Social Mobility in Traditional Chinese Society Yung-Teh Chow, 2018-12-13 This authoritative volume a large scale empirical work comparable to Pitirim Sorokin's Social Mobility is a penetrating and comprehensive study of social stratification and mobility in traditional Chinese society and a highly significant addition to the theoretical and factual foundations of contemporary social science It offers an authentic portrayal not only of social mobility but of social life in China in general at the time of its original publication in the 1960s It includes the life histories of the upper class scholars active and retired officials merchants and wealthy landlords and an analysis of social statistics drawn from one Chinese county which provides new interpretations of the processes of social mobility the relationship of this class to society as a whole and the motives of upwardly mobile individuals Each life history comprises at least five generations and its resulting accounts touch upon the lives of 1 200 persons and help place the development of the gentry in illuminating context within the population as a whole Chow's book offers a welcome method of comparison of two societies that have both birth and mobile elites As China entered the world system its open class system changed from fluidity to disorganization regarding its character As such it was transformed into an innovating society in which the earlier system could not or did not work Social Mobility in Traditional Chinese Society is unique in its field for the successful correlation of conceptual framework with its detailed wealth of empirical findings It will be welcomed by all students of social science international relations and Asian studies

Social Connections in China Thomas Gold, Doug Guthrie, David Wank, 2002-09-05 This volume assesses the evolving role of guanxi social networks in China's transforming society

The Individualization of Chinese Society Yunxiang Yan, 2020-08-19 Chinese society has seen phenomenal change in the last 30 years Two of the most profound changes have been the rise of the individual in both public and private spheres and the consequent individualization of Chinese society itself Yet despite China's recent dramatic entrance into global politics and economics neither of these significant shifts has been fully analysed China may indeed present an alternative model of social transformation in the age of globalisation so its path to development may have particular implications for the developing world The Individualization of Chinese Society reveals how individual agency has been on the rise since the 1970s and how this has impacted on everyday life and Chinese society more broadly The book presents a wide range of detailed case studies on the impact of economic policy patterns of kinship changes in marriage relations and the socio economic position of women the development of youth culture the politics of consumerism and shifting power relations in everyday life

The Internet, Social Networks and Civic Engagement in Chinese Societies Wenhong Chen, 2016-04-14 The

Internet in China reflects many contradictions and complexities of the society in which it is embedded. Despite the growing significance of digital media and communication technologies, research on their contingent non-linear and sometimes paradoxical impact on civic engagement remains theoretically underdeveloped and empirically understudied. As importantly, many studies on the internet's implications in Chinese societies have focused on China. This book draws on a variety of theoretical and methodological approaches to advance a balanced and context-rich understanding of the effects of digital media and communication technologies, especially social media, for state legitimacy, the rise of issue-based networks, the growth of the public sphere, and various forms of civic engagement in China, Taiwan, and the global Chinese diaspora. Using ethnography, interview, experiment, survey, and the big data method, scholars from North America, Europe, and Asia show that the contours and impacts of digital activism depend on issue and context. This book was originally published as a special issue of *Information Communication Society*.

The Theory of Guanxi and Chinese Society Jack Barbalet, 2021-06-17. The concept of *guanxi* is used extensively in Chinese society. Loosely understood as connections or networks, it refers to long-term mutually reinforcing exchanges between individuals based on affective and normative commitments. This book comprehensively examines the nature and background of this extremely significant and distinct feature of Chinese social, political, economic, and business relations. It takes account of the major theoretical frameworks that relate to the long-term connections that are developed to pursue instrumental advantage in a society marked by relatively weak legal and regulatory institutions. The book locates such theorizing in the major features of the rapidly evolving Chinese market society. Yet it also pays attention to the historical origins and cultural sources of a highly particularistic approach to the acquisition of social and material resources, an approach which relies on obligatory relations of favour exchange between persons who self-consciously and strategically select their associates and goals. This sociological treatment of *guanxi* challenges many dominant conventions and introduces a novel research approach which captures the pertinent psychological dispositions, cultural expressions, and institutional frameworks that underpin the phenomenon.

Space Modernization and Social Interaction Qingqing Yang, 2014-09-25. This book concerns the Beijing Hutong and changing perceptions of space of social relations and of self as processes of urban redevelopment. Remove Hutong dwellers from their traditional homes to new high-rise apartments. It addresses questions of how space is humanly built and transformed, classified and differentiated, and most importantly, how space is perceived and experienced. This study elaborates and expands Lefebvre's trialectic of space on a theoretical level. The ethnography presented is a conversation with Tim Ingold's argument about empty space. This research employs the ethnographic technique of participant observation to secure a finely textured, detailed, and micro-social account of local experience. Then these micro-social insights are contextualized within macro-social structures of Chinese modernism by speaking to geographical concerns, orientalism, and history.

Handbook of Research on Social Interaction Technologies and Collaboration

Software: Concepts and Trends Dumova, Tatyana, Fiordo, Richard, 2009-07-31 This book explores the origin structure purpose and function of socially interactive technologies known as social software Provided by publisher *Rules and Networks* Richard Appelbaum, William Felstiner, Volkmar Gessner, 2001-12-21 International business transactions are heavily influenced by culture practice and rule The pursuit of business relationships within nation states can be subject to differences in the generation of norms and the processing of disputes but these conflicts are magnified many times over in cross border transactions where nation state control and support is weak or absent This book seeks different explanations of the ways in which business people and their legal advisers try to minimise the effect of these magnified difficulties At the

outset the editors suggest four sources through which the international business community might be considered to have supplemented nation state conflict prevention and dispute resolution institutions an international legal order the development of a private normative order based on common business practices denominated the *lex mercatoria* through the efforts and work product of internationalised law firms and by means of extensive thick personal relationships often referred to by their Chinese term *guanxi* Since most explanations are dominated by North American and European legal scholarship and practice a second concern of this book is to open up the discussion to competing explanatory frameworks Specifically it develops the notion that global legal convergence may not be the immediate inevitable result of increased global economic interaction Rather less formal mechanisms for achieving normative understanding and predictability in business dealings may also flourish

