Social neuroscience John T. Cacioppo, Assessing Empathy Elizabeth A. Segal, Karen E. Gerdes, Cynthia A. Lietz, M. Alex Wagaman, Jennifer M. Geiger, 2017-02-28 Empathy is a widely used term but it is also difficult to define In recent years the field of cognitive neuroscience has made impressive strides in identifying neural networks in the brain related to or triggered by empathy Still what exactly do we mean when we say that someone has or lacks empathy How is empathy distinguished from sympathy or pity And is society truly suffering from an empathy deficit as some experts have charged In *Assessing Empathy* Elizabeth A Segal and colleagues marshal years of research to present a comprehensive definition of empathy one that links neuroscientific evidence to human service practice The book begins with a discussion of our current understanding of empathy in neurological biological and behavioral terms The authors explain why empathy is important on both the individual and societal levels They then introduce the concepts of interpersonal empathy and social empathy and how these processes can interrelate or operate separately Finally they examine the weaknesses of extant empathy assessments before introducing three new validated measures the Empathy Assessment Index the Social Empathy Index and the Interpersonal and Social Empathy Index
