Extended Abstract

Belief dynamics are central to human society. Individuals depend on accurate beliefs to engage in appropriate behaviors (Hemmer et al., 2022; Yon et al., 2020), such as deciding which college or which job position to apply for. Additionally, beliefs are inherently social — successful coordination and cooperation are founded on shared beliefs, and people form groups based on deep-seated beliefs (Van Prooijen & Douglas, 2018; White et al., 2021). However, beliefs were traditionally often studied in isolation; psychological studies typically focused on a single belief of independent individuals. However, this approach is increasingly challenged. On the one hand, the network perspective of individual belief systems suggests that beliefs should be considered interconnected systems – a change in one belief is constrained by surrounding beliefs and leads to changes in other beliefs (Brandt, 2022; Dalege et al., 2016; Powell et al., 2023). On the other hand, a social network approach suggests groups can be viewed as a social network of beliefs held by individuals (Lüders et al., 2024; Sirbu et al., 2017). Therefore, it is proposed that belief dynamics should increasingly be understood as a “network within a network,” where the within-person belief network is embedded within between-person social networks (Galesic et al., 2021; Vlasceanu et al., 2023).

A fundamental force driving belief dynamics is the human endeavor to resolve inconsistencies within both individual and social networks (Dalege et al., 2016; Galesic et al., 2021). This concept is supported by classic psychological theories, such as cognitive dissonance (Festinger, 1957) and Heider’s balance theory (Heider, 1958). However, the nature of the trade-offs between internal dissonance and social imbalance remains unclear. Existing models often presume that individuals have a fixed preference for resolving internal dissonance over addressing social imbalance (Galesic et al., 2021), but the validity of this assumption is debatable. In reality, individuals may navigate these inconsistencies in a more dynamic and context-dependent manner. Humans are capable of synthesizing advice and personal experience, typically leaning towards more reliable sources (Biele et al., 2009; Vélez & Gweon, 2019). For instance, if an individual encounters conflicting beliefs about a particular issue but the social consensus on that issue is clear, they may choose to align with the social norm. Conversely, if the social consensus

around the globe vividly demonstrate that one cannot understand the modern Chinese world without attending closely to the question of religion. *The Religious Question in Modern China* highlights parallels and contrasts between historical events, political regimes and cultural movements to explore how religion has challenged and responded to secular Chinese modernity from 1898 to the present. Vincent Goossaert and David A. Palmer piece together the puzzle of religion in China not by looking separately at different religions in different contexts but by writing a unified story of how religion has shaped and in turn been shaped by modern Chinese society. From Chinese medicine and the martial arts to communal temple cults and revivalist redemptive societies, the authors demonstrate that from the nineteenth century onward, as the Chinese state shifted the religious landscape, consistently resurfaced in a bewildering variety of old and new forms. *The Religious Question in Modern China* integrates historical, anthropological and sociological perspectives in a comprehensive overview of China's religious history that is certain to become an indispensable reference for specialists and students alike. **The SAGE**

Handbook of the Sociology of Religion James A. Beckford, Jay Demerath, 2007-10-29. In their introduction to this Handbook, the editors affirm: "Many sociologists have come to realise that it makes no sense now to omit religion from the repertoire of social scientific explanations of social life. I wholeheartedly agree. I also suggest that this wide-ranging set of essays should become a starting point for such enquiries. Each chapter is clear, comprehensive and well structured, making the Handbook a real asset for all those engaged in the field." Grace Davie, University of Exeter. "Serious social scientists who care about making sense of the world can no longer ignore the fact that religious beliefs and practices are an important part of this world. This Handbook is a valuable resource for specialists and amateurs alike. The editors have done an exceptionally fine job of incorporating topics that illuminate the range and diversity of religion and its continuing significance throughout the world." Robert Wuthnow, Princeton University. "At a time when religions are increasingly affecting and affected by life beyond the narrowly sacred sphere, religion everywhere seems to be caught up in change and conflict. In the midst of this contention and confusion, the sociology of religion provides a rich source of understanding and explanation. This Handbook presents an unprecedentedly comprehensive assessment of the field, both where it has been and where it is headed. Like its many distinguished contributors, its topics and their coverage are truly global in their reach. The Handbook's 35 chapters are organized into eight sections: basic theories and debates; methods of studying religion; social forms and experiences of religion; issues of power and control in religious organizations; religion and politics; individual religious behaviour in social context; religion, self-identity and the life course; and case studies of China, Eastern Europe, Israel, Japan and Mexico. Each chapter establishes benchmarks for the state of sociological thinking about religion in the 21st century and provides a rich bibliography for pursuing its subject further. Overall, the Handbook stretches the field conceptually, methodologically, comparatively and historically. An indispensable source of guidance and insight for both students and scholars." Religion in the History of the Medieval West John Van Engen,2023-05-31 These ten essays by John Van Engen situate religion in the history of medieval Western Europe as an unavoidable presence in everyday life as a conceptual framework for social and political life as a force integral to its historical dynamics Four of the essays are bibliographical and retrospective in nature reviewing the field broadly but also pointing toward a more dialectical approach to understanding the interaction of religion and society in the European middle ages Other studies deal with large topics usually subsumed under the abstract term Christianization They grapple with learned sources as well as those associated with popular religion and show what can be gained from an imaginative use of all that lawyers and theologians said about religion in their society The essays finally look for the quality and dynamic of change even inventiveness released by religious action and conviction in medieval European society

