been regarded as necessary in our school systems Educators have been studying new and innovative methods of stimulating interest in the subject long before the 1960 s but they always seem to retreat to lectures memorization of facts essay exams and reiteration of concepts Inquiry oriented skill development emphasis on affective type goals value clarification the present to past approach to the study of history and the past to present approach have all been studied and analyzed sic and grant money has been awarded to prove the value of United States history in our schools It was only until recently that social studies was regarded as a fourth requirement in our educational system What then caused the change Recently the sic school systems have been required to test the third fifth and ninth graders on their general academic proficiency These tests include intelligence achievement and aptitude tests which are distributed and completed townwide statewide and nationally Each test is studied individually and as a group to compare the results with established standards Education economy and geography effected the test results and frequently made a comparison inappropriate sic City newspaper headlines often read Many fifth graders reading on third grade level or Fifty per cent of fifth grade students lack basic math skills needed for Life What is the reaction Give more time to those basic skills which the fifth graders need The problem occurs when the required school day allots an unwavering 350 minutes each day to teach If more time is to be spent in reading writing and arithmetic then less time must be spent in other areas such as social studies physical education music art science and health Yes the test scores will be improved in reading and math but eventually the students will show noticable sic weaknesses in their life skills Should the school system be allowed to decide that education in morals decision making government foreign affairs and patriotism is less important than that of phonics addition fractions and questioning techniques All skills carry appropriate importance in the realm of the children s world but the integration into the schedule bears investigation It is my purpose through this paper to show the importance of all these skills and the method of integrating them into the standard school day By introducing an interdisciplinary social study curriculum the basic skills of reading and arithmetic can be taught through the varied use of the social studies curriculum Skills such as map reading economics ecology location arid acquiring information critical thinking communication and many others are as much a part of reading and arithmetic as they are of the social studies curriculum As Franklin Roosevelt expressed so well The only tiding to fear is fear itself It also holds true among teachers If teachers could become less fearful of varied topics and methods in the social studies curriculum a more rounded education would develop Through educating teachers and others first the education of the children will follow     **The United States Catalog** Ida M.
