**Is the Planet Full?** Ian Goldin, 2014 What are the impacts of population growth Can our planet support the demands of the ten billion people anticipated to be the world's population by the middle of this century While it is common to hear about the problems of overpopulation might there be unexplored benefits of increasing numbers of people in the world How can we both consider and harness the potential benefits brought by a healthier wealthier and larger population May more people mean more scientists to discover how our world works more inventors and thinkers to help solve the world's problems more skilled people to put these ideas into practice In this book leading academics with a wide range of expertise in demography philosophy biology climate science economics and environmental sustainability explore the contexts costs and benefits of a burgeoning population on our economic social and environmental systems

Enhancing Women's Participation in Economic Development, 1994-01-01 Annotation Makes recommendations for removing the barriers women face in contributing to and benefiting from sustainable economic development International experience has proved that support for a stronger role for women in society contributes to economic growth through improved child survival rates better family health and reduced fertility rates Nevertheless women still face many barriers in contributing to and benefiting from development These include low investment in female education and health and restricted access to services and assets This study highlights five areas that could help change this inequitable situation education health wage labor agriculture and natural resource management and financial services A gender and development strategy is suggested that would take into account the relative roles and responsibilities of women and men implying that the actions and attitudes of men must change The ideas presented in this paper are an example of the World Bank's commitment to mainstreaming gender concerns into its operations Although significant steps have already been taken in this direction there remains a long road ahead Also available French ISBN 0 8213 3023 3 Stock No 13023 Spanish ISBN 0 8213 3024 1 Stock No 13024

**Investing in All the People** Lawrence H. Summers, 1994-01-01 World Bank Technical Paper 244 This report on the experiences of several Pacific island nations

indicates that in remote villages solar photovoltaic PV technologies are supplying reliable power at costs lower than those of the more commonly used diesel systems Although the supply of electricity to households is limited PV does provide isolated peoples with access to light and to information through television and VCRs The study shows that the success of these programs depends not only on the technology itself but on personnel training good fee collection systems and careful financial management Where managerial and technical expertise was lacking maintenance by local cooperatively owned utilities proved to be the best option The authors present a case study from Tuvalu where the solar PV system exemplifies the program's effectiveness in serving remote areas The successful Tuvalu Solar Electric Cooperative Society TSECS formed in 1984 has been maintained by a well trained technical staff with local and visiting technicians It has also benefited from fee collection through an outside agency that prevents diversion of funds to other projects local user committees to communicate with the utility and an exclusive focus on PV systems Environmentally attractive at both the global and local levels PV solar technology appears highly promising for small scale applications in developing countries

**Criminals in the Making** John Paul Wright, Stephen G. Tibbetts, Leah E. Daigle, 2014-02-10 Why do individuals exposed to the same environment turn out so differently with some engaging in crime and others abiding by societal rules and norms Why are males involved in violent crime more often than females And why do the precursors of serious pathological behavior typically emerge in childhood This fascinating text addresses key questions surrounding criminal propensity by discussing studies of the life course perspective criminological research that links biological factors associated with criminality with the social and environmental agents thought to cause facilitate or otherwise influence a tendency towards criminal activity The book provides comprehensive interdisciplinary coverage of the current thinking in the field about criminal behavior over the course of a lifetime Additionally it highlights interventions proven effective and illustrates how the life course perspective has contributed to a greater understanding of the causes of crime

Bridges and Barriers Eddie Williams, 2014-06-03 Recent decades have seen sub Saharan Africa decline in both economic and human terms The rich North has responded with a barrage of well publicized initiatives from pop concerts to international commitments on debt relief aid trade and good governance Among the complex of factors necessary to sustain economic and human development education receives little media coverage although it is crucial However education must be effective This book argues that in Anglophone Africa education is not effective because of the use of English rather than children s first languages both as the medium of instruction and also as the language in which children are first taught to read Research is presented from Malawi and Zambia countries with contrasting language policies using evidence from tests in English and African languages small group discussions and classroom observation The findings show that English medium policies in Africa do not give students any advantage in English over first language policies while the use of English discriminates against girls and rural children The book concludes that much education in Africa is a barrier rather than a bridge to learning because of the prevailing language ideology which has resulted in massive over estimation of the value of English While appropriate language policies alone will not solve education and development difficulties in Africa they do have a positive contribution to make The evidence presented here

suggests they are failing to make that contribution

**Improving Global Health** Barry B. Hughes, Randall Kuhn, Cecilia Mosca Peterson, Dale S. Rothman, Jose Roberto Solorzano, 2015-11-17 Improving Global Health is the third in a series of volumes Patterns of Potential Human Progress that uses the International Futures IFs simulation model to explore prospects for human development how development appears to be unfolding globally and locally how we would like it to evolve and how better to assure that we move it in desired directions Earlier volumes addressed the reduction of global poverty and the advance of global education Volume 3 sets out to tell a story of possible futures for the health of peoples across the world Questions the volume addresses include What health outcomes might we expect given current patterns of human development What opportunities exist for intervention and the achievement of alternate health futures How might improved health futures affect broader economic social and political prospects of countries regions and the world

**Korean Industrial Policy** Danny M. Leipziger, Peter A. Petri, 1993 The World Bank is changing the way it does business in the energy sector This Policy Paper is one of two that outlines the Bank's new policies for the sector The review was prompted by concern about the effects of power generation on the environment and on populations that may be resettled to make way for projects Another stimulus was the macroeconomic reality of fewer investment resources in many countries And many developing countries are becoming more receptive to reforming the way energy is produced and consumed This paper credits the public monopoly approach of the last 30 years with facilitating expansion of power supplies capturing technical economies of scale and making effective use of scarce managerial and technical skills Nonetheless it recommends several new policies to improve the performance of the electric power sector in developing countries These reforms will guide future Bank activities in the sector Bank loans for electric power will go first to countries clearly committed to improving the performance of their power sectors The Bank will also discourage subsidies on energy prices and will encourage private investment in utilities And it will provide financing to help the least developed countries import power where local generation is not practical The efficiency of

production and use of electric power in developing countries is examined in a companion paper Energy Efficiency and Conservation in the Developing World The World Banks Role The World Bank s Role in the Electric Power Sector is also available in Spanish La funcion del Banco Mundial en el sector de la electricidad Politicas para efectuar una reforma institucional regulatoria y financiera eficaz ISBN 0 8213 2451 9 Stock No 12451 7 95 Price code 007 Spanis **Borrower**

**Ownership of Adjustment Programs and the Political Economy of Reform** John H. Johnson,Sulaiman S. Wasty,1993-01-01 China has done much to reform its price system achieve macroeconomic stability and restore growth Nevertheless price distortions remain in three key areas This study suggests further price reforms for the energy grain and transport sectors It explains why energy price adjustments should have only a modest effect on consumer prices but a highly positive effect on the economy It discusses why China may have to reduce consumer subsidies to achieve the necessary reforms for grain prices The study describes what the government must do to strengthen commodity markets generate competition and make allowances for seasonal price variations China s transport sector has been a critical development bottleneck The paper reviews tariff adjustments and other reforms that would modernize the transport system and help it meet growing demand These reforms also would encourage energy conservation and help integrate the national economy