A Century of Change in a Chinese Village Lin Juren,Xie Yuxi,2018-05-04 Over the last half century China has evolved from a poor rural country to a geopolitical powerhouse Rapid urbanization has been at the heart of that transformation and as migrant laborers have left their villages what has become of the rural communities that were once the center of economic social and cultural life And how do contemporary Chinese scholars understand those changes These are the questions that this compelling book answers Lengshuigou village located near the Shandong provincial capital of Jinan was first studied by Japanese social scientists in the early 1940s and then again in the 1980s and 1990s Building on these rich surveys this book traces changes from the early twentieth century to the present day in family and lineage social stratification personal networks annual and life cycle rituals village politics and elite formation Drawing on their own large scale survey of contemporary village households the authors analyze the physical and institutional changes that have altered the community as well as the shifts in interpersonal relations and attitudes that have upended centuries old systems of patriarchy and generational order This important book presents for the first time in English analysis by Chinese sociologists on the radical transformation of Chinese rural society

ECIC2009-2nd European Conference on Intellectual Capital Susana Rodrigues,2010 **ECIC2010-Proceedings of the 2nd European Conference on Intellectual Capital** Susana Rodrigues,2010 **Education and Social Change in China: Inequality in a Market Economy** Gerard A. Postiglione,2015-01-28 Market reform financial decentralization and economic globalization have greatly accentuated China's social and regional inequalities Education is expected to address these inequalities in a context of rapid social change including the rise of an urban middle class changed status of women resurgence of ethnic identities growing rural to urban migration and lingering poverty in remote areas But some argue that state policies have not sufficiently addressed inequitable practices and that schools actually perpetuate and reproduce inequities giving rise to a new system of social stratification driven more by market forces than socialist principles Featuring all original previously unpublished material this volume examines this argument through analysis of selected aspects of educational stratification in China during the reform era Chapters focus on the new urban middle class poor rural residents the migrant population in urban areas rural

girls and ethnic minorities The contributors are established scholars in the field and they build a conceptual framework for assessing the degree to which China's educational reforms are inclusive equitable and integrative across social categories and groups

A Feminist Reading of China's Digital Public Sphere Altman Yuzhu Peng, 2020-10-20 This book makes an original contribution to the field of feminist cultural studies through an analysis of the gender politics axis established in China's digital public sphere While a growing body of literature in contemporary feminist cultural studies has turned attention to the Chinese environment scholarship remains limited in exploring the intersection of gender and politics in the context of Chinese digital cultures This book addresses this timely topic It will appeal to both scholars and students interested in exploring the complex dynamic interplay between digital cultures public expressions as well as representations and perceptions of gender reflected in Chinese Internet users everyday communicative practice from a feminist media studies perspective

Sustainability and Social Responsibility: Regulation and Reporting Graham Gal, Orhan Akisik, William Wooldridge, 2017-08-08 This book addresses key issues related to the choice between governments regulating and enforcing society's sustainability and social responsibility objectives and firms reporting on their sustainable and socially responsible activities so stakeholders can exert pressure on firms to achieve society's goals While these may be considered as the two endpoints of a continuum it is clear that there are differing perspectives on the role of governments in sustainability and responsibility At one end of this continuum are stakeholders who believe the only way to achieve a sustainable and socially conscious society is to establish and enforce regulations with the concomitant governmental organizations to oversee and enforce those regulations At the other end are those who consider firms to be crucial organizations for achieving sustainability and socially responsible outcomes and who feel it is the responsibility of stakeholders to determine the legitimacy of firms actions It is probably not the case that any economies exist at either end of

this continuum but it is clear that the availability of reliable information is critical for any stakeholder to review the performance of either the governments or the firms This book presents a varied set of papers that explore the issues that must be considered regardless of which position a stakeholder takes *Social Network Analysis of Disaster Response, Recovery, and Adaptation* Eric C Jones,A.J. Faas,2016-09-09 Social Network Analysis of Disaster Response Recovery and Adaptation covers systematic social network analysis and how people and institutions function in disasters after disasters and the ways they adapt to hazard settings As hazards become disasters the opportunities and constraints for maintaining a safe and secure life and livelihood become too strained for many people Anecdotally and through many case studies we know that social interactions exacerbate or mitigate those strains necessitating a concerted intellectual effort to understand the variation in how ties within and outside communities respond and are affected by hazards and disasters Examines the role of societal relationships in a disaster context incorporating theory and case studies by experts in the field Integrates research in the areas of social network analysis and inter organizational networks Presents a range of studies from around the world employing different approaches to network analysis in disaster contexts *Mobile Communication and Greater China* Rodney Wai-chi Chu,Leopoldina Fortunati,Pui-Lam Law,Shanhua Yang,2012-05-04 This edited volume is the first book length study focusing entirely on mobile phone use in China Drawing on examples from a wide range of contemporary situations in China and beyond the contributors argue that the mobile phone is in fact an important means by which one can understand a rapidly changing China and the developing culture of mobile phone usage reflects both the cultural norms and struggle of the people Through a theoretical comparison of usage in the West and in China the editors assert the uniqueness of China s experience highlighting that Chinese society is being exposed simultaneously to a rapid process of industrialization and cyberization The contributors maintain that such density of experience under a compressed period combined with a thick cultural heritage and a country still under a dictating rule provides a unique situation and offers deep insights into Chinese culture in general This work will be of great interest to all students and scholars of Asian communication studies ICT and Chinese culture and society
