The European Philosophers from Descartes to Nietzsche

Monroe Beardsley, 2002-11-12 Between the earliest and the latest of the works included here we have two hundred and fifty years of vigorous and adventurous philosophizing Monroe Beardsley writes in his Introduction to this collection If the modern period can be only vaguely or arbitrarily bounded it can at least be studied and we can ask whether any dominant themes overall patterns of movement or notable achievements can be found within it This question is one that is best asked by the reader after he has read or read around in these works This Modern Library Paperback Classic also includes a newly updated Bibliography

Leviathan Thomas Hobbes, 2004 After the publication of his masterpiece of political theory *Leviathan Or the Matter and Power of Commonwealth Ecclesiastic and Civil* in 1651 opponents charged Thomas Hobbes with atheism and banned and burned his books The English Parliament in a search for scapegoats even claimed that the theories found in *Leviathan* were a likely cause of the Plague of 1665 and the Great Fire of 1666 For the modern reader though Hobbes is more recognized for his popular belief that humanity's natural condition is a state of perpetual war with life being solitary poor nasty brutish and short Despite frequent challenges by other philosophers *Leviathan's* secular theory of absolutism no longer stands out as particularly objectionable In the description of the organization of states moreover we see Hobbes as strikingly current in his use of concepts that we still employ today including the ideas of natural law natural rights and the social contract Based on this work one could even argue that Hobbes created English language philosophy insofar as *Leviathan* was the first great philosophical work written in English and one whose impact continues to the present day

A Political Theology of the Bureaucratic State Steven T. Lane, 2024-10-29 Liberal democracies of the twenty first century face the continuing economic tensions of globalization and the various populist political responses In *A Political Theology of the Bureaucratic State* Steven T Lane argues that a deeper problem exists

underneath the neoliberal system of contemporary democratic capitalism the bureaucratic state and the ways it deploys its sovereignty Yet these problems have received little attention from Christian political thinkers in the fields of ethics or political theology By bringing thinkers from across the academic disciplines from political philosophy and economics to biblical interpretation and public policy and using modern case studies related to public health and welfare state Lane address the foundational issues affecting liberal democracies and the claims to power they make against their citizens

Introduction to Political Thought Peri Roberts, 2012-02-22 Your conceptual toolkit for the study of political thought Praise for the first edition This seems really to have been written with the first year student in mind The editors write in a way that is clear intelligent and engaging without being at all condescending Politics Studies Review New for this edition Brand new chapter on international political thought reflecting one of the most striking developments in contemporary political theory This textbook gives you all the vocabulary you need political conceptual and historical to engage confidently and deeply with political thought and the moral and political worlds in which we live It traces the history of political thought from Plato and Aristotle to Kymlicka and Rorty following a unique dual structure that introduces key thinkers and core concepts together making it suitable for any course structure Democracy in the Christian Church Luca Badini Confalonieri, 2012-05-10 Are church structures divinely willed and consequently both permanent and irreversible Can Christians modify the polity of their church like they do with that of civil society What would be the role of the office of oversight in a Christian church democratically organized What would its relationship with specialized authorities within the community be Building on a remarkable number of specialist studies in exegesis church history political philosophy canon law and ecclesiology this book convincingly fulfils three goals First it encourages Christians to determine the political outlook of their faith community Secondly it provides some fundamental criteria for judging the ethical value of church structures on the basis of Bernard Lonergan's cognitional theory and with the help of recent insights from contemporary political philosophy Thirdly it outlines a largely novel and groundbreaking understanding of a democratic church In the process it engages with some of the most difficult ecclesiological issues faced by most Christian churches **From Class to Race** Charles Mills, 2003-11-19 In *From Class to Race* Charles Mills maps the theoretical route that brought him to the innovative conceptual framework outlined in his academic bestseller *The Racial Contract* 1997 Mills argues for a new critical theory that develops the insights of the black radical political tradition While challenging conventional interpretations of key Marxist concepts and claims the author contends that Marxism has been white insofar as it has failed to recognize the centrality of race and white supremacy to the making of the modern world By appealing to both mainstream liberal values and the structuralism traditionally associated with the left Mills asserts that critical race theory can radicalize the mainstream Enlightenment and develop a new kind of contractarianism that deals frontally with race and other forms of social oppression rather than evading them *Moral Philosophy: A Contemporary Introduction* Daniel R. DeNicola, 2018-11-30 Moral

Philosophy A Contemporary Introduction is a compact yet comprehensive book offering an explication and critique of the major theories that have shaped philosophical ethics Engaging with both historical and contemporary figures this book explores the scope limits and requirements of morality DeNicola traces our various attempts to ground morality in nature in religion in culture in social contracts and in aspects of the human person such as reason emotions caring and intuition
