple competing narratives rather than promoting a return to normal or business as usual approach we argue that educators must use the lessons of the last two years as well as draw on what we have learned from history and the social sciences By asking ourselves how we might interrogate and inform current social landscapes and the challenges that arise from them we have the opportunity to take leadership in fostering innovation building solidarity and re imagining the teaching and learning of history and the social sciences We recognize that humans live in multiple complex communities that include intersectional identities relationships with power agency and discourses and lived realities that are as unique as they are divergent Consequently the task of educators and the goal of this volume is to provide a clarion voice to a dynamic relational and undeniably human social world