History and the Study of Religion Stanley Stowers,2024 How does one understand religion Can one explain religion How does one understand the craft and discipline of the historian How can one best bring together the study of religion with the craft and discipline of the historian I am a historian who works in the

study of religion and believe that the present intellectual moment offers enormous in some ways unprecedented opportunities both in the study of religion and historiography But at the same time difficulties and dangers loom together with the opportunities My specialty and prime set of examples lie in the study of ancient Mediterranean religion if indeed there is something that can rightly be called Mediterranean religion or even called religion Many specialists in the study of religion and also many of those who study ancient cultures doubt or even reject outright religion as a cross historical category on the one hand and on the other anything common about religion across the ancient Mediterranean And some cognitive scientists who against religion specialists have argued for the centrality of gods to religion then agree with the skeptics that religion is not a coherent social object a social kind I will argue that long discredited forms of anti realism and untenable anthropocentrism haunt both groups Among other areas I work in Christianity and Judaism Do they belong to Mediterranean religion One can easily see how coming to an understanding of what religion is and what Mediterranean religion is form key questions I will argue that religion is a robust realistic entity a social kind and that ancient Mediterranean religion even with all of its great diversity operated with some key common principles It is no secret that Christianity and Judaism have presented themselves as unique and essentially untouched by an inferior and degenerate religiosity that characterized everyone else in the Mediterranean History looks different when one dispenses with such normatively heavy freight and situates the two within rather than outside of Mediterranean religion

Entangling Web Alec Ryrie, Mark A. Lamport, 2024-03-19 Europe has a tremendously important role in the history of Christianity and was the continent with the most Christians from roughly the year 900 to 1980 However Europe is now home to only 22 percent of all Christians in the world down from 68 percent in 1900 The major trend of European religion in the twentieth and twenty first centuries has been secularization disestablishment and decreased influence of state churches lower importance of religion in the public sphere the decline of religious beliefs and practices and individual religious switching from Christianity to atheism and agnosticism One hundred years ago it was true that the

typical Christian in the world was a white European Given current trends however Europe is clearly no longer the geographic nor demographic center of world Christianity Yet that does not mean Europe has no role in the future It is still the home of major Christian communions such as Catholics Rome Anglicans Canterbury Russian Orthodox Moscow and Lutherans Geneva European mission agencies are active throughout the world providing theological education and social welfare programs combatting climate change and advocating for gender equality

Faith Movements and Social Transformation Samta P. Pandya, 2018-12-11 This book examines the role of Hindu inspired faith movements HIFMs in contemporary India as actors in social transformation It further situates these movements in the context of the global political economy where such movements cross national boundaries to locate believers among the Hindu diaspora and others In contemporary neoliberal India HIFMs have become important actors and they realize themselves by making public assertions through service The four pillars of the contemporary presence of such movements are gurus sociality hegemony and social transformation Gurus who spearhead these movements create a matrix of possible meanings in their public discourses which their followers pick up to create messages of personal and social change Sociality is a core strategy of proliferation across such movements and implies social service which is qualified by memories of the guru and what they are believed to embody Hegemony is reflected in the fact that social service in such movements often ominously imbibes right wing or far right Hinduism They propose a model of Hindu inspired social transformation involving faith building into and transforming the civil society The book discusses in a

nuanced way several Hindu inspired faith movements of various hues which have made national and international impact This topical book is of interest to students and researchers in the fields of sociology anthropology social work and social psychology with a special interest in the study of religious movements Readings from Friedrich Von Hügel Friedrich Freiherr von Hügel,1928 **Religion-State Relations in the United States and Germany** Claudia E. Haupt,2011-12-08 This comparative analysis of the constitutional law of religion state relations in the United States and Germany focuses on the principle of state neutrality A strong emphasis on state neutrality a notoriously ambiguous concept is a shared feature in the constitutional jurisprudence of the US Supreme Court and the German Federal Constitutional Court but neutrality does not have the same meaning in both systems In Germany neutrality tends to indicate more distance between church and state whereas the opposite is the case in the United States Neutrality also has other meanings in both systems making straightforward comparison more difficult than it might seem Although the underlying trajectory of neutrality is different in both countries the discussion of neutrality breaks down into largely parallel themes By examining those themes in a comparative perspective the meaning of state neutrality in religion state relations can be delineated
